IS DEATH THE FINAL  
CHAPTER? In The Big Book

of Reincarnation, Roy Stemman attempts to answer one of the big questions of existence: Is death the end? Or, is it merely the end of a chapter in the book of existence? A self-described "skeptical

believer," Stemman uses his skills as a professional journalist to perform an in-depth exploration of reincarnation. Using case studies, anecdotes, and physical evidence from the best-documented cases from around the

world, Stemman shines a bright light on this subject, inviting readers to decide for themselves on the basis of facts, rather than on the basis of hearsay, speculation, and superstition. Stemman finds fascinating examples of evidence of reincarnation in the nightmares of a Louisiana bayou boy, the past-life recall of a renowned neurosurgeon, the research of a highly respected university professor, and the unique system of governance in the mountains of Tibet, to

name just a few. He examines the lives of those affected by reincarnation, such as children who can actually remember their previous lives. Instead of shying away from the skeptics, Stemman evaluates their leading theories and compares them to the findings that he has accumulated throughout his global research. The Big Book of Reincarnation is thorough, well researched, engaging, and the most comprehensive book ever published on this

fascinating subject.

We often open the newspapers to read shocking news about terrorist attacks around the world. In the last decade or so, the fear which has been associated to suicide terrorists has only increased manifold at an alarming rate. And, if we ask ourselves deep down in our hearts we would have to admit that we have been almost entirely biased in our thoughts

and views about the actions of suicide bombers. In Suicide Terrorism A Solution, debut Indian author, K.C. Eldho, has drawn upon his vast experience as a lawyer and his groundbreaking and tireless research in understanding the real actions of a suicide terrorist. Combining lucid accounts of new studies with insights into philosophy and psychology, Eldho gives us a narrative that is as entertaining as it is thought-provoking. This

work is essentially about the philosophical and psychological aspect behind the act of suicide terrorism and attempts to impartially view the act of suicide terrorists who, contrary to popular belief, do not have any previous history of a criminal act and are a highly educated and financially sound class of people. The theoretical finding of the authors analysis forms a major part of the book which proves that suicide bombers are either brain washed or under indoctrination. Upon

reading this book, you'll learn why Suicide terrorists choose the path we all know to be forbidden and gain revealing insights of a subject which has been rarely delved into.

Rise of Anthropology in India Springer Nature

This book is for anyone with an interest in Environmental Science who wants to learn more outside of a formal classroom setting. It can also be used by home,schooled students, tutored students, and those people wishing to change careers. The

material is presented in an easy-to-follow way

**An Introduction to Mechanics** Sarup & Sons

This book presents multidisciplinary critical engagement in Tribe-British relations, the interfacing between colonial mind and tribal worldview, and some of their contemporary implications to conceptualise tribal space and mobilisation at national, regional, and native levels. The approach, argument, and theoretical underpinnings introduce a new

perspective dimension of enquiry in tribal studies and enlarge its scope as a distinct academic discipline. It provides theoretical and methodological insights and an innovative analytical frame for a grand intellectual engagement beyond the boundary of conventional disciplines but within the interactive matrix of India's social, cultural, political, religious, and economic space. The book is a pioneering work in the emerging field of tribal studies and a vital

reference point for students and academics and non-academics alike who are engaged in tribal issues.

This textbook provides

students with fundamentals and advanced concepts in optimization and operations research. It gives an overview of the historical perspective of operations research and explains its principal characteristics, tools, and applications. The wide range of topics covered includes convex and concave functions, simplex methods, post optimality analysis of linear programming problems, constrained and unconstrained optimization, game

theory, queueing theory, and related topics. The text also elaborates on project management, including the importance of critical path analysis, PERT and CPM techniques. This textbook is ideal for any discipline with one or more courses in optimization and operations research; it may also provide a solid reference for researchers and practitioners in operations research. The original Article 45 in the Directive Principles of State Policy in the Constitution mandated the State to endeavour to provide free and compulsory education to all children up to age 14 within a period of 10 years. The national policy on Education (NPE), 1986/92, states. It seems the positive role of Universal Elementary Education (UEE) in strengthening the socio-economic base of a nation cannot be over -

emphasised. Recognising the importance of it. A new Article 21A was added in Part I of the Constitution of India to make free and compulsory elementary education a fundamental right for children. The Right of Children to Free and Compulsory Education (or RTE) came into force in India with effect from 1 April 2010. Even before the RTE came into force, the Government of India's efforts were towards universalisation of elementary education in

the country. This paper describes the stages through which the RTE Act has come into effect and how, in the course of implementing the RTE Act, the existing system has been changed and aligned with a view to fulfill its objectives. It also discusses how various other important schemes of the central and state governments.

**The Big Book of Reincarnation** Walter de Gruyter

This text describes advanced studies in applied mathematics and

applied physics. The text includes a discussion of vector analysis followed by its applications in particle mechanics and mechanics of rigid bodies. Each chapter contains solved problems and examples which help to illustrate the principles discussed in the chapter. The last two chapters deal with Lagrange's theorem and Hamilton's theorem and their applications in calculus of variations - a mathematical tool, needed in the study of applied mathematics and applied physics.

The world scenario today is changing at a fast pace. The present era is the era of new thinking and new behavior. For the entire world, this is an age of transition. This phase of transition in human behavior, social-cultural setup, political thinking and environmental changes is having a profound impact on the contemporary global scenario. Human thinking, activity and behavior are affected by a number of

economic, social, political, physical, technological and human forces. New issues related to the environment, society, culture, economy and political setup are emerging. There is a necessity for all the scholars, thinkers and scientists to work on these newly emerging issues and problems. The book entitled "Contemporary Global Issues and Challenges" is a small literary effort towards these contemporary global issues. The book consists

of 31 articles on various global issues. The book throws light on various socio-economic and environmental aspects like deforestation, global warming, pollution, degradation in coral ecosystem, soil pollution, waste management, cultural pollution, terrorism, dalits and globalization, social justice and law, use of remote sensing, impact of COVID-19, space research etc. Each article is a serious effort to understand the multi dimensions of each issue

and problem. We, the editors are very thankful towards the authors and contributors of this book. Articles included in this book are the example of their creative thinking and writing. For readers, we tried our best to convey the ideas and thoughts of our contributors in their original format. We express our gratitude towards our staff members and colleagues for their valuable contribution and suggestions. We are also thankful towards Mr. Rajdeep Sharma of

Sunrise Publishers, Jaipur for their nice composing and printing work. Dedicated to Maa Sarasvati and respected teachers.
