*Cardiology* CRC Press

This book offers a state-of-the-art description of the complexity of the healthy and pathological respiratory system, with particular reference to the mechanics of the airways, lung and chest wall. Detailed information is provided on new insights into the mechanics of breathing that have been obtained through technological innovations in measurement systems, cutting-edge modeling techniques and novel approaches to functional imaging of the respiratory system. It is explained how these advances permit the assessment of emerging treatment approaches, including new drugs, innovative surgical techniques and modes of mechanical ventilation and new forms of rehabilitation. In order to ensure comprehensive coverage of the subject, the editor has assembled a multidisciplinary team of authors comprising basic scientists in respiratory medicine, chest and intensive care physicians and bioengineers involved in both modeling and instrumentation. The book is intended for intensive care physicians, respirologists, physiologists, rehabilitation specialists, basic scientists in respiration, research and clinical fellows, biomedical engineers involved with respiratory mechanics and respiratory therapists. They will update their knowledge and improve their clinical expertise.

*Advanced Cardiovascular Life Support (ACLS) Provider Manual - a Comprehensive Guide Covering the Latest Guidelines* Lippincott Williams & Wilkins Reducing Adolescent Risk: Toward an Integrated Approach focuses on common influences that result in a number of interrelated risk behaviors in order to design more unified, comprehensive prevention strategies. Edited by Daniel Romer, this book summarizes presentations and discussions held at the Adolescent Risk Communication Institute of the University of Pennsylvania Annenberg Public Policy Center. Concentrating on common causes for varied risk behaviors, a group of leading researchers and intervention specialists from different health traditions synthesize current knowledge about risks to adolescent health in several areas, including drugs and alcohol, tobacco, unprotected sex, suicide and depression, and gambling. Primarily intended for graduate students, scholars, and researchers in psychology, sociology, social work, and public health, Reducing Adolescent Risk is also an extraordinary resource for policy makers in government organizations and foundations.

*A Practical Guide to Fetal Echocardiography* John Wiley & Sons

The availability and diffusion of high-performance technologies has strengthened the role of CT angiography and MR angiography as simple and reliable techniques for the characterization and treatment planning of the main diseases of the cardiocirculatory system, an understanding of which has become essential for all radiologists. The aim of this book is to provide technical indications which are both concise and thorough regarding the main methods and examination techniques for performing high-quality CT angiography and MR angiography studies in a broad range of clinical settings. This is supported by a large number of cases and is rich with advice on image interpretation and practical suggestions for the evaluation and

reporting of the examinations. The text will therefore also aim to provide a comparison of the advantages and limitations of the two techniques in various diseases and vascular regions, thus offering indications to both the expert and trainee radiologist.
