Aashi Rani, the unrivalled number one of Bombay cinema, seems intent on ruining her career and her life blinded by a scorching passion that threatens to destroy everything she has attained.

Modern Art, 19th and 20th Centuries
Bibliothèque publique d'information du Centre Pompidou

Le Centre Pompidou présente la plus grande rétrospective consacrée à ce jour au travail de Franz West (1947-2012) avec près de 200 œuvres. Conçu en

collaboration avec la Tate Modern, cet événement est l'occasion d'évaluer la postérité de l'artiste autrichien, l'un des plus influents de ces cinquante dernières années. Réfléchissant aux questions esthétiques, inversant les notions de "laid" et de "beau", redéfinissant la sculpture par rapport au corps et au spectateur, Franz West qui se veut inclassable, occupe une place à part. Préfigurant le "trash", son œuvre irrévérencieuse mêle humour et subversion. La lecture de Freud et des philosophes tels Wittgenstein, Kant ou Deleuze, nourrit son travail dont émanent des manifestations et des indices de l'inconscient.

Once there were a people known as the Saxons. They lived in the area that is now a part of the Eastern Netherlands and Northwestern Germany. While some in the tribe fled with the Angles and Jutes to settle Britannia, many Saxons remained in Saxony. For 350 years after some migrated to Britain, the Saxons were still a powerful tribe, and a well-populated tribe. They spoke their own language and they had their own religion. Robert Sass explains the culture, history, religion, and language of the Saxons showing the

greatness of the once powerful tribe. THIS IS THE FINAL EDITION

Propaganda Springer-Verlag

The Virginia & Truckee is the most famous short line railroad in American history. Brainchild of William Sharon and the Bank of California, the V&T hauled the silver and gold ore, the cordwood, and the mining timbers that made the 1870s "Big Bonanza" a reality. From the state capital at Carson City, V&T rails stretched 66 miles to Virginia City, Reno, and Minden, Nevada. Serving the transportation needs of the Comstock's nearly 40,000 inhabitants, the V&T remained in operation until 1950. The enormously successful railroad paid its early owners handsome dividends. The V&T's ornate locomotives and cars have starred in hundreds of Hollywood productions and are now preserved in US museums. Since 1976, fourteen miles of the railroad have been restored to operation. The Virginia & Truckee has become an enduring legend.

Nevada's Virginia & Truckee Railroad

Semantic Web ist Vision, Konzept und Programm für die nächste Generation des Internets. Semantik ist dabei ein

wesentliches Element zur Transformation von Information in Wissen. Sie ermöglicht eine effizientere Maschine-Maschine-Kommunikation und verbessert durch Modellierung das Management von Geschäftsprozessen, Wissen und innerbetrieblicher Kooperation. Der Band richtet sich gleichermaßen an ein praxisorientiertes und wissenschaftliches Publikum, das mehr als den technischen Zugang zum Thema sucht. Eine Fülle von Anwendungsbeispielen offenbart den praktischen Nutzen, in denen semantische Technologien zum Einsatz kommen.

The Sun and Her Flowers Vintage

Divided into five chapters and illustrated by kaur, the sun and her flowers is a journey of wilting, falling, rooting, rising, and blooming. A celebration of love in all its forms. this is the recipe of life said my mother as she held me in her arms as i wept think of those flowers you plant in the garden each year they will teach you that people too must wilt fall root rise in order to bloom

"Kevin Connolly has used an unusual physical circumstance to create a gripping

work of art. This deeply affecting memoir will place him in the company of Jeanette Walls and Augusten Burroughs." — Sara Gruen, author of *Water for Elephants*
 "Charming ... Connolly recounts growing up a scrappy Montana kid—one who happened to be born without legs... [Double Take] makes for an empowering read." — People As featured on 20/20, NPR, and in the Washington Post: Kevin Connolly is a young man born without legs who travels the world—by skateboard, with his camera—on his "Rolling Exhibition," snapping pictures of peoples' reactions to him... and finds out along the way what it truly means to be human.
The Vitamin A Story Oxford University Press

This volume gathers the harvest of recent doctoral dissertations on South Asia, principally from North America and Western Europe, but exclusive of theses from universities in South Asia itself. The yield—1305 dissertations based on research carried out during the early and middle nineteen-sixties and brought to completion between 1966 and 1970—is even greater than one would have guessed, eloquent testimony to the

expansion of South Asian studies in the West over the last decade. *Doctoral Dissertations on South Asia* seeks to be a comprehensive compilation of recently completed theses dealing in whole or in part with the former civilizations and the contemporary affairs of Ceylon, India, Nepal and Pakistan. At the same time, this work provides striking testimony of the dynamic growth of Asian Studies outside the subcontinent and particularly in the United States, Great Britain, Germany and France, where most of the major centers of scholarship are presently found. It is an interdisciplinary work covering the natural sciences as well as the humanities and social sciences.

Doctoral Dissertations on South Asia, 1966-1970 Penguin Books India

Consisting of more than 70 papers written by scholars concerned with pre-Christian Norse religion, the articles discuss subjects such as archaeology, art history, historical archaeology, history, history of ideas, theological history, literature, onomastics, Scandinavian languages, and Scandinavian studies. The interdisciplinary aim of the book brings together text-based and material-based researchers to

improve scholarly exchange and dialogue and provide a variety of contributions that elucidate topics such as worldview and cosmology, ritual and religious practice, myth and memory, as well as reception and present-day use of old Norse religion. *Images-pensées* New York : G. Braziller, 1978, 1979 printing.

The interdisciplinary study investigates the relationship between Norse and Saami peoples in the medieval period and focuses on the multifaceted portrayal of Saami peoples in medieval texts. The investigative analysis is anchored in postcolonial methodologies and argues for the inherent need to decolonise the medieval source-material as well as recent historiography. This is achieved by presenting the historiographic and political background of research into Norse-Saami relations, before introducing an overview of textual sources discussing Saami peoples from the classical period to the late 1400s, an analysis of the textual motifs associated with the Saami in medieval literature (their relevance and prevalence), geo-political affairs, trading relations, personal relations and Saami presence in the south. By using

decolonising tools to read Norse-Saami relations in medieval texts, influenced by archaeological material and postcolonial frameworks, the study challenges lingering colonial assumptions about the role of the Saami in Norse society. The current research episteme is re-adjusted to offer alternative readings of Saami characters and emphasis is put on agency, fluidity and the dynamic realities of the Saami medieval pasts.

The Third Biennale of Sydney at the Art Gallery of New South Wales Univ of California Press

In *On the Road Again*, William Wyckoff explores Montana's changing physical and cultural landscape by pairing photographs taken by state highway engineers in the 1920s and 1930s with photographs taken at the same sites today. The older photographs, preserved in the archives of the Montana Historical Society, were intended to document the expenditure of federal highway funds. Because it is nearly impossible to photograph a road without also photographing the landscape through which that road passes, these images contain a wealth of information about the state's environment during the early

decades of the twentieth century. To highlight landscape changes -- and continuities -- over more than eighty years, Wyckoff chose fifty-eight documented locations and traveled to each to photograph the exact same view. The pairs of old and new photos and accompanying interpretive essays presented here tell a vivid story of physical, cultural, and economic change. Wyckoff has grouped his selections to cover a fairly even mix of views from the eastern and western parts of the state, including a wide assortment of land use settings and rural and urban landscapes. The photo pairs are organized in thirteen "visual themes," such as forested areas, open spaces, and sacred spaces, which parallel landscape change across the entire American West. A close, thoughtful look at these photographs reveals how crops, fences, trees, and houses shape the everyday landscape, both in the first quarter of the twentieth century and in the present. The photographs offer an intimate view into Montana, into how Montana has changed in the past eighty years and how it may continue to change in the twenty-first century. This is a book that will

captivate readers who have, or hope to have, a tie to the Montana countryside, whether as resident or visitor. Regional and agricultural historians, geographers and geologists, and rural and urban planners will all find it fascinating.

Letters & Journal of W. Stanley Jevons
American School of Classical Studies at Athens

As the world is shaken by a virus, Shobhaa De – a writer who understands the human heart and how it beats – felt the need to document not just what she is going through personally but what the entire world is experiencing. And out of this need emerged many unique narratives ...

Lockdown Liaisons is a collection of short stories, from the varying perspectives of both men and women – young and old, brave and cowardly, cheerful and weighed down – each story an unique offering from a writer who understands how very fragile human relationships can be as they break, suffer and are redefined under trying circumstances. Explore, read and understand the subterranean world of shifting emotions during Covid-19, through stories that will speak to you. There is a woman with a young child who discovers

that she doesn't love her husband after all, there is a migrant worker who has to make a tough choice as he gets ready to walk hundreds of uncertain kilometres homewards. And many more. But what binds these stories together is love. These are stories that show how Covid-19 is affecting the hearts of hundreds of people as they struggle to make sense of altered circumstances, of the 'new normal' that will emerge in a post-Covid world.

ARTnews Arcadia Publishing

This book shows how vitamin A deficiency – before the vitamin was known to scientists – affected millions of people throughout history. It is a story of sailors and soldiers, penniless mothers, orphaned infants, and young children left susceptible to blindness and fatal infections. We also glimpse the fortunate ones who, with ample vitamin A-rich food, escaped this elusive stalker. Why were people going blind and dying? To unravel this puzzle, scientists around the world competed over the course of a century. Their persistent efforts led to the identification of vitamin A and its essential role in health. As a primary focus of today's international public health efforts, vitamin A has saved

hundreds of thousands of lives. But, we discover, they could save many more were it not for obstacles erected by political and ideological zealots who lack a historical perspective of the problem. Although exhaustively researched and documented, this book is written for intellectually curious lay readers as well as for specialists. Public health professionals, nutritionists, and historians of science and medicine have much to learn from this book about the cultural and scientific origins of their disciplines. Likewise, readers interested in military and cultural history will learn about the interaction of health, society, science, and politics. The author's presentation of vitamin A deficiency is likely to become a classic case study of health disparities in the past as well as the present.

The Norse Sorceress University of Washington Press

The Phoenicians created the Mediterranean world as we know it--yet they remain a poorly understood group. In this Handbook, the first of its kind in English, readers will find expert essays covering the history, culture, and areas of settlement throughout the Phoenician and

Punic world.

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing

program. Visit www.luminosoa.org to learn more. Language of the Snakes traces the history of the Prakrit language as a literary phenomenon, starting from its cultivation in courts of the Deccan in the first centuries of the common era. Although little studied today, Prakrit was an important vector of the kavya movement and once joined Sanskrit at the apex of classical Indian literary culture. The opposition between Prakrit and Sanskrit was at the center of an enduring "language order" in India, a set of ways of thinking about, naming, classifying, representing, and ultimately using languages. As a language of classical literature that nevertheless retained its associations with more demotic language practices, Prakrit both embodies major cultural tensions—between high and low, transregional and regional, cosmopolitan and vernacular—and provides a unique perspective onto the history of literature and culture in South Asia.

The Saxons Karger Medical and Scientific Publishers

The fifth part of the Corinth volume dedicated to the Sanctuary of Demeter and Kore publishes the large-scale

terracotta sculpture found in the sanctuary. Extending from the late 7th through the 4th century B.C., the sculpture consists of fragments from 132 to as many as 147 statues, from half- to nearly life-size. These are, for the most part, statues of young males, both draped and nude, although females and seated infants appear as well. Several introductory chapters discuss the types represented, the findspots and possible original placement of the sculptures, and the techniques involved in their construction. The fragments are presented in 156 well-illustrated catalogue entries. This volume greatly expands our knowledge of the history of Corinth, broadening our understanding both of cult practices at the site and of the manufacture of terracotta sculpture.

Revue clinique d'oculistique paraissant tous les mois Walter de Gruyter GmbH & Co KG

The New European Criminology gathers together leading criminologists from all over Europe to consider crime and responses to crime within and across national borders. For the first time it allows students to experience the most

exciting work in European criminology and to compare approaches to crime in different parts of Europe. The five sections of the book look at: * the effects of European harmonisation on crime * criminal justice, law enforcement and penal reform * organised crime, from the Mafia in Italy to drug running in the Balkans * local crime in international contexts * possible future directions for criminology and some suggestions for a new criminology of war.

Double Take Andrews McMeel Publishing
Old Norse literature abounds with descriptions of magic acts that allow ritual specialists of various kinds to manipulate the world around them, see into the future or the distant past, change weather conditions, influence the outcomes of battles, and more. While magic practitioners are known under myriad terms, the most iconic of them is the völvá. As the central figure of the famous mythological poem Völuspá (The Prophecy of the Völvá), the völvá commands both respect and fear. In non-mythological texts similar women are portrayed as crucial albeit somewhat peculiar members of society. Always veiled in mystery, the

völvur and their kind have captured the academic and popular imagination for centuries. Bringing together scholars from various disciplinary backgrounds, this volume aims to provide new insights into the reality of magic and its agents in the Viking world, beyond the pages of medieval texts. It explores new trajectories for the study of past mentalities, beliefs, and rituals as well as the tools employed in these practices and the individuals who wielded them. In doing so, the volume engages with several topical issues of Viking Age research, including the complex entanglements of mind and materiality, the cultural attitudes to animals and the natural world, and the cultural constructions of gender and sexuality. By addressing these complex themes, it offers a nuanced image of the völvá and related magic workers in their cultural context. The volume is intended for a broad, diverse, and international audience, including experts in the field of Viking and Old Norse studies but also various non-professional history enthusiasts. The Norse Sorceress: Mind and Materiality in the Viking World is a key output of the project Tanken bag Tingene

(Thoughts behind Things) conducted at the National Museum of Denmark from 2020 to 2023 and funded by the Krogager Foundation.

Starry Nights Mitchell Beazley

This seminal study and critique of

propaganda from one of the greatest French philosophers of the 20th century is as relevant today as when it was first published in 1962. Taking not only a psychological approach, but a sociological approach as well, Ellul's book outlines the

taxonomy for propaganda, and ultimately, its destructive nature towards democracy. Drawing from his own experiences fighting for the French resistance against the Vichy regime, Ellul offers a unique insight into the propaganda machine.
