Does the Holy Spirit do the same things now and in the New Testament times that He did in Old Testament times? Volume one in the NEW AMERICAN COMMENTARY STUDIES IN BIBLE AND THEOLOGY series for pastors, advanced Bible students, and

other deeply committed laypersons addresses this challenging subject. God's Indwelling Presence asks and explores to answer: What are the spiritual differences and similarities between Old Testament and New Testament believers? Did God dwell in Old Testament believers as He does in New Testament believers? Were Old Testament believers born again (that is, experience regeneration)? What do the words indwelling and regeneration mean? How is the Holy Spirit's ministry similar or different during Old Testament and New Testament times? Users will find this an excellent extension of the long-respected NEW AMERICAN COMMENTARY.

Reflecting the latest practices in the field, *Clinical Decision Making: Case Studies in Medical-Surgical Nursing*, 2nd edition

bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles.

Master the essential medical-surgical nursing content you'll need for success on the Next Generation NCLEX(R) Exam (NGN) and safe clinical practice! Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 10th Edition uses a conceptual approach to provide adult health knowledge and help you develop the clinical nursing judgment skills that today's medical-surgical nurses need to deliver safe, effective care. "Iggy" emphasizes three emerging trends in nursing — interprofessional collaborative care, concept-based learning, and clinical judgment and systems thinking — trends that will ground you in how to think like a nurse and how to apply your knowledge in the classroom, simulation laboratory, and

clinical settings. A perennial bestseller, "Iggy" also features NCLEX Exam-style Challenge and Mastery questions to prepare you for success on the NGN! Consistent use of interprofessional terminology promotes interprofessional collaboration through the use of a common healthcare language, instead of using isolated nursing-specific diagnostic language. UNIQUE! Enhanced conceptual approach to learning integrates nursing concepts and exemplars, providing a foundation in professional nursing concepts and health and illness concepts, and showing their application in each chapter. Unparalleled emphasis on clinical reasoning and clinical judgment helps you develop these vital skills when applying concepts to clinical situations. Emphasis on QSEN and patient safety focuses on safety and evidence-based practice with Nursing Safety Priority boxes, including Drug Alert, Critical Rescue, and Action Alert boxes. Direct, easy-to-read writing style features concise sentences and straightforward vocabulary. Emphasis on health promotion and community-based care reflects the reality that most adult health care takes place in environments

outside of high-acuity (hospital) settings.

**Surgical Setting** Elsevier Health Sciences  
Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States

report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes

recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. *Social Isolation and Loneliness in Older Adults* considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.
