In this new edition, author Steven J. Cann once again enlivens the topic of United States administrative law through the use of recent and "classic" legal cases to make it accessible and interesting to students. *Administrative Law, Fourth Edition* is an engaging casebook that presents a unique problem-solving framework that

contrasts democracy with the administrative state. This novel approach places the often complex subject matter of U.S. administrative law into a more comprehensible context. The Fourth Edition has been completely updated and revised and includes many new cases to reflect changes in the law since the year 2000.

Administrative Law Series Aspen Publishing

The 7th Edition of this popular casebook continues its focus on real problems and real administrative practice. Problems serve as the primary pedagogical tool, including problems that do not involve courts. The book raises ethical issues distinctive to government lawyers, requires students to parse statutory and regulatory text in solving problems, and

orients the course around administrative law practice rather than theory. While theory is not ignored, the book focuses on reality-based problems that put theory in context. It includes the most recent important Supreme Court and Courts of Appeals cases, including *West Virginia v. EPA*, *Kisor v. Wilkie*, *Seila Law v. CFPB*, *United States v. Arthrex*, and *Jarkesy v. SEC*. The 7th Edition continues to be an Interactive Casebook, featuring a novel visual display and layout using text boxes, color/border segregated feature sections for hypotheticals, reference to scholarly debates, useful information for students, and provocative questions. A major distinguishing feature of the book is its inclusion of an accompanying electronic version with the extensive hyperlinking

to Westlaw versions of legal materials, Black's Law Dictionary definitions, supplementary online resources and more.

Through thoughtful organization, careful material selection, and hundreds of practice questions, *Administrative Law: A Lifecycle Approach*, by Dean Jamelle C. Sharpe, trains students to thoroughly understand the law and theory underpinning the modern administrative state. At its core, administrative law is a process-driven course. Nevertheless, traditional casebooks are organized around legal concepts and doctrines rather than the basic stages of administrative decision-making. This casebook improves on the traditional model by following the major steps in the administrative process, thereby providing students with ample grounding in the law and practice governing it. In addition to featuring seminal administrative law decisions,

Administrative Law: A Lifecycle Approach incorporates a variety of agency-oriented materials—government reports, charts, diagrams, orders—that give students a fuller sense of how the administrative state’s organization and operations. These carefully edited materials model how skilled jurists and administrative lawyers go about their work, how legal problems with that work arise, and how administrative, judicial, and political processes have developed to address them. Critically, this casebook also provides numerous opportunities for guided review, synthesis, analysis, and application of salient legal concepts to facilitate student learning. Dozens of questions, as many or more than any other casebook on the market, place students in the position of lawyers

tasked with navigating the administrative landscape. New to the Second Edition: Updated cases. Updated developments in regulatory policy and practices. Professors and students will benefit from: In comparison with casebooks that focus almost exclusively on appellate decisions from Article III courts, this book emphasizes the lifecycle of the administrative decision-making process to place the legal doctrines typically covered by the administrative law course in a clearer practical context. Examples of agency work product and descriptions of agency organization and operations are strategically placed throughout the book. The book also provides explanatory introductions to most topics and describes basic and recurring fact

patterns that lawyers encounter when dealing with the issues of administrative law and policy. Most administrative law casebooks are comprised almost entirely of the most unusual or factually complex cases. While there is certainly value in asking students to wrestle with such cases, Administrative Law: A Lifecycle Approach substitutes them for more readily accessible materials of equal or greater instructional value. Where the inclusion of complex cases is unavoidable—as is the case with several seminal decisions— this casebook provides introductory explanations to give students much needed guidance on their meaning and key concepts. Additionally, Administrative Law: A Lifecycle Approach includes other agency-oriented materials—reports,

charts, diagrams, opinions—to give students a fuller, unmediated sense of administrative work product.

Administrative Law: A Lifecycle Approach also takes a different approach to questions. The questions in traditional casebooks typically focus on issues that are tangential to the materials they follow, or pinpoint conceptual knots that academics spend their careers attempting to unravel. Inspired by Bloom’s Taxonomy, the questions in *Administrative Law: A Lifecycle Approach* focus instead on testing, reinforcing, and extending students’ understanding of the administrative law and concepts featured throughout the book. It accordingly provides numerous problems that prompt students to apply what they have learned and to produce the types

of analysis expected of skilled administrative lawyers.
