Civil Litigation

Class actions in privacy law are rapidly growing as a legal vehicle for citizens around the world to hold corporations liable for privacy breaches. Current and future developments in these privacy class actions therefore stand to shift the corporate liability landscape for companies that interact with people's personal information. Privacy class actions are at the intersection of civil litigation and data protection. The outcomes of ongoing and future litigation are integral to the evolution of privacy law and data protection law across jurisdictions. Moreover, developments in privacy class actions are raising numerous issues of substantive

law as well as challenges to the established procedures governing class action litigation. This book brings together established scholars in privacy law, data protection law, and collective litigation to offer a detailed perspective on the present and future of collective litigation for privacy claims. Taking a comparative approach, this book incorporates considerations from consumer protection law, procedural law, cross-border litigation, tort law, and data protection law, which are key to understanding the development of privacy class actions. In doing so, it offers an analysis of the novel challenges they pose for courts, regulatory agencies,

and litigators, together with their potential solutions.

Civil Litigation: Pretrial Case Development and Discovery introduces the art and practice of civil litigation. The book begins with a conceptual overview of the litigation process, then takes the reader through the initial client meeting, case planning and management, and the various forms of discovery. The focus is on how to litigate a case, from conducting pre-litigation investigations, to developing a theory of the case, to creating and executing a coherent discovery plan, as well as employing effective discovery techniques. The book contains real case examples that illustrate how effective litigators address the inevitable challenges litigation presents. It is

appropriate for law students and new attorneys, and has all material needed for use in an experiential course on pretrial litigation. A companion online component contains exemplars of typical litigation documents, such as written discovery, deposition outlines, and motions to compel. There are two case problems for students to litigate: a trade secrets dispute and a sexual harassment case, both of which have been vetted and used extensively at the University of Minnesota Law School. A teacher's manual is available. For more information and additional teaching materials, visit the companion site. *Civil Procedure* Elsevier
