BRAY ISRAEL

Terrorism, the Worker and the City Rowman & Littlefield

Ashwin Rao is smart, funny, and perceptive, an Indian psychologist who is gifted at turning the fragments of his patients' lives into stories that help them heal. In 2004, almost twenty years after the fatal bombing of an Air India flight from Vancouver, two suspects finally are on trial for the crime. Ashwin decides to return to Canada, where he was trained, in order to interview the surviving families. A study of comparative grief, he calls it, pretending to keep his professional distance. Soon he is deeply embroiled in the lives of one extended Canadian family, whose members have staggered on in very different ways since the bombing, carrying their heartbreak and fear mostly in silence. Until we blindingly realise that he too has a secret.

Death and Deliverance Paladin Communications

There are many unusual stories of persons seeing the future, and some who have seen the past. Some stories seem to show that persons have actually visited the past and interacted with the people they met. I've had many paranormal experiences myself and visions of the future which I wrote about in two of my own books. I'm also an Engineer and think this gives me a pretty unique perspective about these phenomena. In this book you will read about many different researched cases of people visiting both the past and the future. From the evidence, this seems to be a much more common occurrence than was previously thought. There is also a chapter on theories of how these phenomena might exist. That these might be a type of paranormal experience and/or involve existing time warps. The world is truly much stranger than we can even imagine. I hope you enjoy these stories and they give you lots of food for thought.

Flight to Heaven Lulu.com

Vehicles, their infrastructures, and the environments they traverse are fundamental to the movement of migrants and states' attempts to govern them. This volume's contributors use the concept of viapolitics to name and foreground this contested entanglement and examine the politics of migration and bordering across a range of sites. They show how these elements constitute a key site of knowledge and struggle in migratory processes and offer a privileged vantage point from which to interrogate practices of mobility and systems of control in their deeper histories and wider geographic connections. This transdisciplinary group of scholars explores a set of empirically rich and diverse cases: from the Spanish and European authorities' attempts to control migrants' entire trajectories to infrastructures of escort of Indonesian labor migrants; from deportation train cars in the 1920s United States to contemporary stowaways at sea; from illegalized migrants walking across treacherous Alpine mountain passes to aerial geographies of deportation. Throughout, Viapolitics interrogates anew the phenomenon called "migration," questioning how different forms of contentious mobility are experienced, policed, and contested. Contributors. Ethan Blue, Maribel Casas-Cortes, Julie Y. Chu, Sebastian Cobarrubias, Glenda Garelli, Charles Heller, Sabine Hess, Bernd Kasperek, Clara Lecadet, Johan Lindquist, Renisa Mawani, Lorenzo Pezzani, Ranabir Samaddar, Amaha Senu, Martina Tazzioli, William Walters

Flight 93 John Wiley & Sons

Soon after watching the twin towers falling in New York, some of those with business responsibilities were already asking themselves whether people would be willing to work in tall buildings ever again. Is work too risky? How can people be expected to attend work in what might now be seen as precarious and vulnerable workplaces and cities? Although, thankfully, large scale terrorist attacks are infrequent, the world's cities, and the businesses to which they are home, have been put on notice that it can come to any place at any time. In *Terrorism, the Worker and the City*, Luke Howie considers what steps managers and employees can and should take to protect their businesses from such an amorphous and indefinable threat. Deftly combining theoretical insight with empirical research, he reveals how, despite an appearance of 'business as usual', fear, anxiety, and suspicion permeate workplaces, even in cities that may not be at the top of any terrorist group's target list. Using the Australian city of Melbourne, a cosmopolitan city and major business centre with nearly four million people, as a metaphor for other such cities around the world, Dr Howie's research has uncovered that even where they don't perceive a high level threat, business managers who might face having to account for themselves to some post event Inquiry have taken action in consequence of the situation. Often, that action amounts to the introduction of what can be described as 'Simulated Security'. This cannot ever provide certain protection from terrorist attack, but it may be the best we can reasonably do. There is also evidence that it can be effective in terms of providing the reassurance to counter the terrorist objective of disrupting normal life through fear. With its rigorous research compared with other more speculative works on this subject, *Terrorism, the Worker and the City* will appeal to city and business leaders and managers, and security professionals, as well as those in governmental and academic research communities, for all of whom terrorism is now an ever present concern.

Death of the Falcon CQ Press

One of the world's most erudite and entertaining film critics on the state of cinema in the post-digital-and post-9/11-age. This witty and allusive book, in the style of classic film theorists/critics like Andr Bazin and Siegfried Kracauer, includes considerations of global cinema's most important figures and films, from Lars von Trier and Jia Zhangke to WALL-E, Avatar and Inception.

The Only Plane in the Sky Routledge

Dramatic, compelling, downright unbelievable accounts of the Coast Guard's often unsung heros.

United States and Asia at War: A Cultural Approach Routledge

If you met Ron Carlson, CEO of a Chicago-based architectural firm, you wouldn't necessarily think of him as the daredevil type. But Ron's life has been a series of death-defying exploits. Into the Unknown: True Stories of a Pilot Cheating Death chronicles a few of Ron's most brazen endeavors, from flying to the high Arctic and being stalked by polar bears to bailing out of an old World War II bomber before it crashes. Ron undertakes the adventures in these tales to satisfy his unrelenting curiosity. He survives them due to his ability to plan for every possible contingency. Each narrow escape reveals valuable lessons about navigating our lives—and daring to live our dreams.

Editorials on File Bethany House

All his life Test Pilot Scott Crossfield has carried on a love affair with airplanes. As a child he learned secretly how to fly, and the unyielding ambition to become a superb aviator spurred him to overcome a serious childhood disease. Working for the NACA (National Advisory Committee for Aeronautics), Crossfield achieved national renown testing the rocket-powered planes, X-1 and

Skyrocket, taking them to amazing heights where "man had a new view of his life and the world." He has logged more rocket plane flights than most of the chief test pilots combined. Written in the tradition of Saint-Exupéry and Lindbergh, Scott Crossfield's inspiring autobiography is a testament to the adventure and achievement of the flight pioneers who dare to live beyond the clouds. Why is "death the handmaiden of the pilot" and how does it feel to face her fifteen miles above the ground? What can a pilot do when fear and panic overtake him? What is it like to be the first man to fly at twice the speed of sound? These are some of the questions Crossfield answers as he explains why he was prepared to devote so much of his time, his dreams, and his aspirations to an experimental plane called the X-15. Always Another Dawn tells of the birth of this plane; the daring of the men who painstakingly designed and built her, counting every extra pound a danger and creating innovations unprecedented in flight history. Here is the courage of the men who flew her, their every take-off a hazardous journey into the unknown. This book is the thrilling story of man's first faltering steps into space, of the great experiment and the great pilot who "set man on his path toward the stars."

A Season of Grief Createspace Independent Publishing Platform

Featuring a new code of ethics for journalists and essays by 14 journalism thought leaders and practitioners, *The New Ethics of Journalism: Principles for the 21st Century*, by Kelly McBride and Tom Rosenstiel, examines the new pressures brought to bear on journalism by technology and changing audience habits. It offers a new framework for making critical moral choices, as well as case studies that reinforce the concepts and principles rising to prominence in 21st century communication. The book addresses the unique problems facing journalism today, including how we arrive at truth in an era of abundant and unverified information; the evolution of new business models and partnerships; the presence of journalists on independent social media platforms; the role of diversity; the meaning of stories; the value of images; and the role of community in the production of journalism.

An Angel in the Cockpit Pickle Partners Publishing

This text examines the Pacific War, the Korean War and the Vietnam War, from the perspective of those who fought the wars and lived through them. The relationship between history and memory informs the book, and each war is relocated in the historical and cultural experiences of Asian countries.

Real Time Travel Stories From A Psychic Engineer Affirm Press

For the first time, a seasoned business executive and avid golfer combines these two passions to explore what makes for top performance in each field. Management consultant David K. Hurst explores compelling links relating the two activities to explain clearly what every manager who plays golf may feel only intuitively: that there is a deep systemic connection between them. For on the tee, as in the boardroom, a player can't just hit and hope -- he or she must continually think ahead, contemplate multiple scenarios, and consider the downside of every decision. And then everything depends on execution. In *Learning from the Links*, Hurst clarifies muddled thinking in both management and golf: he deals squarely with the challenge of implementing a game plan and seeing it through. Hurst takes to task the current "head-down" instructional model used to teach golf and management. He addresses the huge gulf between knowing what to do in a given situation and knowing how to do it. This chasm is an ever-present hazard both on the course and in an organization: it keeps people from solving their problems and achieving their goals. By examining golfers' and managers' struggles for improvement, Hurst shows us why complex systems are so hard to change and how to set about changing them -- systematically. Using the latest thinking from fields as diverse as neuroscience, artificial intelligence, art, and anthropology, Hurst's primary purpose is to help his readers make sense of their own experience -- to help them learn more effectively. His practical advice is profusely illustrated with examples from both golf and management, allowing the reader to move back and forth between his or her experiences in both activities. Part business management book, part strategy guide, these are more than just lessons for one's game or one's office: these are lessons for life.

The New Ethics of Journalism Victory Publishing Company Incorporated

In the aftermath of the terrorist attacks of September 11, 2001, some of New York's leading authors of fiction, poetry, and dramatic prose reflect on the event.

Learning From the Links Rowman & Littlefield

Head down the rabbit hole and feed your fascination for conspiracy and controversy. Conspiracy theories-they're influential and spread to sometimes irrational extremes. Why do people cling to conspiracy theories so powerfully? Is there a way to separate the possible from the impossible? Yes. Enter: Debunked. Conspiracy theories pop up surrounding every major national and global event-some are possible, some are not. TikTok influencer and psychology professor Casey Lytle will teach you how to be an intelligent consumer of "alternative" theories. Lytle's trademark "project management approach" will help you discern possible from impossible in the popular and controversial theories surrounding 10 national and global events. 9/11-No fewer than 10 alternative theories have gained traction. But let's evaluate: Did the Twin Towers really look like a controlled demolition? Would jet fuel have to melt steel for the towers to collapse? What would it take in hours and people to secretly plant enough explosives to bring the buildings down without being discovered, and without being set off by the impact and fires from the planes? All this and more in Chapter 7. COVID-19-The vaccine implants a microchip used to track people; the fatality rate has been wildly inflated; oh, and Bill Gates is not only responsible for the virus but also the head of a plot to use the virus as population control. School shooters-why are they so easy to explain, but so hard to predict? In what ways has the profile of a school shooter changed over the last 25 years, and what has caused those changes? Are school shootings a new phenomenon, or does the media simply make us more aware of them when they happen? The chapter will cover Sandy Hook conspiracy theories, as well as the psychology behind "truthers."

110 Stories Rowman & Littlefield

NEW YORK TIMES BESTSELLER "This is history at its most immediate and moving...A marvelous and memorable book." —Jon Meacham "Remarkable...A priceless civic gift...On page after page, a reader will encounter words that startle, or make him angry, or heartbroken." —The Wall Street Journal "Visceral...I repeatedly cried...This book captures the emotions and unspooling horror of the day." —NPR "Had me turning each page with my heart in my throat...There's been a lot written about 9/11, but nothing like this. I urge you to read it." —Katie Couric The first comprehensive oral history of September 11, 2001—a panoramic narrative woven from the voices of Americans on the front lines of an unprecedented national trauma. Over the past eighteen years, monumental literature has

been published about 9/11, from Lawrence Wright's *The Looming Tower*, which traced the rise of al-Qaeda, to The 9/11 Commission Report, the government's definitive factual retrospective of the attacks. But one perspective has been missing up to this point—a 360-degree account of the day told through the voices of the people who experienced it. Now, in *The Only Plane in the Sky*, award-winning journalist and bestselling historian Garrett Graff tells the story of the day as it was lived—in the words of those who lived it. Drawing on never-before-published transcripts, recently declassified documents, original interviews, and oral histories from nearly five hundred government officials, first responders, witnesses, survivors, friends, and family members, Graff paints the most vivid and human portrait of the September 11 attacks yet. Beginning in the predawn hours of airports in the Northeast, we meet the ticket agents who unknowingly usher terrorists onto their flights, and the flight attendants inside the hijacked planes. In New York City, first responders confront a scene of unimaginable horror at the Twin Towers. From a secret bunker underneath the White House, officials watch for incoming planes on radar. Aboard the small number of unarmed fighter jets in the air, pilots make a pact to fly into a hijacked airliner if necessary to bring it down. In the skies above Pennsylvania, civilians aboard United Flight 93 make the ultimate sacrifice in their place. Then, as the day moves forward and flights are grounded nationwide, Air Force One circles the country alone, its passengers isolated and afraid. More than simply a collection of eyewitness testimonies, *The Only Plane in the Sky* is the historic narrative of how ordinary people grappled with extraordinary events in real time: the father and son working in the North Tower, caught on different ends of the impact zone; the firefighter searching for his wife who works at the World Trade Center; the operator of in-flight telephone calls who promises to share a passenger's last words with his family; the beloved FDNY chaplain who bravely performs last rites for the dying, losing his own life when the Towers collapse; and the generals at the Pentagon who break down and weep when they are barred from rushing into the burning building to try to rescue their colleagues. At once a powerful tribute to the courage of everyday Americans and an essential addition to the literature of 9/11, *The Only Plane in the Sky* weaves together the unforgettable personal experiences of the men and women who found themselves caught at the center of an unprecedented human drama. The result is a unique, profound, and searing exploration of humanity on a day that changed the course of history, and all of our lives.

Film After Film MacFarlane Walter & Ross

This fresh look at Hollywood's "Queen of Screwball," Carole Lombard, presents a first-ever examination of the events that led to the shocking flight mishap that took her life on the side of a Nevada mountain in 1942. It also provides a day-by-day account of the struggles of Lombard's husband, Clark Gable, and other family, friends, and fans to cope with the tragedy. In effect, having just completed the first sale of war bonds and stamps in the nation following its entry into World War II, Lombard became the first Hollywood star to sacrifice her life in the War. The War Department offered Gable a funeral service with full military honors, but he refused it, knowing that his wife would not approve of such spectacle. Based on extensive research rather than gossip, this investigation further explores the lives of the 21 others on the plane, including 15 members of the U.S. Army Air Corps, and addresses one of the most enduring mysteries of World War II. On a clear night full of stars, with TWA's most experienced pilot at the controls of a 10-month-old aircraft under the power of two fully functioning engines, why did the flight crash into that Nevada mountainside? This gripping page-turner presents the story of the people on the plane, the friends and families left behind, and the heroic first responders who struggled up a mountain hoping to perform a miracle rescue. It is a story of accomplishment, bravery, sacrifice, and loss.

Science Fiction Magazine Story Index, 1926-1995 Rowman & Littlefield

Relates the story of a Canadian transport aircraft that crash-landed on Ellesmere Island, and tells how passengers fought against the elements to survive the ordeal

Drama in the Air Wheatmark, Inc.

"When asked about the death toll from the September 11th attacks, New York City Mayor Rudy Giuliani stated simply and eloquently that the number would likely be "more than any of us can bear." He was right, of course. Yet often obscured in that inconceivable number is the fact that among those who died, as well as those who lived and continue to live, were many thousands of aviation professionals with names, families, lives, and individual experiences that are an important part of the 9/11 story. Some five years later, these stories are being told for the first time in *Reclaiming the Sky*. In the pages of this book, you will meet some of the people whose hard work propels a critical social and economic force -- the aviation industry -- and who on the morning of September 11th, were suddenly thrust into front-line positions in the battle to put our nation back on its feet. For many of these men and women and their families, the pain and after-effects of 9/11 are exceptionally acute, but their stories will serve as touchpoints for the thousands of people whose journey to closure is still ongoing. This powerful and ultimately uplifting book not only honors the

heroes of September 11th, it also offers common ground to those in search of meaning and purpose in a changed world -- both in and outside of the air travel industry -- and gives Americans in all walks of life something they still seek five years after 9/11: the courage and strength to move forward."

Fireball Penguin

There have been many books about the Women Airforce Service Pilots of WWII (WASP); however, hardly any about the 38 women who lost their lives while flying for the Army Air Corps. This book tells their story. When the war began, the men called these women "girls." They didn't believe this grand experiment could ever work—that the women of America—sisters and wives—could fly Army airplanes all over the country. Yet, these women were patriots and all they asked was a chance to do something that would help win the war. Of the 1,074 who flew as a WASP, 38 young women never came back—never had a future, and never heard their country say, "Thank you." Here, we remember them.

Beating the Global Odds Bridge Logos Foundation

The Answer to Global Overload Contending with the 24/7 news cycle and an endless barrage of choices and information has stymied leadership and decision-making strategies among those at the top. But we all know, this is not a just a problem for the elite. The broad-based reaction to this chaotic, unmanageable assault has been to retrench, and to focus on immediate, controllable decisions. In the process, we lose sight of the horizon. More dangerous still, is the shift we've seen from value creation to wealth creation, where information technology 1.0 has enabled a transaction-based society in which the "deal" is more important than the value it drives or the relationships it is based on. On our current path, the odds of a better future are slim. What we need is a new value proposition. *Beating the Global Odds* is the answer to the dangers of too much of a good thing. There's no going back, but there is the opportunity to set things right. In this book, Paul A. Laudicina, Managing Partner and Chairman of the Board of global consulting firm A.T. Kearney, provides a fast-paced and engaging tour of how we got to this point and what we can do about it. Drawing on examples from everything from world history and current media to anecdotes from his vast network of CEOs and the world's most innovative thinkers, Laudicina helps bring our world of seemingly fuzzy and disconnected pixels into sharp focus. The result is a compelling case for change and call to action—not only for global leaders but also for everyone who struggles with the question of how we can inspire and seize a better future... how we can beat the global odds.

Fakes: An Anthology of Pseudo-Interviews, Faux-Lectures, Quasi-Letters, "Found" Texts, and Other Fraudulent Artifacts Robson Books Limited

Above all, Phyllis Langton's memoir, *Last Flight Out: Living, Loving & Leaving*, is a passionate love story, one that deepens as she and her husband George Thomas live their way into the experience of ALS, its unremitting losses and its surprising gifts, with dignity, keen humor, a fighter pilot's courage and a nurse's unsentimental pragmatism. "I know what's going to be on my death certificate. That's more than you can say," George tells her after receiving his diagnosis. How they are going to live the time that remains to them as a couple is also not in question, for they are equally committed to savoring every minute, respecting George Thomas's choices about what makes for a meaningful life, a meaningful death. Supporting her husband's wishes is a moral as well as emotional choice on Langton's part, and definitely not always an easy one. As a medical sociologist, she invites her readers into an open discussion of some of these choices through a thoughtful discussion guide. "Phyllis Langton has had as illustrious a career as anyone in academia, but she has taken infinite pains now to write a different kind of book. Her story of her husband's life with and death from ALS (Lou Gehrig's disease) yields many a valuable lesson. . . . Here love and mortality, laughter and sorrow are all but inseparable, and their inseparability may help lessen a reader's fear of death and dying. Anyone who enjoys a deeply moving story will want to read this wondrous, indispensable book, and anybody who faces adversity, that is to say, everybody will need to read it," Jeffery Paine, author of *Father India*, *Re-enchantment*, *Adventures with the Buddha*, and *Tales of Wonder*. "Who would have thought that disease can be a page-turner? But Phyllis Langton's bittersweet memoir of her fighter-pilot husband's last years shows that a good marriage can be as joyous in sickness as it is in health," Mark Weston, author of *Giants of Japan*. "In my 28 years as a healthcare chaplain I have observed the journey toward death Phyllis Langton portrays in *Last Flight Out*. But I am a professional who only sees those brief moments I am at the hospital or nursing home bedside or visiting in someone's home. Langton invites us into her life with her husband George as he moves through increasing disability to his final breaths. It is moving and, in my view, honest," Chaplain Hank Dunn, author of *Hard Choices for Loving People*. "I couldn't put *Last Flight Out* down. . . . What an incredible message to read especially with a disease that takes and takes," Sharon J. Matland, R.N., M.B.A.--V.P. Patient Services, ALS Association Phyllis A. Langton, Ph.D., R.N., Professor Emerita, Sociology, George Washington University, is the author of numerous scholarly articles and books. *Last Flight Out* is her first memoir.
