### ESTHER BREWER

**Shooting Star** Overlook Books

Ein kleiner Fuchs liegt verlassen im Gebüsch. Eine fremde Füchsin entdeckt den äfoundling foxä und beschliesst, ihn mit zu ihren eigenen 3 Jungen zu nehmen. Ein folgenschwerer Entschluss. Der berühmte Klassiker wurde in einfaches Englisch übertragen.

*The Foundling Fox* Routledge

When Anna moves to his town from Poland, ten-year-old Ben, an ordinary boy not very interested in love, discovers that having someone to love is confusing, difficult, and wonderful.

**Songs, Rhymes and Poems** University of Chicago Press

Songs, Rhymes and Poems ist eine Sammlung überwiegend authentischer Lieder, Reime und Gedichte für das Englischlernen in der Grundschule. Die Seiten sind als Kopiervorlagen angelegt. Praktische Unterrichtsvorschläge und viele Ideen zum fächerübergreifenden Umgang mit den Texten und Liedern erleichtern die Unterrichtsvorbereitung. Einige Lieder werden durch Begleitsätze für das Orff-Instrumentarium ergänzt, einfache Kochrezepte ermöglichen ein Lernen mit allen Sinnen. Die ebenfalls enthaltene Audio-CD wurde von Muttersprachlern aufgenommen. Sie bietet Texte und Lieder in Original- und Playbackfassung. (Quelle: Homepage des Verlags).

**The Boy and the Whale** Puffin HC

All too often in contemporary discourse, we hear about science overstepping its proper limits—about its brazenness, arrogance, and intellectual imperialism. The problem, critics say, is scientism: the privileging of science over all other ways of knowing. Science, they warn, cannot do or explain

everything, no matter what some enthusiasts believe. In *Science Unlimited?*, noted philosophers of science Maarten Boudry and Massimo Pigliucci gather a diverse group of scientists, science communicators, and philosophers of science to explore the limits of science and this alleged threat of scientism. In this wide-ranging collection, contributors ask whether the term scientism in fact (or in belief) captures an interesting and important intellectual stance, and whether it is something that should alarm us. Is scientism a well-developed position about the superiority of science over all other modes of human inquiry? Or is it more a form of excessive confidence, an uncritical attitude of glowing admiration? What, if any, are its dangers? Are fears that science will marginalize the humanities and eradicate the human subject—that it will explain away emotion, free will, consciousness, and the mystery of existence—justified? Does science need to be reined in before it drives out all other disciplines and ways of knowing? Both rigorous and balanced, *Science Unlimited?* interrogates our use of a term that is now all but ubiquitous in a wide variety of contexts and debates. Bringing together scientists and philosophers, both friends and foes of scientism, it is a conversation long overdue.

*Philosophy of Education*

Never before published, this book features George Herbert Mead's illuminating lectures on the Philosophy of Education at the University of Chicago during the early 20th century. These lectures provide unique insight into Mead's educational thought and reveal how his early psychological writings on the social character of meaning and the social origin of reflective consciousness was central in the development of what Mead referred to as his social conception of education. The introduction to the book provides an overview of Mead's educational thought and places it against the wider social, intellectual, and historical background of modern educational concepts.

*Science Unlimited?*

Summary: The story of a beached whale and the efforts of a boy and a man to save it.

*Ben Loves Anna*
