One Arrow, One Life is a classic treatise on kyudo, the art of traditional Japanese archery, and its relation to the ideals and practice of Zen Buddhism. With a solid introduction to the form and practice of Zen meditation, as well as a thorough description of the Eight Stages of Kyudo, One Arrow, One Life captures the subtleties of the complementary nature of thought and action, movement and stillness. Demonstrating the importance of bringing movement, posture and breathing into harmony, One Arrow, One Life interweaves Zen philosophy with daily experience and techniques, teachers, and the dojo, to give a name and face to kyudo. Beginning with its discussion of the breathing, posture, and concentration that is fundamental to both disciplines, then quickly moving on to the subtleties of advanced practice, author, Ken Kushner ties everything together into a personal testimony of the pervasiveness of Zen in everyday life. Illustrator, Jackson Morisawa's line drawings bring the art of kyudo to life. For those interested in Zen and moving meditation, kyudo practitioners of all levels, as well as students of the Way of martial arts, this volume is an indispensable guidebook.

Tip of the Arrow DC Comics

In the Paleolithic era, over 250,000 years ago, archery was invented. With bows and arrows made from wood (mostly pine), archery was presumably used only for hunting. As technology advanced, stone arrowheads were fashioned on the ends of arrows, making them more effective. Archery arrived in the Americas around 2,500 BC. While archery was mostly used for hunting, the tribes of the Southern United States created a game that involved shooting arrows into a moving hoop. The Indian tribes of the Great Plains were the first to become adept at archery on horseback. During the Iron Age, Babylonians and Assyrians used archery in warfare. Just as Native American tribes learned to perfect archery on horses, these peoples became skilled in archery on moving war chariots. Into the Middle Ages, European warfare relied heavily on both skilled and unskilled archers. Implementing mass archery tactics during the Crusades, the English invented their own bow, the English long bow, one of the most popular styles to this day. Today, archery is an Olympic sporting event, a skill used in recreational hunting, and somewhat of a lost art. Recently, archery has become a bit of a fad in America and the United Kingdom because of the rise in popular culture of archers like Robin Hood, Green Arrow and The Hunger Games'Katniss Everdeen.

The purpose of my book, *The Tip of the Arrow, A Study in Leadership*, is to share with young people of today and tomorrow the story of young people like me at age sixteen as the blueprint of the Selma Student Nonviolent Civil Rights movement, a significant impacting factor in the passage of the 1964 Civil Rights Act and the dominating influence leading to the passage of the 1965 Voting Rights Act. On February 24, 2016, during a ceremony awarding the Congressional Gold Medal at the US Capitol in Washington, DC, I beamed with personal pride upon hearing Speaker Paul Ryan's statement that Congress decided to bestow the award to the foot soldiers because their contribution to our country was so great that they deserved the highest honor in our possession, the Congressional Gold Medal. *The Tip of the Arrow* is our story.

The Silver Arrow Yellow Rose Books by RCE

In our century, the subject of time has become an area of serious inquiry for science. Theories that contain time as a simple quantity form the basis of our understanding of many scientific disciplines, yet the debate rages on: why does there seem to be a direction to time, an arrow of time pointing from past to future? In this authoritative and accessible Sunday Times bestseller, physical chemist Dr Peter Coveney and award-winning science journalist Dr Roger Highfield demonstrate that the common sense view of time agrees with the most advanced scientific theory. Time does in fact move like an arrow, shooting forward into what is genuinely unknown, leaving the past immutably behind. The authors make their case by exploring three centuries of science, offering bold reinterpretations of Newton's mechanics, Einstein's special and general theories of relativity, quantum mechanics, and advancing the insights of chaos theory. In their voyage through science the authors link apparently irreconcilable subjects, from Einstein's obsession with causality to chaos theory, from Marvell's winged chariot to that Monday morning feeling. Finally, drawing together the various interpretations of time, they describe a novel way to give it a sense of direction. And they call for a new fundamental theory to take account of the Arrow of Time. Foreword by Ilya Prigogine, Nobel laureate.

The History of Archery Independently Published

A completely new way of thinking about traditional archery takes shape in the pages of this book. The emphasis throughout is on the basic principles that govern the design, performance, and use of all forms of traditional bows and arrows. Here are discussed both the practical as well as the technical considerations behind the choices faced by every archer in selecting and using the tools of the sport. The design of the bow-and the arrow-are analyzed in terms of the underlying principles that determine their performance and use. The concept of an ideal bow and an ideal arrow are introduced as useful ways of thinking about the limitations of real bows and arrows. The important parameters of the bow are identified and a straightforward way of measuring them is described. The effect of draw weight on performance is examined with a view to injecting some realism into the perennial question of how much draw weight is enough. A separate chapter is devoted to the problem of distance shooting and another to clearing up the confusion surrounding the topic of arrow penetration. The effects of variations in arrow straightness, spine, and weight are analyzed to answer the question of when better arrows finally become good enough. The techniques of shooting and an in-depth discussion of the causes, and cures, of target panic are presented. And finally a separate chapter is devoted to a primer on the analytical design of bow limbs. This is a book for all serious archers-and bowyers alike-whether their interest is bow hunting, field and target archery, or bow design, and whether they are newcomers to the sport or experienced archers. The chapters on shooting are among the best ever written and alone make the book invaluable. There is something here to enhance the understanding and practice of archery for all who love and shoot traditional bows and arrows.

NATIONAL BESTSELLER As King Robert the Bruce of Scotland plots to retake his English-occupied castles, he needs the stealth and skill of his elite soldiers, the Highland Guard. Fearless and indomitable, no men are more loyal to their king, or more cherished by the women they love. The talents of legendary marksman Gregor "Arrow" MacGregor are crucial now, as Bruce moves to reclaim his Scottish holdings. Gregor is considered the most handsome man in Scotland, and his fame as an archer is rivaled only by his reputation with the lasses as a heartbreaker. But when his infamous face is exposed during a covert mission, Gregor is forced to lie low. He returns home only to find a new battle waiting: a daring game of seduction involving his now very grown-up and very desirable ward, Cate of Lochmaben. A born fighter, Cate was clinging to life when Gregor rescued her after a vicious English raid on her village left her mother dead. But five years later, the once scrappy orphan Gregor took under his protection has become a woman. Brave, strong, and skilled in warfare, Cate is determined to lay claim to the warrior who refuses to be trapped. The heat in his eyes tells her she has his attention . . . and his desire. But will Gregor allow his heart to surrender before danger finds them, and the truth of Cate's identity is revealed?
