This volume explores the various strategies, mechanisms and processes that influence rule of law dynamics

across borders and the national/international divide, illuminating the diverse paths of influence. It shows to what extent, and how, rule of law dynamics have changed

in recent years, especially at the transnational and international levels of government. To explore these interactive dynamics, the volume adopts an interdisciplinary approach, bringing together the normative perspective of law with the analytical perspective of social sciences. The volume contributes to several fields, including studies of rule of law, law and development, and good governance; democratization; globalization studies; neo-institutionalism and

judicial studies; international law, transnational governance and the emerging literature on judicial reforms in authoritarian regimes; and comparative law (Islamic, African, Asian, Latin American legal systems). The Rise of Iskander IGI Global Contemporary economists, when analyzing economic behavior of people, need to use the diversity of research methods and modern ways of discovering knowledge.

The increasing popularity of using economic experiments requires the use of IT tools and quantitative methods that facilitate the analysis of the research material obtained as a result of the experiments and the formulation of correct conclusions. This proceedings volume presents problems in contemporary economics and provides innovative solutions using a range of quantitative and experimental tools. Featuring selected contributions presented at

the 2018 Computational Methods in Experimental Economics Conference (CMEE 2018), this book provides a modern economic perspective on such important issues as: sustainable development, consumption, production, national wealth, the silver economy, behavioral finance, economic and non-economic factors determining the behavior of household members, consumer preferences, social campaigns, and neuromarketing. International case studies are also offered.

What is science? How is it performed? Is science only a method or is it also an institution? These are questions at the core of Managing Science, a handbook on how scientific research is conducted and its results disseminated. Knowledge creation occurs through scientific research in universities, industrial laboratories, and government agencies. Any knowledge management system

needs to promote effective research processes to foster innovation, and, ultimately, to channel that innovation into economic competitiveness and wealth. However, science is a complicated topic. It includes both methodological aspects and organizational aspects, which have traditionally been discussed in isolation from each other. In Managing Science, Frederick Betz presents a holistic approach to science, incorporating both

philosophical and practical elements, in a framework that integrates scientific method, content, administration and application.

Illustrating all of the key concepts with illustrative case studies (both historical and contemporary, and from a wide spectrum of fields), Betz provides in-depth discussion of the process of science. He addresses the social, organizational, institutional, and infrastructural context through which research projects are designed and

their results applied, along the path from experimentation to innovation to commercialization of new products, services, and processes. This practical approach to science is the foundation of today's knowledge-intensive and technology-enabled industries, and positions the management of science within the broader context of knowledge management and its implications for organizations, industries, and regional and national technology management

policies. Managing Science will be an essential resource for students in all areas of research, industry scientists and R&D specialists, policymakers and university administrators, and anyone concerned with the application of research to economic growth and development. Judicial Independence in Transition Springer Science & Business Media Well-known security experts decipher the most challenging aspect of cloud computing-security

Cloud computing allows for both large and small organizations to have the opportunity to use Internet-based services so that they can reduce start-up costs, lower capital expenditures, use services on a pay-as-you-use basis, access applications only as needed, and quickly reduce or increase capacities. However, these benefits are accompanied by a myriad of security issues, and this valuable book tackles the most common security challenges that cloud

computing faces. The authors offer you years of unparalleled expertise and knowledge as they discuss the extremely challenging topics of data ownership, privacy protections, data mobility, quality of service and service levels, bandwidth costs, data protection, and support. As the most current and complete guide to helping you find your way through a maze of security minefields, this book is mandatory reading if you are involved in any aspect of cloud computing.

 100 recipes arranged by season, The Soup Sisters Cookbook gives you heartwarming soups to prepare and share throughout the year. The Soup Sisters Cookbook showcases scrumptious recipes from the "souper volunteers" of the Soup Sisters and recipes from many of Canada's top celebrity chefs--including Michael Stadlander, Bonnie Stern, Lucy Waverman, Massimo Capra, Anna Olson,

Michael Bonacini and Elizabeth Baird. With 100 recipes arranged by season, *The Soup Sisters Cookbook* is certain to appeal to soup-lovers everywhere! Soup Sisters are a Calgary-based non-profit enterprise founded in 2009. They are dedicated to making a tangible difference to the lives of women and children in need. Soup Sisters believe in the power of soup and the nutrition, comfort and warmth that the gift of soup can bring. This belief has resonated quickly and

profoundly with communities across Canada, who come together through their local Soup Sisters events to cook, share and donate soup, to women's shelters in their community. The Soup Sisters' growing network has over 4,500 supporters, who collectively donate over 8,000 bowls of soup every month--over 75,000 bowls of soup have been donated to date. *Cloud Security* Routledge The appointment of a Supreme Court Justice is an event of major

significance in American politics. Each appointment is important because of the enormous judicial power the Supreme Court exercises as the highest appellate court in the federal judiciary. Appointments are usually infrequent, as a vacancy on the nine-member Court may occur only once or twice, or never at all, during a particular President's years in office. Under the Constitution, Justices on the Supreme Court received lifetime appointments. This book reviews the procedure for

appointing a Supreme Court Justice.

 Innovative supra- and transnational techniques of juridification (in short: governance structures) have changed both the fundamental conditions of law production, as well as the significance of transnational law. This has led to a transformation of international law. The contributions to this volume analyze this transformative trend by

discussing conceptual problems of global democratic cosmopolitanism, new conceptual approaches towards legitimizing the EU via conflicts of law, the implications of the administrative bias of governance structures, as well as the potential of taming governance by involving civil society actors in its structures. Handbook on European Non-discrimination Law John Wiley & Sons This survey of the literature on the development of

nationalism in Muslim countries also examines the status of the ummah in Muslim nation states as well as activities of Muslim nations through the OIC. *Islamic Legal Theory* IGI Global Islamic legal theory (usūl al-fiqh) is literally regarded as 'the roots of the law' whilst Islamic jurists consider it to be the basis of Islamic jurisprudence and thus an essential aspect of Islamic law. This volume addresses the sources, methods and principles of

Islamic law leading to an appreciation of the skills of independent juristic and legal reasoning necessary for deriving specific rulings from the established sources of the law. The articles engage critically with relevant traditional views to enable a diagnostic understanding of the different issues, covering both Sunnī and Shī'ī perspectives on some of the issues for comparison. The volume features an introductory overview of the subject as well as a comprehensive

bibliography to aid further research. Islamic legal theory is a complex subject which challenges the ingenuity of any expert and therefore special care has been taken to select articles for their clarity as well as their quality, variety and critique to ensure an in-depth, engaging and easy understanding of what is normally a highly theoretical subject.

The Blindfold of Lady Justice Routledge

The European integration project currently faces profound political, economic, legal, and societal challenges. These challenges seem increasingly to overburden the European Union as well as the cohesion among the Member States, and therefore pose a serious threat to the integration project. The EU faces a major task in coping with this situation and it is one

that calls for new approaches and ideas. This book addresses the major challenges confronting the EU, analyses the consequences for the integration project, and develops fresh perspectives on the EU's future prospects for coping with the most debated, current and upcoming issues, such as the rise of Euroscepticism or the contested idea of an 'ever-closer union'. Renowned experts in European Studies from the fields of political

science, law, economics and sociology provide an interdisciplinary perspective on the different dimensions of the EU's crisis-laden situation and question whether the EU's existing problem-solving mechanisms and methods are sufficient to address the imminent tasks. This text will be of key interest to scholars and students of EU Politics, European Politics, European Governance, and more broadly European law, history and the wider social sciences.
