Handbook of Research on Education for Participative Citizenship and Global Prosperity

Ediciones Octaedro

Uno de los retos a los que se han enfrentado las políticas educativas ha sido la mejora de la equidad de nuestro sistema educativo. El concepto de equidad se fundamenta en el de igualdad y en él se aplica el principio de justicia social, teniendo en cuenta las necesidades individuales que tiene cada persona y atendiendo a la diversidad, disminuyendo diferencias de cualquier tipo. Por tanto, la equidad se considera un indicador fundamental de la calidad educativa, tal y como lo afirman algunos autores, ambos términos son inseparables y no existe calidad sin equidad. A lo largo de los diferentes capítulos vamos a ir observando que a través de las investigaciones con perspectiva de género y una educación que fomente la igualdad es posible lograr una sociedad más justa. En este libro se recogen una gran variedad de experiencias y estudios sobre el género y la atención a la diversidad mediante metodologías y recursos innovadores que se adaptan a la sociedad cambiante en la que nos encontramos.

Research on history education and historical thinking is becoming increasingly relevant internationally. The need for a renewal of history education is not only justified by the epistemology of history itself, but also by the demand for a methodological change in education in general, making students active protagonists in the construction of their learning and based on the development of competencies. Further study on the potential use of gamification within social studies and humanities education is required to understand its benefits and challenges. Cases on Historical Thinking and Gamification in Social Studies and Humanities Education proposes and analyzes gamification as a pedagogical innovation that can enable the renewal of the teaching and learning process of history, facilitating the active learning of historical thinking concepts while influencing students' conceptions of history as a discipline and as a school subject. Covering key topics such as historical thinking, social sciences, video games, and mobile learning, this reference work is ideal for historians, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

A lo largo de la historia se han ido consolidando una serie de ideas, enfoques, imágenes y costumbres que han contribuido, sin duda, a crear o consolidar un imaginario social y colectivo en torno a la muerte, a educar, en fin, de una forma u otra, en lo que la muerte representa y supone

para las personas. A pesar de la innegable certeza de que la muerte forma parte de la propia vida, la aceptación de aquélla como algo connatural se convierte en una cuestión de enorme complejidad, especialmente en el mundo contemporáneo. A partir de estas consideraciones generales nace el proyecto de elaborar el presente libro que lleva por título *Mors certa, hora incerta*. Tradiciones, representaciones y educación ante la muerte. Los once estudios que componen la obra colectiva que aquí se presenta, y que han sido redactados por profesionales de diversas procedencias (Brasil, España, Italia, y Portugal), constituyen un honesto esfuerzo encaminado a ampliar una línea de investigación poco cultivada hasta el momento: la reflexión en torno a la muerte, desde la perspectiva de su imbricación con tradiciones, ritos y costumbres históricas; de su representación en la literatura, textos y materiales escolares; y, en definitiva, de todo el proceso inherente a la construcción/deconstrucción del tabú de la muerte. El lector tiene pues a su disposición una original aportación a partir de la cual se espera poder abrir nuevas vías de investigación, desde un enfoque de estudio histórico, filosófico y/o educativo, y que tengan en la muerte su leitmotiv, entendida siempre como algo consustancial al ser humano.

La Edad Moderna es un período fundamental para la comprensión del mundo y de la sociedad actual. Sin embargo, en España existe una gran distancia entre los libros de texto y las propuestas curriculares ofrecidas en los centros de educación secundaria y el ritmo que sigue la investigación y la innovación en este campo. Conscientes de esta situación, esta obra colectiva gira en torno a tres ejes vertebradores. En primer lugar, se abordan los contenidos; en segundo lugar, los métodos de enseñanza; y, en tercer lugar, las imágenes y las representaciones, muchas veces estereotipadas, existentes sobre esta época en nuestro presente. Los tres bloques recogen numerosas aportaciones tanto desde planteamientos teóricos y de investigación renovados como de propuestas didácticas claras y útiles con las que se pretende contribuir a avanzar en la enseñanza de la Edad Moderna en la Educación Secundaria.

Apenas se han llevado a cabo investigaciones acerca de la presencia de contenidos socioculturales en libros de texto (LT) para la enseñanza de L2 (Risager y Chapelle, 2013). Este estudio se centra en analizar si el tratamiento dado a dichos contenidos en LT para la enseñanza del español como L2 es diversificado o, en cambio, selectivo y homogéneo. Para ello, se evalúan nueve LT destinados a la enseñanza del español como L2 con fines generales, tres LT por cada nivel de lengua, es decir, inicial, intermedio y avanzado, dirigidos a adultos y jóvenes adultos y publicados entre 2004-2014. Los resultados indican que (a) la amplitud geo-política de la comunidad hispanohablante está presente en algo más de la mitad de los LT, el resto de LT se centra en España y/o cubre dos o más países de habla hispana de forma superficial; (b) la diversidad humana y social del mundo hispanohablante está ausente en los LT analizados, ya que ciertos grupos de edad como los adultos/jóvenes adultos quedan sobrerrepresentados mientras que otros grupos socioeconómicos como la clase trabajadora y las personas de escasos ingresos junto con los entornos rurales están infrarrepresentados o ausentes; (c) los diferentes usos sociolingüísticos del español (nacional-L1, intranacional L2-SL; lengua franca L2-LE/LF) están reflejados en menos de la mitad de los LT, aunque de forma parcial, pues sólo se distingue entre el uso nacional y el intranacional. Se concluye que el enfoque dado a los contenidos socioculturales en estos LT es selectivo y homogéneo, ofreciendo una visión de la cultura meta como si fuera una entidad homogénea, estática y eminentemente urbanita en la que los ciudadanos viven en un mundo idealizado carente de problemas. Asimismo, el nivel y el año de publicación de los LT analizados no ejercen una influencia clara en la presencia de contenidos socioculturales.

Este informe elaborado por Dosdoce.com en colaboración con Bookwire ofrece por segundo año consecutivo una serie de tendencias, indicadores y perspectivas dentro del mercado del libro digital en América Latina y España. El objetivo es ofrecer una herramienta que ayude a editores, libreros, autores, inversionistas, medios de comunicación y público especializado a comprender la transformación que se está produciendo en estos mercados, y las oportunidades de negocio que dicha transformación ofrece a los profesionales en el sector editorial a nivel mundial. En la segunda parte del informe, se analizarán los datos de forma individual en diversos países (Argentina, Brasil Colombia, Chile, Ecuador, España, México, Perú), ya que el desarrollo de la edición y la introducción de la cultura digital siguen ritmos muy desiguales. La tecnología y el libro digital ofrecen un amplio abanico de oportunidades de negocio a la industria del libro en toda Iberoamérica. El aumento en el número de libros electrónicos que se publican en estos países, la creciente importancia de la lectura digital y el progresivo papel de Internet como canal de distribución y comercialización del libro hacen pensar que el desarrollo del mercado digital será una realidad en la mayoría de los países iberoamericanos.

Muros de discriminación y exclusión en la construcción de identidades: la mirada de las ciencias sociales. Houghton Mifflin

Literaturverz. S. 414 - 459

Step-by-Step Medical Coding, 2014 Edition - E-Book IGI Global

Si algo caracteriza a la globalización contemporánea es la apertura, flexibilización y, sobre todo, la hibridación de la que estamos siendo testigos a la hora de construir las identidades. Antes de que la interacción en internet por medio de las redes sociales hiciera acto de presencia, la edificación de

identidades tenía un marcado carácter de proximidad y presencialidad. Los referentes en torno a lo cuales pivotaba la pedagogía identitaria estaban configurados en los círculos de intimidad que se experimentaban en vivo y en directo, que poseían un testimonio claro y personalmente conocido. En este sentido, el plano mediático como eje referencial para esta construcción de la personalidad se percibía desde la lejanía y se caracterizaba por un halo ilusorio.

This edited volume provides state of the art research on developing areas of Spanish in contact with other languages. This manuscript is unique in its broad yet coherent approach to the study of Spanish in bilingual contexts by investigating current issues in the field through well-designed research and innovative analyses. In addition, this book concludes with research on how languages in contact are reflected in individuals in educational settings as well as insights on how to teach bilinguals raised in contact with English and Spanish. This manuscript is divided into three major themes that focus on the overall issues of Spanish in bilingual contexts: 1. The first section, titled "Language and Identity," is composed of four chapters that focus on the connection between language and identity in unique settings. 2. The second section of the manuscript is titled "Language and Dialectal Contact" and is composed of six chapters that analyze the dialectal and linguistic changes in languages in contact in a variety of settings. 3. The final section is titled "Language in Educational Settings" and consists of four chapters with a focus on heritage speakers and second language students of Spanish in different classroom settings as well as abroad. This volume contributes original research in these areas in a way so as to fill valuable gaps in the current knowledge in the field especially in the innovative ways of approaching areas such as teaching heritage learners, understanding diachronic and synchronic dialectal and linguistic changes as well as innovations in language use, and how language contributes to the formation of identity.

Bajo el título "La enseñanza de las matemáticas en España en el siglo XVIII. Descripción y análisis comparado de libros de texto", se ha desarrollado un proyecto de investigación financiado por el Plan Nacional de I+D+i, con la colaboración de investigadores de las universidades de Córdoba, Pontificia de Salamanca, Salamanca y Zaragoza, que forman parte de un grupo de trabajo consolidado en la Sociedad Española de investigación Matemática (SEIEM), de-nominado "Historia de las matemáticas y Educación Matemática" (HMEM). Los objetivos generales de la investigación realizada y, con-siguientemente, la metodología a utilizar, orientan el trabajo hacia la identificación y categorización de los libros de texto utilizados para la enseñanza de las matemáticas publicados en ese siglo según su contenido: aritmética, álgebra, geometría y análisis (cálculo). Todo ello con el fin de ir construyendo un cuerpo de cono-cimientos para provecho de la Didáctica de la matemática que dé cuenta de cómo las matemáticas se han ido difundiendo en la so-ciedad, en lo que se refiere a los aspectos didácticos, curri

Igualdad y calidad educativa: oportunidades y desafíos de la enseñanza. John Wiley & Sons

The United Nations Educational, Scientific, and Cultural Organization (UNESCO) was established in 1945 with twin aims: to rebuild various institutions of the world destroyed by war, and to promote international understanding and peaceful cooperation among nations. Based on empirical and

historical research and with a particular focus on history teaching, international understanding and peace, UNESCO Without Borders offers a new research trajectory for understanding the roles played by UNESCO and other international organizations, as well as the effects of globalization on education. With fifteen chapters by authors from cross-disciplinary and diverse geographical areas, this book assesses the global implications and results of UNESCO's educational policies and practices. It explores how UNESCO-approved guidelines of textbook revisions and peace initiatives were implemented in member-states, illustrating the existence of both national confrontations with the new worldview promoted by UNESCO, as well as the constraints of international cooperation. This book provides an insightful analysis of UNESCO's past challenges and also indicates promising future research directions in support of international understanding for peace and cooperation. As such, it will be of key interest to researchers, postgraduate students, academics in the fields of international and comparative education, education politics and policies, and to those interested in the historical study of international organizations and their global impact. The book will also appeal to practitioners, especially those who conduct research on or work in post-conflict societies.
