For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

East Asian Executive Reports Routledge First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Petrominer Oxford Business Group

This book is a toolkit for youth and young adult librarians—school and public—who wish to incorporate science, technology, engineering, art, and math (STEAM) into their programs and collections but aren't sure where to begin. Most educators are well aware of the reasons for emphasizing STEAM—topics that fall within the broad headings of science, technology, engineering, arts, and mathematics—in the curriculum, regardless of grade level. But how do librarians who work with 'tweens in middle school, high school, and public libraries—fit into the picture and play their roles to underscore their relevance in making STEAM initiatives successful? This book answers those key questions, providing program guidelines and resources for each of the STEAM areas. Readers will learn how to collaborate in STEAM efforts by providing information on resources, activities, standards, conferences, museums, programs, and professional organizations. Emphasis is placed on encouraging girls and minorities to take part in and get excited about STEAM. In addition, the book examines how makerspaces can enhance this initiative; how to connect your programs to educational standards; where to find funding; how to effectively promote your resources and programs, including how school and public librarians can collaborate to maximize their efforts; how to find and provide professional development; and how to evaluate your

program to make further improvements and boost effectiveness. Whether you are on the cusp of launching a STEAM initiative, or looking for ways to grow and enhance your program, this book will be an invaluable resource.

Thoroughly updated and expanded, *Fundamentals of Medium/Heavy Diesel Engines, Second Edition* offers comprehensive coverage of basic concepts and fundamentals, building up to advanced instruction on the latest technology coming to market for medium-

and heavy-duty diesel engine systems.

Quality Management and Accounting in Service Industries Xlibris Corporation

During the years between 1980 and 1999, in the midst of war and economic crisis, a record number of women were elected to national legislatures in Central American republics. Can quantitative increases in the presence of elected women in Central America produce qualitative political changes? In this detailed study, Michelle A. Saint-Germain and Cynthia Chavez Metoyer explore the reasons for this unprecedented political rise of women, and what effect it has had on the region. Focusing on Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua, the authors analyze national and regional indicators to evaluate various hypotheses concerning the reasons for women's electoral success in the region, as well as to make comparisons with findings from other world regions. They find that the election of more women depends on three things: the presence of a crisis, a pool of politically experienced women, and a culture of gender consciousness. They also compare the characteristics of Central American women legislators to women in other national legislatures around the world. The authors document how elected women have used their policy-making power to begin to change the lives of all Central Americans, women and men alike. In more than seventy-five in-depth, personal interviews, these women legislators reflect on their lives, political careers, and gender identities in their own words, providing deep insights into recent events in this region.

Consumption Tax Trends provides information on Value Added Taxes/Goods and Services Taxes (VAT/GST) and excise duty rates in OECD member countries. It also contains information about

international aspects of VAT/GST developments and the efficiency of this tax. It describes a range of other consumption taxation provisions on tobacco, alcoholic beverages, motor vehicles and aviation fuels.

Computerworld Roma TrE-Press

Il volume collettaneo analizza le tematiche connesse alla disciplina dei rapporti tra i diversi attori della filiera agroalimentare alla luce della Direttiva UE 2019/633 "in materia di pratiche commerciali sleali nei rapporti tra imprese nella filiera agricola e alimentare" e della sua attuazione negli Stati membri, nell'ottica della più ampia problematica della disciplina del mercato agroalimentare. In tale prospettiva, nella prima parte del volume la disciplina dei rapporti contrattuali della filiera agroalimentare viene inquadrata nell'ambito della PAC e della disciplina della concorrenza, evidenziandosi altresì le connessioni con altri profili di rilievo; nella seconda parte, l'analisi si concentra sull'attuazione della Direttiva UE 2019/633 nei diversi Stati membri, al fine di evidenziare i punti di forza e le debolezze del mutato quadro normativo europeo.

This 2016 OECD Economic Survey of Indonesia examines recent economic developments, policies and prospects. The special chapters cover: Regional Development and Public Spending.

Agrifood market regulation and contractual relationships in the light of directive (eu) 633/2019 University of Texas Press

This book is intended to introduce and familiarize design, production, quality, and process engineers, and their managers to the importance and recent developments in concurrent engineering (CE) and design for manufacturing (DFM) of new products. CE and DFM are becoming an important element of global competitiveness in terms of achieving high-quality and low-cost products. The new product design and development life cycle has become the focus of many manufacturing companies as a road map to shortening new product introduction cycles, and to achieving a quick ramp-up of production volumes. Customer expectations have increased in demanding high-quality, functional, and user-friendly products. There is little time to waste in solving manufacturing problems or in redesigning products for ease of manufacture, since product life cycles have become very short because of technological breakthroughs or competitive pressures. Another important reason for the increased attention to DFM is that global products have developed into very opposing roles: either they are commodities, with very similar features, capabilities, and specifications; or they are very focused on a market niche. In the first case, the manufacturers are competing on cost and quality, and in the second they are in race for time to market. DFM could be a very important competitive weapon in either case, for lowering cost and increasing quality; and for increasing production ramp-up to mature volumes.

Women Legislators in Central America iSmithers Rapra Publishing

How has the legal context of the family changed in Poland? Families are by no means monolithic but heterogeneous. They are jagged and dynamic and globalisation has altered their form as well as the perception of family as a fundamental value in Poland over time. In this work the preferred family structures and models of family life by Poles will be explored, as well as the question of how values around family have shifted for

Poles. The current legal regulations in Poland in the field of family law will also be debated to determine if they sufficiently support the goals and the function of a family.

DB2 Developer's Guide OECD Publishing

Originally published in 1989. This book presents the situation regarding energy provision and policy in developing countries. It looks at Enhanced Oil Recovery, Hydropower and small energy packages suitable for rural areas including renewable energies and the various needs and systems affected such as water pumping and telecommunications. Each section is broken down into salient issues and information is provided on environmental issues, socioeconomic issues, costs and limitations and what is considered the state-of-the-art in each area. The final section offers a view of the application of computing technology in energy planning.

Prison Nation OECD Publishing

"No country in history has ever handed over so many inmates to private corporations. This book looks at the consequences" (Eric Schlosser, bestselling author of Fast Food Nation). In Prison Profiteers, coeditors Tara Herivel and Paul Wright "follow the money to an astonishing constellation of prison administrators and politicians working in collusion with private parties to maximize profits" (Publishers Weekly). From investment banks, guard unions, and the makers of Taser stun guns to health care providers, telephone companies, and the US military (which relies heavily on prison labor), this network of perversely motivated interests has turned the imprisonment of 1 out of every 135 Americans into a lucrative business. Called "an essential read for anyone who wants to understand what's gone wrong with criminal justice in the United States" by ACLU National Prison Project director Elizabeth Alexander, this incisive and deftly researched volume shows how billions of tax dollars designated for the public good end up lining the pockets of those private enterprises dedicated to keeping prisons packed. "An important analysis of a troubling social trend" that is sure to inform and outrage any concerned citizen, Prison Profiteers reframes the conversation by exposing those who stand to profit from the imprisonment of millions of Americans (Booklist). "Indispensable . . . An easy and accessible read—and a necessary one." —The San Diego Union-Tribune "This is lucid, eye-opening reading for anyone interested in American justice." —Publishers Weekly "Impressive . . . A thoughtful, comprehensive and accessible

analysis of the money trail behind the prison-industrial-complex.” —The Black Commentator
