 'Imaging for Students' provides a comprehensive introduction to all aspects of diagnostic and interventional imaging, written specifically for medical students and junior doctors. Starting with a clear explanation of how each imaging modality actually works, the reader is then guided step-by-step through the range of imaging modalities available, with important information included on the hazards and risks associated with medical imaging. The work includes a detailed guide to the interpretation of plain films of the chest and abdomen, before providing a system-based

tutorial covering the most common conditions that require imaging for diagnostic confirmation. Using evidence-based studies and guidelines, 'Imaging For Students' takes a logical approach to the investigation of clinical scenarios, where possible indicating the 'best first test'. 'Imaging For Students' also gives an overview of medical imaging procedures, emphasizing the importance of patient preparation and post-procedure observation. With its comprehensive and thoughtful coverage, 'Imaging For Students' presents students with everything they need to know for a clear understanding of the advantages, disadvantages, and possible side effects of the imaging modalities available.

English for Specific Purposes offers the teacher a new perspective on this important field. The main concern is effective learning and how this can best be achieved in ESP courses. The authors discuss the evolution of ESP and its position today; the role of the ESP teacher; course design; syllabuses; materials; teaching methods, and evaluation procedures. It will be of interest to all teachers who are concerned with ESP. Those who are new to the field will find it a thorough, practical introduction while those with more extensive experience will find its approach both stimulating and innovative.

Under the auspices of the 1938 Flood Control Act, the U.S. Corps of Engineers began to pursue an aggressive dam-building campaign. A grateful public generally lauded their efforts, but when they turned their attention to Arkansas's Buffalo River, the vocal opposition their proposed projects generated dumbfounded them. Never before had anyone challenged the Corps's assumption that damming a river was an improvement. Led by Neil Compton, a physician in Bentonville, Arkansas, a group of area conservationists formed the Ozark Society to join the battle for the Buffalo. This book is the account of this decade-long struggle that drew in such political figures as supreme court justice William O. Douglas, Senator J. William Fulbright, and Governor Orval Faubus. The battle finally ended in 1972 with President Richard Nixon's designation of the Buffalo as the first national river. Drawing on hundreds of personal letters,

photographs, maps, newspaper articles, and reminiscences, Compton's lively book details the trials, gains, setbacks, and ultimate triumph in one of the first major skirmishes between environmentalists and developers.

Game of Thrones is a phenomenon. As Carlyne Larrington reveals in this essential companion to George R R Martin's fantasy novels and the HBO mega-hit series based on them the show is the epitome of water-cooler TV. It is the subject of intense debate in national newspapers; by PhD students asking why Westeros has yet to see an industrial revolution, or whether astronomy explains the continent's climatic problems and unpredictable solstices ('winter is coming'); and by bloggers and cultural commentators contesting the series' startling portrayals of power, sex and gender. Yet no book has divulged how George R R Martin constructed his remarkable universe out of the Middle Ages. Discussing novels and TV series alike, Larrington explores among other topics: sigils, giants, dragons and direwolves in medieval texts; ravens, old gods and the Weirwood in Norse myth; and a gothic, exotic orient in the eastern continent, Essos. From the White Walkers to the Red Woman, from Casterly Rock to the Shivering Sea, this is an indispensable guide to the twenty-first century's most important fantasy creation.
