Mrs Paws is the creation of Christine Gregory, and through a short series of stories, her antics and adventures with her and her friends come to light. On the door of a small room within the cottage of Mr and Mrs Gregory is a quaint little sign that reads 'Enchanted Teddy and Dolly Sanctuary', so called because there's something quite magical behind this door. It came as such a shock to Mrs Gregory when she realised that her cuddlesome bear, along with some of her friends, actually came to life. So read on and find out just what they get up to in this cosy little cottage, the mystical wood and, of course, the fairy

garden, but be sure not to tell anyone, this is your very own secret.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in

very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in

everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The BOSCH handbook series on different automotive technologies has become one of the most definitive sets of reference books that automotive engineers have at their disposal. Different topics are covered in a concise but descriptive way

backed up by diagrams, graphs and tables enabling the reader to comprehend the subject matter fully. This book discusses the basics relating to the method of operation of gasoline-engine control systems. The descriptions of cylinder-charge control systems, fuel-injection systems (intake manifold and gasoline direct injection), and ignition systems provide a comprehensive, firsthand overview of the control mechanisms indispensable for operating a modern gasoline engine. The practical implementation of engine management and control is described by the examples of various

Motronic variants, and the control and regulation functions integrated in this particular management systems. The book concludes with a chapter describing how a Motronic system is developed.

Britain's Greatest Warship recounts the story of Ark Royal and her 'people', from the laying down of her keel in 1943 and her first commission in 1955, through to her decommissioning in 1979 and her scrapping in 1980. Ark Royal played a crucial role in the development of Royal Naval fixed-wing aviation and pioneered the concept of carrier-

borne VSTOL aircraft. She saw extensive service during the 1960s and '70s, a time that witnessed many significant changes not only in Navy life, but also in the way seapower was used as a means of projecting national influence worldwide. Painting a vivid picture of life on board a class of Royal Navy warship that has now gone forever, the author brings the story of the 'Ark' alive using interviews and first-hand accounts. These range from former officers and crew, including admirals, captains and ship's company, to aircrew of the embarked Fleet Air Arm squadrons and the shipyard workers who built the 'Ark'. Fully illustrated with a rich selection of rare photographs, this book

is sure to appeal to all with an interest in the Royal Navy and its warships.
