Spies for Hire Cambridge University Press

A powerful and humane exploration of the history of the "insanity defense," through the story of one poignant case. When a three-year-old child was found with a head wound and other injuries, it looked like an open-and-shut case of second-degree murder. Psychologist and attorney Susan Vinocour agreed to evaluate the defendant, the child's mentally ill and impoverished grandmother, to determine whether she was competent to stand trial. Even if she had caused the child's death, had she realized at the time that her actions were wrong or was she legally "insane"? What followed was anything but an open-and-shut case. *Nobody's Child* traces the legal definition of "insanity" back to its inception in Victorian Britain nearly two hundred years ago, from when our understanding of the human mind was in its infancy, to today, when questions of race, class, and ability so often determine who is legally "insane" and who is criminally guilty. Vinocour explains how "competency" and "insanity" are creatures of a legal system, not of psychiatric reality, and how, in criminal law, the insanity defense has to often been a luxury of the rich and white. *Nobody's Child* is a profoundly dignified portrait of injustice in America and a complex examination of the troubling intersection of mental health and the law. When prisons are now the largest institutions for the mentally ill, Vinocour demands that we reckon with our conceptions of "insanity" with clarity, empathy, and responsibility. *The 21st Century Public Manager* Cambridge University Press

"This manual closes a circle which began almost thirty-five years ago (November, 1954) with the beginning of work on a doctoral dissertation defended at the Pontifical Biblical Institute in April, 1957 (published in Spanish in 1962). During three decades of teaching and writing the

author has kept an active interest in poetics and stylistics and the resulting accumulated knowledge has been concentrated in the present manual. The primary purpose of the book is not to serve as a source of information about facts and authors but rather to initiate the reader into the stylistic analysis of poetry. To obtain information and to classify it the reader can turn to recent works (Watson), earlier works (Knig, Hempel), or reprinted works (Bullinger). Among the poetic techniques discussed are sound and sonority, rhythm, imagery, figures of speech, dialogue and monologue, development and composition"--Page 4 of cover.

UNMIK as an International Governance in Post-war Kosovo Manchester University Press

In this study, W. J. Waluchow argues that debates between defenders and critics of constitutional bills of rights presuppose that constitutions are more or less rigid entities. Within such a conception, constitutions aspire to establish stable, fixed points of agreement and pre-commitment, which defenders consider to be possible and desirable, while critics deem impossible and undesirable. Drawing on reflections about the nature of law, constitutions, the common law, and what it is to be a democratic representative, Waluchow urges a different theory of bills of rights that is flexible and adaptable. Adopting such a theory enables one not only to answer to

critics' most serious challenges, but also to appreciate the role that a bill of rights, interpreted and enforced by unelected judges, can sensibly play in a constitutional democracy.

This book examines the most recent trends in the constitutional and legal regulations in all Latin American countries regarding the amparo proceeding. It analyzes the regulations of the seventeen amparo statutes in force in Latin America, as well as the regulation on the amparo guarantee established in Article 25 of the American Convention of Human Rights. *Shattered, Cracked, or Firmly Intact?* Routledge

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare,

Albanian writer.

In the past 50 years, fewer than eighty women worldwide have attained the office of prime minister or president. In 2010, women held just seventeen of the world's 252 executive posts - slightly less than seven percent. In *Shattered, Cracked, or Firmly Intact?*, Farida Jalalzai explores the patterns of women executive's paths, powers, and potential impacts, examining the global and national mechanisms that prevent women from attaining executive office. Combining a broad understanding of global dynamics of executive power with detailed studies of individual women leaders, *Shattered, Cracked, or Firmly Intact?* analyzes how institutionally embedded gender expectations limit women's representational impact.

The central role that effective governance plays in the economic and social development of a country is widely recognized. Using the example of the Commonwealth countries of eastern and southern Africa, this book analyzes the key issues in the process of developing, strengthening and consolidating the state's capacity to ensure the effective governance of its peoples. The book draws attention to the problems of constitutionalism and critically addresses legal issues involved in making constitutions "work" in practice.

Professor McNabb has produced an excellent overview of the management challenges facing public utilities in the 21st century. His description of the evolution, changes, and challenges of different types of utilities is insightful. What makes this book uniquely valuable is his addressing the variety of utility management responsibilities including human resources, information services, and strategic planning in a single volume. I recommend it highly. Jeffrey Showman, Washington Utilities and Transportation Commission, US An introduction to the current issues and challenges facing managers and administrators in the investor and publicly owned utility industry, this engaging volume addresses management concerns in three sectors of the utility industry: electric power, natural gas, and water and wastewater systems. Beginning with a brief overview of the historical development of the industry, the author looks at policy issues and discusses management ethics. He then examines a number of the major challenges in these organizational functions: management and

leadership, planning, marketing, accounting and finance, information technology, governance, and human resources. In the final section of the volume he looks at issues specific to each of the three industry sectors. Accessible and comprehensive, this thoughtful exploration of the various issues facing managers in public utilities in the new century will prove a useful overview for students of business and economics, utility staff, and directors of local utility governing boards.

Analyses the international response to the crisis in Kosovo, and its broader implications by examining its diplomatic, military and humanitarian features. Unravelling these implications can be challenging as it remains an event replete with paradoxes - the originality of this book's approach lies in its exploration of these paradoxes. The crisis in Kosovo has been a headline grabbing event - a serious study of the implications of the conflict on wider European security issues and institutions is urgently required.

The Death of Punishment Cambridge University Press

For twelve years Robert Blecker, a criminal law professor, wandered freely inside Lorton Central Prison, armed only with cigarettes and a tape recorder. The Death of Punishment tests legal philosophy against the reality and wisdom of street criminals and their guards. Some killers' poignant circumstances should lead us to mercy; others show clearly why they should die. After thousands of hours over twenty-five years inside maximum security prisons and on death rows in seven states, the history and philosophy professor exposes the perversity of justice: Inside prison, ironically, it's nobody's job to punish. Thus the worst criminals often live the best lives. The Death of Punishment challenges the reader to refine deeply held beliefs on life and death as punishment that flare up with every news story of a heinous crime. It argues that society must redesign life and death in prison to make the punishment more nearly fit the crime. It closes with the final irony: If we make prison the punishment it should be, we may well abolish the very death penalty

justice now requires.

Richard A. Primus examines three crucial periods in American history (the late eighteenth century, the civil war and the 1950s and 1960s) in order to demonstrate how the conceptions of rights prevailing at each of these times grew out of reactions to contemporary social and political crises. His innovative approach sees rights language as grounded more in opposition to concrete social and political practices, than in the universalistic paradigms presented by many political philosophers. This study demonstrates the potency of the language of rights throughout American history, and looks for the first time at the impact of modern totalitarianism (in Nazi Germany and the Soviet Union) on American conceptions of rights. The American Language of Rights is a major contribution to contemporary political theory, of interest to scholars and students in politics and government, constitutional law, and American history.

In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to those basic goods and services that are necessary not only for realizing one's potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call

themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives, such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will require strong ownership at the national level, coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current programming cycle for European Funds represents a unique opportunity to fund such interventions.
