This is more than just your run of the mill travel book--this is a guide to fantasy. Whether you want to share elbow room in the playgrounds of the rich and famous, or just dream of an escape to the crystal waters, clear blue skies and white sands of the Caribbean, this guide will help you to transform such lofty dreams into an affordable reality. With colorful insights into the history of each location, Secret Caribbean transports you into the adventure of the past, while beckoning you to realize your fantasies in the here and now. Pleasantly written with a gentle to the eye lay-out, this book will appeal to many readers, not just those planning a getaway to their own secret hideaway. -- Amazon review ... an inspiration! I'm ready to rediscover the Caribbean! -- Penelope Ann Miller Fabulous facts and finds. I can't wait to go on vacation! -- Julie Moran, Entertainment Tonight August's Consultations in Feline Internal Medicine, Volume 7 - E-Book Lippincott Williams & Wilkins My name is Galina St George. I am a Natural Health and Beauty Practitioner. I have been studying natural health and beauty therapies since 1999 and have completed many courses all of which required substantial learning, including doing case studies as part of the courses. While doing my case studies, I noticed that all of us had to create our own consultation forms. Having finished working with the client, it was very easy to misplace and lose the forms since they were just printed pieces of paper. Now, imagine being a practising therapist. Every consultation form contains the information which a therapist should keep just in case there are issues with the client which may involve an insurance company. The other point is that with the tightening of GDPR rules recently, it is now more important than ever to keep all the records safe. Imagine your consultation forms with sensitive and very private information lying all over the place and being found by other people! I do understand that these days many therapists use computers to fill in the consultation forms and keep their clients' records. However, computers can get hacked. This is why I believe that nothing can replace an old-fashioned method of filling out physical consultation forms. So, to help my fellow-therapists and students who are learning to become ones, I have decided to create this book of consultation forms and appointment sheets for Beauty Therapists. You can use it for booking and treating new and existing clients. You can also use these forms for your case studies. I am planning to create similar books for other treatments, such as reflexology, aromatherapy, sports massage and many others. If you already offer or plan to study other therapies, do check my author page!

### Teaching in Post-14 Education and Training Heinemann

Given that touch and touching is so central to everyday embodied existence, why has it been largely ignored by social scientists for so long? What is the place of touch in our mixed spaces of sociality, work, domesticity, recreation, creativity or care? What conceptual resources and academic languages can we reach towards when approaching tactile activities and somatic experiences through the body? How is this tactile landscape gendered? How is touch becoming revisited and revalidated in late capitalism through animal encounters, tourism, massage, beauty treatments, professional medicine, everyday spiritualities or the aseptic touch-free spaces of automated toilets? How is touch placed and valued within scholarly fieldwork and research itself, integral as it is to the production of embodied epistemologies? How is touch involved in such aesthetic experiences as shaping objects in sand, or encountering fleshly bodies within a painting? The goal of this edited collection, Touching Space, Placing Touch is twofold: 1. To further advance theoretical and empirical

understanding of touch in social science scholarship by focussing on the differential social and cultural meanings of touching and the places of touch. 2. To develop a multi-faceted and interdisciplinary explanations of touch in terms of individual and social life, personal experiences and tasks, and their related cultural contexts. The twelve essays in this volume provide a rich combination of theoretical resources, methodological approaches and empirical investigation. Each chapter takes a distinct aspect of touch within a particular spatial context, exploring this through a mixture of sustained empirical work, critical theories of embodiment, philosophical and psychoanalytic approaches to gendered touch and touching, or the relationship between visual and non-visual culture, to articulate something of the variety and variability of touching experiences. The contributors are a mixture of established and emerging researchers within a growing interdisciplinary field of scholarship, yet the volume has a strong thematic identity and therefore represents the formative collection concerning the multiple senses of touch within social science scholarship at this time.
