JOHNS RIOS

The Astronaut Wives Club Booktango
 Here men from the planet earth. First set foot upon the moon - July 1969 A.D. We Came in peace for all mankind. From the plaque on the Eagle, Apollo 11, which landed on the moon on July 20, 1969.
Marketing the Moon Macmillan
 A secret engine design concept unexpectedly lands in private pilot Jay Foster's lap, leading him on a journey to discover what could be the most important invention of the millennium, as well a grand adventure beyond his wildest dreams. But first, the young man must look within to silence any self-doubt that's there and draw out the natural power just waiting to be tapped. At the same time, he calls on close

friends Kyle, Brian, Trent and Jean to help him discover, and then uncover, the practical uses of this world-changing invention. Just when Jay begins to secretly test flight this remarkable find, interested government agencies begin to monitor and track him. Using his intimate knowledge of the Puget Sound land and seascape, Jay is able to elude his pursuers to fully test his creation. Succeeding with the help of some surprising government allies, Jay finishes with a demonstration that is truly out of this world, ensuring a happy - and very wealthy - future for himself and his friends.

[Flying to the Moon](#) National Geographic Children's Books

Based on the adult bestseller Carrying the Fire In time for the 50th anniversary

of man's first landing on the moon, this re-release of Michael Collins's autobiography is a bold, sparkling testament to exploration and perseverance. In this captivating account, space traveler Collins recalls his early days as an Air Force test pilot, his training at NASA, and his unparalleled experiences in orbit, including the Apollo 11 mission, the first manned lunar landing. The final chapter to this autobiography is an exciting and convincing argument in favor of mankind's continued exploration of our universe. Originally published in 1976 and updated for this new edition, including an introduction from astronaut Scott Kelly, Collins's voice and message are sure to resonate with a new generation of readers.

Sally Ride Grand Central Publishing
About the Book The year is 2080 and man is to re-live yet another war. He continues to explore the outer limits to find answers to his many questions. Unfortunately, as he finds answers, they merely result in more questions. However, he cannot find the answer for

avoiding war. The technology of war changes, but the causes remain the same. Who would guess the tools of science, now "space litter", would fuel a global conflict? The stage is set as two lovers forge their lives together and invent new technology to overcome forces set in motion by man's many years of neglect. A new hero arises from the ranks: G.I. Joe Rieu. About the Author Jerry R Brenning lives with his wife of 55 years in Indian Lake Estates, Florida. After a long engineering career, he is able to pursue his passion for painting and inventing. After years of seeing man inventing ways to explore our world, it is obvious that something is missing. I believe space litter is a hidden problem, destined for disaster.

The former head of a lunar mining operation returns to the moon and is immediately sucked into a dangerous morass of labor troubles, lies, larceny, and corporate wrongdoing in this wildly entertaining science fiction thrill ride

There is big trouble on the moon. The blue-collar working stiffs of Descartes Station, who mine the surface for minerals and the North Pole for water, have become increasingly dissatisfied with Skycorp's general disregard for its employees' well-being. Following the most recent spate of layoffs, the labor strike grumblings have only grown louder, so the company is sending former base administrator and recovering alcoholic Lester Riddell back into the fold in an attempt to boost morale and output alike. The truth, however, becomes shockingly apparent to Riddell almost immediately upon his return. Not only has he been unceremoniously dumped into a muddled mess of larceny, piracy, and corporate malfeasance, it appears that

Skycorp is purposely setting him up to fail—which could spell finis for Descartes Station and every trash-talking, pot-smoking, porn-loving Vacuum Sucker and Moondog who toils there. But as the Skycorp suits are about to discover, they've just made the biggest mistake of their corporate lives—because Lester Riddell is nobody's fall guy. Three-time Hugo Award winner Allen Steele has seen the near future, and it isn't pretty—it's noisy, dirty, dangerous, and chaotic. Thrilling, wildly inventive, delightfully profane, and totally outrageous, *Lunar Descent* is one hell of a rocket ride, with a master of science fiction at the helm.

[Why I Don't Call Myself Gay](#) Ignatius Press

Daniel Mattson once believed he was

gay. Raised in a Christian family, and aware of attractions to other boys at age six, Mattson's life was marked by constant turmoil between his faith in God and his sexual attractions. Finding the conflict between his sexual desires and the teachings of his church too great, he assumed he was gay, turned his back on God, and began a relationship with another man. Yet freedom and happiness remained elusive until he discovered Christ and his true identity. In this frank memoir, Mattson chronicles his journey to and from a gay identity, finding peace in his true identity, as a man, made in the image and likeness of God. Part autobiography, part philosophy of life, and part a practical guide in living chastely, the book draws lessons from Mattson's

search for inner freedom and integrity, sharing wisdom from his failures and successes. His lifelong search for happiness and peace comes full circle in his realization that, above all else, what is true about him is that he is a beloved son of God, loved into existence by God, created for happiness in this life and the next. Mattson's book is for anyone who has ever wondered who he is, why he is here, and, in the face of suffering, where to find joy, happiness, and the peace that surpasses all understanding. *Texas Monthly* Workman Publishing
This is perhaps the most complete, detailed and readable story of manned space-flight ever published. The text begins with the historical origins of the dream of walking on the Moon, covers the earliest Mercury and Gemini flights

and then moves on to the end of the Apollo era. In readable, fascinating detail, Hamish Lindsay - who was directly involved in all three programs - chronicles mankind's greatest adventure with a great narrative, interviews, quotes and masses of photographs, including some previously unpublished. In addition to bringing the history of these missions to life the book serves as a detailed reference for space enthusiasts and students.

Billboard Dorrance Publishing

Who killed Dr. Laurel Hent? Algernon Hent wants to know, and he's been asking the only survivor and witness of the brutal murder to spill the beans for the last thirty-two years. Just one little problem: that witness is Algernon Hent, and he isn't talking. The doctors call it 'hysterical amnesia'. Real Problem: Algernon is about to get his answer. With Congress threatening to cut NASA's funding for their Manned Mars Mission, the Into Known Space Group kicks into high gear and buys a salvage yard single stage to orbit shuttle all their own. Now all they need is a hundred sixty million

dollars to refit it. Enter Algernon Hent. A fervid pro-space advocate and professional Science Fiction writer who has been roving the continent in his thirty foot RV, Wally the Wonder Wagon, for the last eighteen years, Algernon arrives at the 77th annual World Science Fiction Convention, currently in progress at the Orange County Convention Center in Anaheim, Ca. to host an auction of items to benefit the Into Known Space Group, with the aim of getting their shuttle off the ground. The two flies in this ointment labelled 'blissful weekend spent among friends and fans' are

- 1) Trish Mulhouse, a reporter who blows the lid off Algernon's decades-long disavowal of bloodties to Dr. Hadleigh Hent, renowned genetic research scientist and founder and former head of

- 2) Alger's middle sister, Honoria, current head and chief researcher at Hent Labs, who has had it in for Alger ever since a youthful indiscretion with his older sister, Lenore, resulted in an unplanned addition to the family tree and Alger's own attempted suicide. After two years in a Rehabilitation clinic, Alger left home, only to have Honoria hire a pack of goons to track him down for the sole purpose of putting a powerful hurt on him, which has landed him in the hospital five times to date. He has tried, for that reason, to keep his whereabouts a secret from his family ever since, but, like a deer caught in Trish's headlights, things go from bad to worse when Honoria spots him on Trish's live

broadcast and calls to put in her two cents worth on global TV. Alger has no choice but to bolt and run. But Honoria and her goons aren't the only ones who have been chasing Alger. His High School sweetie, Sydney St. Croix, and her current husband, Avery Norris, owner and chief researcher for Gene-tech, Hent Laboratories's biggest and most vicious competitor, and Laurel Hent's former paramour, are also after him. When they catch him, they send him on a drug-assisted journey back in time to reconstruct his repressed memory, which reveals, at long last, the identity of his mother's murderer plus a whole raft of Hent family secrets. When the skeletons start rattling, Honoria takes lethal steps to throw them back into the closet where they belong. And as the

body count rises, Algernon has to think fast to save his life and bring his mother's killer to justice!

Discover the true story of the women who stood beside some of the greatest heroes of American space travel in this New York Times bestseller that delivers

"a truly great snapshot of the times" (Publishers Weekly) that inspired a limited TV series on ABC! As America's Mercury Seven astronauts were launched on death-defying missions, television cameras focused on the brave smiles of their young wives. Overnight, these women were transformed from military spouses into American royalty. They had tea with Jackie Kennedy, appeared on the cover of Life magazine, and quickly grew into fashion icons. Annie Glenn, with her picture-perfect marriage, was the envy of the other wives; JFK made it clear that platinum-blond Rene Carpenter was his favorite; and licensed pilot Trudy Cooper arrived with a secret that needed to stay hidden from NASA. Together with the other wives they formed the Astronaut Wives

Club, providing one another with support and friendship, coffee and cocktails. As their celebrity rose--and as divorce and tragedy began to touch their lives--the wives continued to rally together, forming bonds that would withstand the test of time, and they have stayed friends for over half a century.

Lunar Descent MIT Press

Describes and provides illustrations of the kinds of space exploration that may be done in the near future, and discusses the economic and political implications for the people of the earth

The First Men on the Moon Dorrance Publishing

One of the most successful public relations campaigns in history, featuring heroic astronauts, press-savvy rocket scientists, enthusiastic reporters, deep-

pocketed defense contractors, and Tang. In July 1969, ninety-four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon. How did space exploration, once the purview of rocket scientists, reach a larger audience than *My Three Sons*? Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience? In *Marketing the Moon*, David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history: the selling of the Apollo program. Primed by science fiction, magazine articles, and appearances by Wernher von Braun on the "Tomorrowland" segments of the

Disneyland prime time television show, Americans were a receptive audience for NASA's pioneering "brand journalism." Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel—through press releases, bylined articles, lavishly detailed background materials, and fully produced radio and television features—rather than push an agenda. American astronauts, who signed exclusive agreements with *Life* magazine, became the heroic and patriotic faces of the program. And there was some judicious product placement: Hasselblad was the "first camera on the moon"; Sony cassette recorders and supplies of Tang were on board the capsule; and astronauts were equipped with the Exer-Genie personal exerciser.

Everyone wanted a place on the bandwagon. Generously illustrated with vintage photographs, artwork, and advertisements, many never published before, *Marketing the Moon* shows that when Neil Armstrong took that giant leap for mankind, it was a triumph not just for American engineering and rocketry but for American marketing and public relations.

NASA EP. Open Road Media

An action-packed thriller about two men living very different lives: one, a successful corporate consultant; the other, a former CIA agent known only as "Pilgrim," whose current assignment for

a fringe espionage agency is so treacherous he doesn't trust even his own boss. Ben Forsberg is a successful corporate consultant who is mourning the murder of his new bride. "Pilgrim" is a former CIA agent who is weary from the long years of living in the shadows. When Ben's business card turns up in the pocket of a dead hit man, Ben and Pilgrim, two complete strangers, realize that they've been framed in an elaborate setup. Unsure who to trust-and pursued by a brutal and vengeful killer-the unlikely partners have no choice but to work together to discover who's targeted them for elimination-and why. But with

everything at stake, Ben has no idea that Pilgrim is harboring some shocking secrets of his own-secrets that will soon force Ben to confront the blurred line between best friends and bitter enemies.
