When, in 1960, France granted independence to its colonies in West and Central Africa-an empire covering an area the size of the contiguous United States-the French still intended to retain influence in Africa. Through a system of accords with these newly independent African nations, based upon ties naturally formed over the colonial years, France has succeeded for three decades in preserving its position in African affairs. The course of Franco-African relations in the near future, though, is less than certain. In this book, Ambassador Francis Terry McNamara outlines France's acquisition and administration of its Black African empire and traces the former colonies' paths to independence. Drawing upon that background, the ambassador examines the structure of post-independence Franco-African relations and recent strains on those relations, especially African economic crises and the French tendency to focus on Europe. Because of those strains, he suggests, France alone may be unable to support its former dependencies much longer. He believes that long-term solutions to African problems will have to involve international organizations like the World Bank and International Monetary Fund as well as other nations such as the United States and France's European partners. -- From Foreword.

Evoquer en 2022 les Tours de France d'avant-guerre peut vous sembler un peu anachronique. C'est évidemment d'un tout autre cyclisme qu'il s'agit, sur des routes encore rarement asphaltées, sur des vélos qui étaient loin des technologies actuelles. Mais derrière ce décor presque centenaire se cachent les belles histoires du sport

cycliste, celles qui ont forgé sa légende. En instaurant en 1930 la nouvelle formule des équipes nationales, le créateur du Tour Henri Desgrange a fait prendre un tournant décisif à son épreuve, dont la popularité est alors montée en flèche, portée par une génération de coureurs français exceptionnelle. Vous suivrez au fil des pages les exploits des tricolores, qu'il s'agisse d'André Leducq, Antonin Magne, Georges Speicher ou Roger Lapébie, pour ne citer que de ceux qui ont réussi à ramener le maillot jaune à Paris. Mais vous croiserez aussi le regard triste de René Vietto, qui fait partie de ces perdants magnifiques, comme les Français les ont toujours aimés, ou l'immense Charles Pélissier, qui a contribué à révolutionner l'image du coureur cycliste. Vous apercevrez également au détour d'un virage dans le col de l'Izoard, la silhouette élégante de Sylvère Maes, ou encore l'inoubliable Gino Bartali, porteur d'une mission quasi divine, et tous ces champions, parfois oubliés, qui ont contribué à la magie du Tour. À PROPOS DE L'AUTEUR Journaliste et écrivain, Jean-François Supié, originaire de Bourg-en-Bresse, est surtout un passionné de l'histoire du cyclisme. Il signe ici un troisième opus après une biographie consacrée à Roger Pingeon (Entre gloire et tourments -Editions Mareuil) et un récit sur les Tours de France des années 1920 (Le Tour au temps des forçats et des ténébreux - Editions Amphora). The Maronite Church is one of twenty-two Eastern Catholic Churches in communion with the Pope of Rome. Her patriarch is in Lebanon. Forty-three bishops and approximately five million faithful make up her presence throughout the world. The story of Maron, a fifth-century hermit-priest, and the community gathered

around him, later called the Maronites, tells another fascinating story of the monastic and missionary movements of the Church. Maron's story takes place in the context of Syrian monasticism, which was a combination of both solitary and communal life, and is a narrative of Christians of the Middle East as they navigated the rough seas of political divisions and ecclesiastical controversies from the fourth to the ninth centuries. Abbot Paul Naaman, a Maronite scholar and former Superior General of the Order of Lebanese Maronite Monks, wisely places the study of the origins of the Maronite Church squarely in the midst of the history of the Church. His book, *The Maronites: The Origins of an Antiochene Church*, published during the sixteenth centenary of Maron's death, offers plausible insights into her formation and early development, grounding the Maronite Church in her Catholic, Antiochian, Syriac, and monastic roots. Abbot Paul Naaman is a Maronite scholar and former Superior General of the Order of Lebanese Maronite Monks. " To strengthen the contemporary focus of this volume, we have added about forty architects and have deleted some whose activity ceased before World War II. In making these decisions, we have been assisted by an Advisory Board. As in the first volume, we have continued to define the word "architect" very broadly, so as to include planners, theorists, structural engineers, and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day." --Editor's note.

The result of years of work by scholars from all over the world, The UNESCO

General History of Africa reflects how the different peoples of Africa view their civilizations and shows the historical relationships between the various parts of the continent. Historical connections with other continents demonstrate Africa's contribution to the development of human civilization. Each volume is lavishly illustrated and contains a comprehensive bibliography. This fifth volume of the acclaimed series covers the history of the continent from the beginning of the sixteenth century to the close of the eighteenth century in which two themes emerge: first, the continuing internal evolution of the states and cultures of Africa during this period second, the increasing involvement of Africa in external trade--with major but unforeseen consequences for the whole world. In North Africa, we see the Ottomans conquer Egypt. South of the Sahara, some of the larger, older states collapse, and new power bases emerge. Traditional religions continue to coexist with both Christianity (suffering setbacks) and Islam (in the ascendancy). Along the coast, particularly of West Africa, Europeans establish a trading network which, with the

development of New World plantation agriculture, becomes the focus of the international slave trade. The immediate consequences of this trade for Africa are explored, and it is argued that the long-term global consequences include the foundation of the present world-economy with all its built-in inequalities.
