Internships, Employability and the Search for Decent Work Experience African Minds

Written from a uniquely South African perspective, this book explores the many facets of the employment relationship. These include strategic employment processes, staff maintenance, trade union interactions, public sector labour relations and terminating employment relationships. This well-researched text, adapted from the best-selling South African Human Resource Management:

Theory and Practice (Swanepoel, Erasmus, Van Wyk and Schenk), is rich in theory and applications. It explains the latest developments in structuring learning programmes for public officials, so that they are in line with the South African Qualifications Authority (SAQA), the National Qualifications Framework (NQF) as well as employment equity and affirmative action policies. It further details a workable Human Resource Management strategy for the public sector that includes practices in relation to performance management, appraisal systems, compensation and incentives management, and relevant legislation and regulations. This 2nd edition will be indispensable for all public sector managers, HR specialists, corporate strategists, trade unionists, as well as undergraduate and postgraduate Public Administration and Management students. *OECD Public Governance Reviews Preventing Policy Capture Integrity in Public Decision Making* Oxford University Press

Nurses are often said to be the backbone of health

services, but in South Africa their profession itself is in need of care. This monograph considers the profile, image and status of nursing today and the nature and role of nursing education. A major concern is that, although nursing still attracts many more students than there are places available, the gap between the large numbers who complete their training and the relatively small growth in the professional registers, indicates high attrition rates. The decline in the role of the public sector in the training of nurses is another worrying trend. *Key Principles of Public Sector Reforms* Bloomsbury Publishing

Key Principles of Public Sector Reforms contains case studies from Cameroon, Ghana, Grenada, India, Kenya, Rwanda, St Vincent and the Grenadines, Saint Lucia, Seychelles, South Africa, Tanzania and Trinidad and Tobago on the policy reforms, strategies and methodologies that support national priorities and greater policy coherence for sustained development and growth. *The Family and Medical Leave Act* OECD Publishing

development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning. *Twenty Years of Education Transformation in*

This report exposes how "policy capture", where public decisions over policies are consistently or repeatedly directed away from the public interest towards a specific interest, can exacerbate inequalities and undermine democratic values, economic growth and trust in government. *2009 Information and Communications for Development* Lulu.com
Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department

operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years. Media Piracy in Emerging Economies Juta and Company Ltd
Over the last decade, information and communication technologies (ICT) have been increasingly used to achieve development goals. Developing countries, including poorer ones, have enjoyed rapid technological progress to help pull millions of people out of poverty. ICTs help transform economic and social activities for firms, governments and citizens. *Information and Communication for Development 2009: Scaling Up Impact*, the second issue of the World

Bank's IC4D series, focuses on the effect of increased access to advanced ICT services and development of a vibrant IT sector on sustaining growth. Human Resource Management OECD Publishing Government compensation and employment policies are important for the efficient delivery of public services which are crucial for the functioning of economies and the general prosperity of societies. On average, spending on the wage bill absorbs around one-fifth of total spending. Cross-country variation in wage spending reflects, in part, national choices about the government's role in priority sectors, as well as variations in the level of economic development and resource constraints.
