Eighteen-year-old Fenella is a mischievous as her freckled elfin beauty and feline green eyes suggest - but beneath that puckish charm she hides her ardent desire to do all in her power to make her beloved cousin Periquine, Lord Corbury, happy. When to her chagrin the dashing Lord returns from the Napoleonic War after fighting with Wellington, penniless and passionately in love with another - a woman of great wealth and even greater beauty, whom he cannot marry without wealth of his own, Fenella sacrifices her private passion to his wellbeing. Laying her life and her love on the line, she joins Periquine in a swashbuckling and death-defying life of crime as highwaymen, robbers and smugglers. Will their exploits reap the riches he needs? And will Fenella's all-conquering love remain unrequited? Only when

Perequine faces losing her forever will he find the answer in his heart...

The Day I Started a Mega-Robot Invasion Springer Science & Business Media

This book considers management theories and approaches specifically in the context of developing countries. In recent years, international business scholarship has increased its focus on the developing world, which represents 80 percent of the global population and has doubled its share of value-added trade in the past two decades. This text will help readers to manage successfully in this region by learning to assess, apply, and adapt established practices in developing countries. Punnett begins by identifying the characteristics of the developing world—Africa, Asia, the Caribbean, India, Latin America, and the Middle East—and the companies therein to help students understand how the reality of these countries influences business and management. By tracking a fictional product through the internationalization process, students will navigate the challenges of operating an international company from a developing country base, using a traditional model of management focused on planning, organizing, staffing, leading, and controlling. They will also gain insight into ethical considerations likely to arise, such as differential treatment based on personal characteristics and age dispersion. Cases, discussion questions, personal stories, and end-of-chapter exercises will help readers to grapple with issues

and test their learning. Complete with chapter objectives and "Lessons Learned" boxes to facilitate understanding, *Managing in Developing Countries* is an excellent supplement for international business or international management students with a special interest in the developing world.

Managing in Developing Countries Routledge

The ways in which commercial organizations and service providers 'style' themselves - creating the image they wish to portray to their potential consumers - is a long-established area of research in the fields of sociology and business studies. However language also plays an important role in organizational styling, something which until now has been largely overlooked in the literature. This is the first book-length study of the linguistics of organizational styling, looking at the language and semiotic resources used by holiday resorts, pharmaceutical companies, restaurants and insurance companies in order to project their identities, and style themselves. It discusses in detail a number of case studies and presents an innovative take on the notion of style, as well as bringing together work from linguistics, business studies and sociology. This interdisciplinary book will be of interest to scholars and advanced students in sociolinguistics, and scholars of sociology and business studies.

This is the first general monograph on ancient Greek dress in English to be published in more than a century. By applying

modern dress theory to the ancient evidence, this book reconstructs the social meanings attached to the dressed body in ancient Greece. Whereas many scholars have focused on individual aspects of ancient Greek dress, from the perspectives of literary, visual, and archaeological sources, this volume synthesizes the diverse evidence and offers fresh insights into this essential aspect of ancient society. Intended to be accessible to nonspecialists as well as classicists, and students as well as academic professionals, this book will find a wide audience.

This comprehensive volume brings together international experts involved in applying and developing understanding of Working Memory in the context of a variety of neurodevelopmental disorders, neurocognitive disorders, and depressive disorders. Each chapter provides a description of the disorder and investigates the Working Memory and related Executive Function deficits. It goes on to provide a neurological profile, before exploring the impact of the disorder in daily functions, the current debates related to this disorder, and the potential effects of medication and intervention. Through combining coverage of theoretical understanding, methods of assessment, and different evidence-based intervention programs, the book supports clinical assessment and management of poor Working Memory. It is essential reading for students in neurodevelopmental disorders, atypical development and developmental psychopathology as well as allied health professionals, clinicians and those working with children in education and healthcare settings.

The book shows how to use Planning by Design (PxD) for developing working models to any type of subject area. Section 1 describes the nature of planning in general, the formula of planning, the features that make it systematic, the essence of PxD, and developing and using the working model. Section 2 demonstrates personal application of creative planning to real life cases and practical working models on different subject areas. The book provides a general planning "master guide" that shows how to develop a working model of any definable subject matter. This objective will be accomplished by introducing the concepts, the process, and the methodology of PxD.

National Book Critics Circle Award Winner: “The terrifying story of the worst disaster in the history of the US Forest Service’s elite Smokejumpers.” —Kirkus Reviews A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service’s elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in this extraordinary book. Alongside Maclean’s now-canonical *A River Runs Through It* and *Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This edition of Maclean’s later triumph—the last book he would write—includes a powerful new foreword by Timothy Egan, author of *The Big Burn* and *The Worst Hard Time*. As moving and

profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul.
