Say the name Marshall

McLuhan and you think of the great discover's explorations of the media. But throughout his life, McLuhan never stopped reflecting profoundly on the nature of God and worship, and on the traditions of the Church. Often other intellectuals and artists would ask him incredulously, Are you really a Catholic? He would answer, Yes, I am a Catholic, the worst kind -- a convert, leaving them more baffled than before. Here, like a golden thread lining his public utterances on the media,

are McLuhan's brilliant probes into the nature of conversion, the church's understanding of media, the shape of tomorrow's church, religion and youth, and the God-making machines of the modern world. This fascinating collection, gathered from his many and scattered remarks, essays, and other writings, shows the deeply Christian side of a man widely considered the most important thinker of our time, a man whose insights into media and culture have

revolutionized the field of media study and the way we see the world.

The Global Village
Cambridge University Press

Uncovering a vast maze of realities in the media theories of Marshall McLuhan The term “global village”—coined in the 1960s by Marshall McLuhan—has persisted into the twenty-first century as a key trope of techno-humanitarian discourse, casting economic and technical transformations in a utopian light. Against that

tendency, this book excavates the violent history, originating with techniques of colonial rule in Africa, that gave rise to the concept of the global village. To some extent, we are all global villagers, but given the imbalances of semiotic power, some belong more thoroughly than others. Reassessing McLuhan's media theories in light of their entanglement with colonial and neocolonial techniques, Nolan implicates various arch-paradigms of power (including "terra-power")

in the larger prerogative of managing human populations. Forerunners: Ideas First is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in

scholarship.

Imaginary Futures

Harvard University Press
This book is a history of the future. It shows how our contemporary understanding of the Net is shaped by visions of the future that were put together in the 1950s and 1960s.

The End of the Village

Rowman & Littlefield Publishers

Everybody knows that digital technology has revolutionised our economy and our lifestyles. But how many of us really understand

the drivers behind the technology - the significance of going digital; the miniaturization of circuit boards; the role of venture capital in financing the revolution; the importance of research and development? How many of us understand what it takes to make money from innovative technologies? Should we worry about manufacturing going offshore? What is the role of India and China in the digital economy? Drawing on a lifetime's experience

in the industry, as an engineer, a senior manager and as a partner in a venture capital firm, Henry Kressel offers an expert personalized answer to all these questions. He explains how the technology works, why it matters, how it is financed and what the key lessons are for public policy. *The Medium and the Light* New York : Oxford University Press
Technology has shrunk the physical world into a "global village," where we all seem to be connected

in an online community worldwide. Yet while we think of platforms such as Twitter and Facebook as accessible to all, in reality, these are commercial entities developed primarily by and for the Western world. Considering how new technologies increasingly shape labor, economics, and politics, these tools often reinforce the inequalities of globalization, rarely reflecting the perspectives of those at the bottom of the digital divide. This book asks us

to reconsider "whose global village" we are shaping with the digital technology revolution today. Sharing stories of collaboration with Native Americans in California and New Mexico, revolutionaries in Egypt, communities in rural India, and others across the world, Ramesh Srinivasan urges us to reimagine what the Internet, mobile phones, or social media platforms may look like when considered from the perspectives of diverse cultures. Such

collaboration can pave the way for a people-first approach toward designing and working with new technology worldwide that embraces the realities of communities too often relegated to the margins *The Transformation of the World* Indiana University Press
This book explores the multiple effects of globalization on urban and rural communities, providing anthropological case studies from postsocialist Bulgaria. As globalization has been

studied largely in urban contexts, the aim of this volume is to shift attention to the under-examined countryside and analyse how transnational links are transforming relations between cities, towns and villages. The volume also challenges undifferentiated notions of 'the countryside', calling for an awareness of rural economic and social disparities which are often only associated with urban environments. The work focuses on how the 'urban' and 'rural' have been reconfigured

following the end of socialism and the advent of globalization, in socioeconomic, as well as political, ideological and cultural terms.

A New Era in Global Health NYU Press

The fully updated second edition of this lively and accessible book argues for the central role of media in understanding globalization. By breaking down the economic, cultural, and political impact of media, and through a rich set of case studies from around the globe, Lule describes a

divided global village, its destiny shaped by strife.

Memory Bytes Gingko PressInc

Since its first appearance in 1962, the impact of The Gutenberg Galaxy has been felt around the world. It gave us the concept of the global village; that phrase has now been translated, along with the rest of the book, into twelve languages, from Japanese to Serbo-Croat. It helped establish Marshall McLuhan as the original 'media guru.' More than 200,000 copies are in

print. The reissue of this landmark book reflects the continuing importance of McLuhan's work for contemporary readers.

Essential McLuhan

Princeton University Press

How China's expansive new era of urbanization threatens to undermine the foundations of rural life Since the beginning of the twenty-first century, China has vastly expanded its urbanization processes in an effort to reduce the inequalities between urban and rural areas. Centered on the mountainous region of

Chongqing, which serves as an experimental site for the country's new urban development policies, *The End of the Village* analyzes the radical expansion of urbanization and its consequences for China's villagers. It reveals a fundamental rewriting of the nation's social contract, as villages that once organized rural life and guaranteed rural livelihoods are replaced by an increasingly urbanized landscape dominated by state institutions. Throughout

this comprehensive study of China's "urban-rural coordination" policy, Nick R. Smith traces the diminishing autonomy of the country's rural populations and their subordination to larger urban networks and shared administrative structures. Outside Chongqing's urban centers, competing forces are at work in reshaping the social, political, and spatial organization of its villages. While municipal planners and policy makers seek to extend state power structures

beyond the boundaries of the city, village leaders and inhabitants try to maintain control over their communities' uncertain futures through strategies such as collectivization, shareholding, real estate development, and migration. As China seeks to rectify the development crises of previous decades through rapid urban growth, such drastic transformations threaten to displace existing ways of life for more than 600 million residents. Offering an

unprecedented look at the country's contentious shift in urban planning and policy, *The End of the Village* exposes the precarious future of rural life in China and suggests a critical reappraisal of how we think about urbanization.

Globalization and Media
SAGE

Marshall McLuhan was the greatest prophet of the digital age. In the 1960s, McLuhan, a Canadian literary theorist reared on Elizabethan satire and the labyrinthine novels of James Joyce, turned his

attention toward the budding and befuddling electronic age. Like most prophets, McLuhan became one through a fascination with God. Prophets divine their wisdom from a source, and *Digital Communion* shows that McLuhan's was his own Catholic faith. In other words, the greatest prophet of the digital age was an ardent Christian. A reconsideration of his vision can change the way we view the online world. A Catholic convert, McLuhan foretold a digital age full of blessings and

sins: a world where information was a phone call or keystroke away, but where our new global village could also bring out the worst in us. For him, mass media was a form of Mass. McLuhan thought that while the print world was visual, the electric world--especially television--was a medium of touch. It enveloped us. For McLuhan, God was everywhere, including in the electric light. *Digital Communion* considers the religious history of mass communication, from the Gutenberg Bible to James

Joyce's literary forerunners of hypertextual language to McLuhan's vision of the electronic world as a place of potential spiritual exchange, in order to reveal how we can cultivate a more spiritual vision of the internet--a vision we need now more than ever.

Digital Communion House of Anansi
Winner of the Society for Economic Anthropology Annual Book Prize 2008. Belize, a tiny corner of the Caribbean wedged into Central America, has been

a fast food nation since buccaneers and pirates first stole ashore. As early as the 1600s it was already caught in the great paradox of globalization: how can you stay local and relish your own home cooking, while tasting the delights of the global marketplace? Menus, recipes and bad colonial poetry combine with Wilk's sharp anthropological insight to give an important new perspective on the perils and problems of globalization.

Understanding New

Media Georgetown University Press
The fully updated third edition of this lively and accessible book argues for the central role of media in understanding globalization. Indeed, Jack Lule convincingly shows that globalization could not have occurred without media. From earliest times, humans have used media to explore, settle, and globalize their world. In our day, media has made the world progressively "smaller" as nations and cultures come into increasing contact.

Decades ago Marshall McLuhan prophesied that media technology would transform the world into a “global village.” Slowly, fitfully, his vision is being fulfilled. The global village, however, is not the blissful utopia that McLuhan predicted. Nor, in a more modern formulation, is the world flat, with playing fields leveled and opportunities for all. Instead, Lule argues, globalization and media are combining to create a divided world of gated communities and ghettos, borders and

boundaries, suffering and surfeit, beauty and decay, surveillance and violence. By breaking down the economic, cultural, and political impact of media, and through a rich set of case studies from around the globe, the author describes a global village of Babel—invoking the biblical town punished for its vanity by seeing its citizens scattered, its language confounded, and its destiny shaped by strife.

Globalization and Media Routledge
Explores the great

potential for nursing involvement in promoting global health. This unique text elucidates the relationship between global nursing and global health, underscoring the significance of nurses’ contributions in furthering the Post-2015 Agenda of the United Nations regarding global health infrastructures, and examining myriad opportunities for nurses to promote the 17 Sustainable Development Goals (SDGs) and foster health and healthy environments worldwide.

While past nursing literature has emphasized nursing's potential involvement and influence in the global arena, this is the first book to identify, validate, and promote nurses' proactive and multidimensional work in furthering current transnational goals for advancing health on a global scale. The book includes an introduction to global health, clarification of terms and roles, perspectives on education, research, and theory related to global nursing, a history of the

partnership between the United Nations and the nursing profession, an in-depth exploration of the 17 SDGs and relevant nursing tasks, as well as several chapters on creating a vision for 2030 and beyond. It is based on recent and emerging developments in the transnational nursing community, and establishes, through the writings of esteemed global health and nursing scholars, a holistic dialogue about opportunities for nurses to expand their roles as

change agents and leaders in the cross-cultural and global context. The personal reflections of contributors animate such topics as global health ethics, the role of caring in a sustainable world, creating a shared humanity, cultural humility, and many others. Key Features: Examines, for the first time, nursing's role in each of the 17 SDGs Integrates international initiatives delineating nursing's role in the future of global health Creates

opportunities for nurses to redefine their contributions to global health Includes personal reflections to broaden perspectives and invite transnational approaches to professional development Distills short, practical, and evidence-based chapters describing global opportunities for nurses in practice, education, and research

The Transformation of Global Higher Education, 1945-2015 Springer

Claudia Roth's work on Bobo-Dioulasso, a city of

half a million residents in Burkina Faso, provides uniquely detailed insight into the evolving life-world of a West African urban population in one of the poorest countries in the world. Closely documenting the livelihood strategies of members of various neighbourhoods, Roth's work calls into question established notions of "the African family" as a solidary network, documents changing marriage and kinship relations under the impact of a persistent economic

crisis, and explores the increasingly precarious social status of young women and men. [Understanding Media Cultures](#) Springer Publishing Company Porter challenges the powerful ideology of "Globalism" that is widely subscribed to by the US national security community. Globalism entails visions of a perilous shrunken world in which security interests are interconnected almost without limit, exposing even powerful states to instant war. Globalism

does not just describe the world, but prescribes expansive strategies to deal with it, portraying a fragile globe that the superpower must continually tame into order. Porter argues that this vision of the world has resulted in the US undertaking too many unnecessary military adventures and dangerous strategic overstretch. Distance and geography should be some of the factors that help the US separate the important from the unimportant in

international relations. The US should also recognize that, despite the latest technologies, projecting power over great distances still incurs frictions and costs that set real limits on American power. Reviving an appreciation of distance and geography would lead to a more sensible and sustainable grand strategy.

Whose Global Village?

Cornell University Press
Marshall McLuhan made many predictions in his seminal 1964 publication, *Understanding Media:*

Extensions of Man. Among them were his predictions that the Internet would become a «Global Village», making us more interconnected than television; the closing of the gap between consumers and producers; the elimination of space and time as barriers to communication; and the melting of national borders. He is also famously remembered for coining the expression «the medium is the message». These predictions form the genesis of this new

volume by Robert Logan, a friend and colleague who worked with McLuhan. In *Understanding New Media* Logan expertly updates *Understanding Media* to analyze the «new media» McLuhan foreshadowed and yet was never able to analyze or experience. The book is designed to reach a new generation of readers as well as appealing to scholars and students who are familiar with *Understanding Media*. for the latest updates on this book.

Home Cooking in the Global Village

McClelland & Stewart *Transformations on the Ground* considers the ways in which power in all its forms—local, international, legal, familial—affects the collision of global with local concerns over access to land and control over its use. In Botswana’s struggle to access international economies, few resources are as fundamental and fraught as control over

land. On a local level, land and control over its use provides homes, livelihoods, and the economic security to help lift populations out of impoverishment. Yet on the international level, global capital concerns compete with strategies for sustainable development and economic empowerment. Drawing on extensive archival research, legal records, fieldwork, and interviews with five generations of family members in the village of Molepolole, Anne M. O.

Griffiths provides a sweeping consideration of the scale of power from global economy to household experience in Botswana. In doing so, Griffiths provides a frame through which the connections between legal power and local engagement can provide fresh insight into our understanding of the global.

The Medium Is the Message U of Minnesota Press

The transition of Russia to a 'developed market economy' has been

slower, more contradictory and less predictable than expected. This book examines contemporary Russian socio-economic development, and explores the degree to which Russian experiences can be incorporated into current social science theories. In particular, it questions how far the concept of 'globalization' is applicable to the situation in Russia.

The Limits of the Global Village University of Toronto Press

Marshall McLuhan's insights are more applicable today than when he first announced them to a startled world in the 1960s. Here, in one concise volume, are McLuhan's key ideas, drawn from his books, articles, correspondence, and published speeches. This book is the essential archive of his constantly surprising vision. *Understanding Media* U of Minnesota Press
Generations Z in Europe brings together differing geographic perspectives from a range of

researchers to present a fascinating picture of the contemporary reality for 'Gen-Z' workers from nine

European countries. The findings will help readers understand the diversity

of issues and commonalities for this new part of the global workforce.
