### MAXWELL MADDEN

*Problems in Modern Latin American History* Harper Collins

This volume explores the complex relations of texts and their contextualising elements, drawing particularly on the notions of paratext, metadiscourse and framing. It aims at developing a more comprehensive historical understanding of these phenomena, covering a wide time span, from Old English to the 20th century, in a range of historical genres and contexts of text production, mediation and consumption. However, more fundamentally, it also seeks to expand our conception of text and the communicative 'spaces' surrounding them, and probe the explanatory potential of the concepts under investigation. Though essentially rooted in historical linguistics and philology, the twelve contributions of this volume are also open to insights from other disciplines (such as medieval manuscript studies and bibliography, but also information studies, marketing studies, and even digital electronics), and thus tackle opportunities and challenges in researching the dynamics of text and framing phenomena in a historical perspective.

The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

*A History of Latin America to 1825* Routledge

Drawing on New Testament studies and recent scholarship on the expansion of the Christian church, Gary B. Ferngren presents a comprehensive historical account of medicine and medical philanthropy in the first five centuries of the Christian era. Ferngren first describes how early Christians understood disease. He examines the relationship of early Christian medicine to the natural and supernatural modes of healing found in the Bible. Despite biblical accounts of demonic possession and miraculous healing, Ferngren argues that early Christians generally accepted naturalistic assumptions about disease and cared for the sick with medical knowledge gleaned from the Greeks and Romans. Ferngren also explores the origins of medical philanthropy in the early Christian church. Rather than viewing illness as punishment for sins, early Christians believed that the sick deserved both medical assistance and compassion. Even as they were being persecuted, Christians cared for the sick within and outside of their community. Their long experience in medical charity led to the creation of the first hospitals, a singular Christian contribution to health care. "A succinct, thoughtful, well-written, and carefully argued assessment of Christian involvement with medical matters in the first five centuries of the common era . . . It is to Ferngren's credit that he has opened questions and explored them so astutely. This fine work looks forward as well as backward; it invites fuller reflection of the many senses in which medicine and religion intersect and merits wide readership."—*Journal of the American Medical Association* "In this superb work of historical and conceptual scholarship, Ferngren unfolds for the reader a cultural milieu of healing practices during the early centuries of Christianity."—*Perspectives on Science and Christian Faith* "Readable and

widely researched . . . an important book for mission studies and American Catholic movements, the book posits the question of what can take its place in today's challenging religious culture."—*Missiology: An International Review* Gary B. Ferngren is a professor of history at Oregon State University and a professor of the history of medicine at First Moscow State Medical University. He is the author of *Medicine and Religion: A Historical Introduction* and the editor of *Science and Religion: A Historical Introduction*.
