In a supportive article covering the 4th Berlin Biennial, critic Steven Henry Madoff took a moment to question what many have termed "Biennial Fever," writing, "Are [biennials] here to capture trends or to advance artists' voices in a larger social dialogue? Do they promote international understanding or local interests? Are they bully pulpits for curators turned ideologues, or are they simply there to tap the art market's stopwatch till the next survey of hot new things draws the attention of an ever expanding universe of collectors?" For the 2008 edition of this always-provocative international fair, Curators Adam Szymczyk and Elena Filipovic brought together primarily newly commissioned work by 50 emerging and established international artists for a round-the-clock exhibition that included 63 nightly events. This expansive volume documents it all, and contains contributions by writers, critics and artists including Beatriz Colomina, Bettina Viesmann, Cameron Jamie, Gabriel Kuri, Babette Mangolte, Ahmet Ögüt and Katerina Seda.

How can there be a Jewish culture in today's Germany? Since the fall of the Wall, there has been a substantial increase in the visibility of Jews in German culture, not only an increase in the number of Jews living there, but, more importantly, an explosion of cultural activity. Jews are writing and making films about the central question of Jewish life after the Shoah. Given the xenophobia that has marked Germany since reunification, the appearance of a new Jewish is both surprising and normalizing. Even more striking than the reappearance of Jewish culture in England after the expulsion and massacres of the Middle Ages, the presence of a new generation of Jewish writers in Germany is a sign of the complexity and tenacity of modern Jewish life in the Diaspora. Edited by Sander L. Gilman and Karen Remmler and featuring works by many of the most noted specialists on the subject, including Susan Niemann, Y. Michael Bodemann, Marion Kaplan, Katharina Ochse, Robin Ostow, Rafael Seligmann, Jack Zipes, Jeffrey Peck, Kizer Walker, and Esther Dischereit, this volume explores the questions and doubts surrounding the revitalization of Jewish life in Germany. The writers cover such diverse topics as the social and institutional role that Jews now play, the role of religion in daily life, and gender and culture in post-Wall Jewish writing.

How do we know when what is happening between two people should be called psychoanalysis? What is a psychoanalytic process and how do we know when one is taking place? Psychoanalysis Comparable and Incomparable describes the rationale and ongoing development of a six year programme of highly original meetings conducted by the European Psychoanalytic Federation Working Party on Comparative Clinical Methods. The project comprises over seventy cases discussed by more than five hundred experienced psychoanalysts over the course of sixty workshops.

Authored by a group of leading European psychoanalysts, this book explores ways for psychoanalysts using different approaches to learn from each other when they present their work to fellow psychoanalysts, and provides tools for the individual practitioner to examine and improve his or her own approach. As described in detail in its pages, sticking to the task led to some surprising experiences, raising fundamental questions about the way clinical discussion and supervision are conducted in psychoanalysis. Well known by many in the psychoanalytic community and the object of much interest and debate, this project is described by those who have had the closest contact with it and will satisfy a widely held curiosity in psychoanalysts and psychotherapists throughout the world. David Tuckett is winner of the 2007 Sigourney Award.

Toward the beginning of 2013, I received reports of passages in the Black Notebooks that offered observations on Jewry, or as the case may be, world Jewry. It immediately became clear to me that the publication of the Black Notebooks would call forth a wide-spread international debate. Already in the Spring of 2013, I had asked Professor Friedrich-Wilhelm von Herrmann, last private assistant - and in the words of my grandfather, the "chief co-worker of the complete edition", - if he might review the Notebooks as a whole, based on his profound insight into the thought of Martin Heidegger, and in particular, review those Jewish-related passages that were the focus of the public eye. Publications about the Black Notebooks quickly came to propagate catchy expressions such as "being-historical anti-Semitism" and "metaphysical anti-Semitism". The first question that obviously arises is: Does the thought of Martin Heidegger exhibit any kind of anti-Semitism at all? In this book Professor von Herrmann now advances his hermeneutic explication. With Professor Francesco Alfieri of the Pontificia Università Lateranense he has found a colleague who has drawn up a comprehensive philological analysis of volumes GA 94 through GA 97 of the Complete Edition. The fact that Heidegger designated the hitherto published "black notebooks" as Ponderings (Überlegungen) and as Observations (Anmerkungen) has been given little consideration. He intentionally placed them at the conclusion of the Complete Edition because without acquaintance with the lectures, and above all, with the being-historical treatises that would come to be published in the framework of the Complete Edition, they would not be comprehensible. (Arnulf Heidegger)

The first systematic analysis of the Frankfurt School's research and theorizing on modern antisemitism. Although the Frankfurt School represents one of the most influential intellectual traditions of the twentieth century, its multifaceted work on modern antisemitism has so far largely been neglected. The Politics of Unreason fills this gap, providing the first systematic study of the Frankfurt School's philosophical, psychological, political, and social research and theorizing on the problem of antisemitism. Examining the full range of these critical theorists' contributions, from major studies and prominent essays to seemingly marginal pieces and aphorisms, Lars Rensmann reconstructs how the Frankfurt School, faced with the catastrophe of the genocide against the European Jews, explains forms and causes of anti-Jewish politics of hate. The book also pays special attention to research on coded and "secondary" antisemitism after the Holocaust, and how resentments are politically mobilized under conditions of democracy. By revisiting and rereading the Frankfurt School's original work, this book challenges several misperceptions about critical theory's research, making the case that it provides an important source to better understand the social origins and politics of antisemitism, racism, and hate speech in the modern world. Lars Rensmann is Professor of European Politics and Society at the University of Groningen in the Netherlands. His books include Arendt and Adorno: Political and Philosophical Investigations (coedited with Samir Gandesha).

Hermeneutics was elaborated as a specific art of understanding in humanities. The discovered paradigmatic, historical characteristics of scientific knowledge, and the role of rhetoric, interpretation and contextuality enabled us to use similar arguments in natural sciences too. In this way a new research field, the hermeneutics of science emerged based upon the works of Husserl, Merleau-Ponty, Heidegger and Gadamer. A dialogue between philosophers and scientists begins in this volume on hermeneutic approaches to physics, biology, ethology, mathematics and cognitive science. Scientific principles, methodologies, discourse, language, and metaphors are analyzed, as well as the role of the lay public and the legitimation of science. Different hermeneutical-phenomenological approaches to perception, experiments, methods, discovery and justification and the genesis of science are presented. Hermeneutics shed a new light on the incommensurability of paradigms, the possibility of translation and the historical understanding of science.

Hypnose funktioniert wirklich! In diesem Buch finden Sie alle Antworten auf Ihre Fragen zur Hypnose. Wie funktioniert sie? Woher kommt sie? Wo findet sie Anwendung? Ist sie Schauspielerei oder gar Zauberei? Kann sie manipulieren? Was kann sie bewirken? Wenn wir über Hypnose sprechen, denken wir in erster Linie an Showhypnose. Menschen, die auf einer Bühne in Trance versetzt werden und lustige Sachen tun. Doch Hypnose ist bei Weitem mehr und wird heute in großem Umfang als Therapie eingesetzt. Etwa bei Schlafstörungen, Übergewicht, Ängsten, Zwängen oder Raucherentwöhnung kann die Hypnosetherapie helfen. Trotz der Tatsache, dass sie viele Menschen bereits in unterschiedlichsten Lebenssituationen unterstützt hat, wirft sie immer noch Hunderte von Fragen und Kontroversen auf. Der Autor stellt sich der Herausforderung, sie auf verständliche Art und Weise zu beantworten. "Das Gefühl, in der Trance zu sein, stellte sich als sehr angenehm heraus. Ich merkte, wie ich immer mehr zur Ruhe kam und fühlte mich richtig gut dabei. Nach der Behandlung war ich zutiefst entspannt und zufrieden." Das Buch möchte die Entwicklung dieser Praxis, ihre psychologische Funktionsweise und ihre zahlreichen Möglichkeiten deutlich machen. Ewald Pipper ist Hypnosetherapeut, Heilpraktiker für Psychotherapie und Leiter des Hypnoseinstituts Bremen. Als Praktiker für Hypnose und Therapie in Bremen hilft er nicht nur Managern großer Unternehmen, sich besser entspannen zu können. This study fills a gap in standardization literature. It is the first academic analysis of national standardization organizations. These organizations exist in every country and may be private or governmental organizations. The first national standardization th organizations were founded in the early decades of the 20 century and were aimed at rationalizing industrial production. Their mode of operation reflects the sense of co operation at the national level and - in the telecommunications and electrotechnical field - at the international level as well. Now, however, the scene has changed, with companies operating internationally. Standards for products, processes, and services are crucial factors in determining success or failure on a fiercely competitive market, especially when functional compatibility is a prerequisite, as is the case in computer and telecommunications technologies. As a consequence, rather homogeneous needs of participants in standardization have given way to conflicting interests. This prompts a discussion about the traditional role of national standardization organizations. They increasingly depend on their exclusive links to the international standardization organizations ISO and IEC, and, in the case of Europe, the regional organizations CEN and CENELEC. In many cases, formal standardization organizations are not the obvious bodies for developing standards to meet business needs. Is this inevitable or could they improve

performance and regain their market share? Henk de Vries answers this question against the background of current developments in standardization at the international, European, and national levels.

With the fall of the Berlin Wall and the shifting of American foreign policy away from "old" Europe,

long-established patterns of interaction between Germany and the U.S. have come under review. Although seemingly disconnected from the cultural and intellectual world, political developments were not without their influence on the humanities and their curricula during the past century. In retrospect, we can speak of the many different roles Germany has played in American eyes. The *Many Faces of Germany* seeks to acknowledge the importance of those incarnations for the study of German culture and history on both sides of the Atlantic. One of the major questions raised by the contributors is whether the transformations in the transatlantic dynamics and in the importance of Germany for the U.S. have had a major influence on the study of things German in the U.S. internally. The volume gathers together leading voices of the older and younger generations of social historians, literary scholars, film critics, and cultural historians.
