MORSE TAPIA

Henry C. Miner's American Dramatic Directory for the Season of 1887-'88 Springer Science & Business Media

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

The Dentists Register OECD Publishing

This report examines the use of activation policies in Slovenia to improve labour market outcomes for long-term unemployed people, low-skilled workers, older workers, and workers who were made or are at risk of becoming displaced.

The Medical Register Springer Science & Business Media

Comprising the names and addresses of dental practitioners registered in 1. The United Kingdom list; 2. The Commonwealth list; 3. The Foreign list on ... together with the local list of names so registered and the list of bodies corporate carrying on the

business of dentistry.

Ductor Dubitantium or the Rule of Conscience in all her general measures; serving as a great instrument for the determination of Cases of Conscience

Includes Canada.

Hearings

Neuroscientists from various disciplines have given extraordinary attention to the role of neurotransmitters in the field of neuronal injury. This volume summarizes the original oral and poster contributions which were presented at the symposium, "The Role of Neurotransmitters in Brain Injury," in Key West, Florida, between June 7-9, 1991. This symposium was the official Satellite of Brain-91, the Fifteenth International Symposium on Cerebral Blood Flow and Metabolism, held in Miami the previous week. The two principal goals of the Key West satellite meeting were to document recent progress and, more importantly, to explore future directions for investigative studies of the role of neurotransmitters in brain injury. To achieve these goals we

assembled participants from diverse scientific fields and specialties who brought their collective expertise to discussions on the importance of neurotransmitters in neuronal and vascular injury following brain ischemia, trauma, and epilepsy. Their contributions are reflected in this volume. An important section of this volume is devoted to the role of glutamate and glutamatergic receptors in the development of ischemic neuronal damage. Topics covered include the mechanisms of glutamate and other excitatory amino acids, and the role of underlying injury-induced release different glutamatergic receptors in brain injury, including the NMDA and the non-NMDA receptors. The involvement of other neurotransmitters in the process of ischemic brain injury is well established.

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Inventory of Federal Archives in the States

Floro Ernesto Caroleo and Francesco Pastore This book was conceived to collect selected essays presented at the session on "The Labour Market Impact of the European Union Enlargements. A New Regional Geography of Europe?" of the XXII Conference of the Italian Association of Labour Economics (AIEL). The session aimed to stimulate the debate on the continuity/ fracture of regional patterns of development and employment in old and

new European Union (EU) regions. In particular, we asked whether, and how different, the causes of emergence and the evolution of regional imbalances in the new EU members of Central and Eastern Europe (CEE) are compared to those in the old EU members. Several contributions in this book suggest that a factor common to all backward regions, often neglected in the literature, is to be found in their higher than average degree of structural change or, more precisely, in the hardship they experience in coping with the process of structural change typical of all advanced economies. In the new EU members of CEE, structural change is still a consequence of the continuing process of transition from central planning to a market economy, but also of what Fabrizio et al. (2009) call the "second transition", namely that related to the run-up to and entry in the EU.
