Robert Simpson (1921-1997) is widely regarded as the most important British composer in the generation following Benjamin Britten. He wrote 11 symphonies, 15 string quartets, much other chamber music and works for brass band. He also wrote definitive

studies of Bruckner and Nielsen. A committed socialist and pacifist, Simpson worked as a volunteer on a mobile surgical unit during the London blitz. Brought up in the Salvation Army, he later rejected religion, and never tried to ingratiate himself with the establishment, politely refusing a CBE and resigning as a senior music producer for the BBC after almost thirty years' service on a point of principle. This is the authorised biography and follows a narrative of his life and works with a series of articles by the composer [The American Printer](#) Bloomsbury Publishing

Raised to be "flowers of the nation," the first generation born after the founding of the People's Republic of China was united in its political outlook and at first embraced the Cultural Revolution of 1966, but then split into warring factions. Investigating the causes of this fracture, Guobin Yang argues that Chinese youth engaged in an imaginary revolution from 1966 to 1968, enacting a political mythology that encouraged violence as a way to prove one's revolutionary credentials. This same competitive dynamic would later turn the Red Guard against the communist

government. Throughout the 1970s, the majority of Red Guard youth were sent to work in rural villages, where they developed an appreciation for the values of ordinary life. From this experience, an underground cultural movement was born. Rejecting idolatry, these relocated revolutionaries developed a new form of resistance that signaled a new era of enlightenment, culminating in the Democracy Wall movement of the late 1970s and the Tiananmen protest of 1989. Yang's final chapter on the politics of history and memory argues that contemporary memories of the Cultural Revolution are factionalized along these lines of political division, formed fifty years before.

In a remarkably short period of time, the realization of religious freedom has achieved broad consensus as an indispensable condition for peace. Faced with widespread reports of religious persecution, public and private actors around the world have responded with laws and policies designed to promote freedom of religion. But what precisely is being promoted? What are the cultural and epistemological assumptions underlying this response, and what forms of politics are enabled in the process? The fruits of the three-year Politics of Religious Freedom research project, the contributions to this volume unsettle the assumption—ubiquitous in policy circles—that religious freedom is a singular achievement, an easily understood state of affairs, and that the

problem lies in its incomplete accomplishment. Taking a global perspective, the more than two dozen contributors delineate the different conceptions of religious freedom predominant in the world today, as well as their histories and social and political contexts. Together, the contributions make clear that the reasons for persecution are more varied and complex than is widely acknowledged, and that the indiscriminate promotion of a single legal and cultural tool meant to address conflict across a wide variety of cultures can have the perverse effect of exacerbating the problems that plague the communities cited as falling short.

Let's Cross Before Dark... A History of the Ferries, Fords and River Crossings of Texas The state of Texas claims over 12,000 named rivers and streams stretching approximately 80,000 linear miles within its boundaries. In this book, Bill Winsor identifies and locates over 550 named river crossings within the state that once served as vital destinations for Native Americans, European explorers, and Mexican and American soldiers and colonists. Winsor has catalogued their origins and histories. Included in the work are maps of major rivers and their crossings as well as select images of early ferry operations of Texas. In addition to an

alpha index of the crossings, the 625-page book presents an in-depth examination of the roles principal rivers and their crossings assumed in the framing of Texas history. Each of its fourteen chapters explores the founding of these various sites and the characters that brought them to life. This information, under one cover, presents an incomparable resource for future generations to better understand and appreciate the historical relevance of these vanishing theaters of history. *ROAR* American Library Association An analysis of Islamist cultural politics through the ethnography of a thriving, grassroots women's piety movement in the mosques of Cairo, Egypt. Unlike those organized Islamist activities that seek to seize or transform the state, this

is a moral reform movement whose orthodox practices are commonly viewed as inconsequential to Egypt's political landscape. The author's exposition of these practices challenges this assumption by showing how the ethical and the political are linked within the context of such movements.

This book is the product of dialogue between a group of leading British Muslim and Christian scholars concerned about the alleged danger to the 'West' of Islamic 'fundamentalism'. It analyses the

ethical and legal principles, rooted in both traditions, underlying any use of armed force in the modern world. After chapters on the history, theology and laws of war as seen from both sides, the book applies its conclusions to (a) the 1990-91 Gulf War and (b) the Bosnian Conflict. It concludes that Huntington's 'Clash of Civilisations' thesis is a dangerous myth.

How secular governance in the Middle East is making life worse—not better—for religious minorities The plight of religious minorities in the Middle East is often attributed to the failure of secularism to take root in the region. Religious Difference in a Secular Age

challenges this assessment by examining four cornerstones of secularism—political and civil equality, minority rights, religious freedom, and the legal separation of private and public domains. Drawing on her extensive fieldwork in Egypt with Coptic Orthodox Christians and Bahais—religious minorities in a predominantly Muslim country—Saba Mahmood shows how modern secular governance has exacerbated religious tensions and inequalities rather than reduced them. Tracing the historical career of secular legal concepts in the colonial and postcolonial Middle East, she explores how contradictions at the very heart of political secularism have aggravated and amplified existing forms of Islamic hierarchy, bringing minority relations in

Egypt to a new historical impasse. Through a close examination of Egyptian court cases and constitutional debates about minority rights, conflicts around family law, and controversies over freedom of expression, Mahmood invites us to reflect on the entwined histories of secularism in the Middle East and Europe. A provocative work of scholarship, *Religious Difference in a Secular Age* challenges us to rethink the promise and limits of the secular ideal of religious equality.
