Kids and adults alike will enjoy "History of the World Cups" and will be able to surprise family and friends with everything they have learned in its more than 150 pages.

Journalistic Practice: Constructive Journalism Oxford [Eng.] : Clarendon Press

From tween advocate for limb difference and founder of Project Unicorn Jordan Reeves and her mom, Jen, comes an inspiring memoir about how every kid is perfect just the way they are. When Jordan Reeves was born without the bottom half of her left arm, the doctors reassured her parents that she was "born just right." And she has been proving that doctor right ever since! With candor, humor, and heart, Jordan's mother, Jen Lee Reeves, helps Jordan tell her story about growing up in an able-bodied world and family, where she was treated like all of her siblings and classmates—and where she never felt limited. Whether it was changing people's minds about her capabilities, trying all kinds of sports, or mentoring other kids, Jordan has channeled any negativity into a positive, and is determined to create more innovations for people just like her. Her most famous invention, aptly called Project Unicorn, is a special prosthetic (that shoots glitter!) made with the help of a 3-D printer. A real-life superhero, Jordan is changing the world with her foundation, Born Just Right,

which advocates and celebrates kids with differences, and helps them live their best possible life—just like Jordan is today!

One Some Many by Marthe Jocelyn and Tom Slaughter is an excellent early introduction to numbers and to the principles of modern art. It is the perfect companion to 1 2 3, a counting book with a difference. Slaughter's bold, Matisse-inspired paper cuts illustrate basic artistic elements, including color, form, and line, while the playful and inventive text introduces the concepts of quantity that children find most puzzling (and that adults have the most difficulty explaining!). After all, how many is many? Some? A few?

### **Numeralia** Aladdin

The complex relationship between nationalism and masculinity has been explored both historically and sociologically with one consistent conclusion: male concepts of courage and virility are at the core of nationalism. In this ground-breaking book, the author questions this assumption and advances the debate through an empirical analysis of masculinity in the revealing contexts of same-sex (football and polo) and cross-sex (tango) relations. Because of its rich history, Argentina provides the ideal setting in which to study the intersection of masculine and national constructs: hybridization, creolization and a culture of performance have all informed both gender and national identities. Further, the author argues that, counter to claims made by globalization theorists, the importance of performance

to Argentinian men and women has a long history and has powerfully shaped the national psyche. But this book takes the analysis far beyond national boundaries to address general arguments in anthropology which are not culture-specific, and the discussion poses important comparative questions and addresses central theoretical issues, from the interplay of morality and ritual, to a comparison between the popular and the aristocratic, to the importance of 'othering' in national constructions - particularly those relating to sport. This book represents a major contribution, not only to anthropology, but to the study of gender, nationalism and culture in its broadest sense.

*Color for Science, Art and Technology* Routledge

"The global tourism industry is a growing, dynamic mega industry, despite the temporary setbacks it has faced from time to time due to political and natural elements. This book approaches tourism development through a critical prism. The collection of articles by experts in international tourism relooks at the complex phenomenon of tourism development within a multidisciplinary framework."--BOOK JACKET.

Adolescents want media that report in an understandable way and show backgrounds and possible solutions. This book shows how the concept of constructive journalism helps with this and how it can be used in journalism training. This Springer essential is a translation of the original German 1st edition essentials, *Journalistische Praxis: Konstruktiver Journalismus* by Gabriele Hooffacker, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2020. The translation was done with the

help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

*Global Social Change* International Agency for Research on Cancer

Immanuel Wallerstein's World-System theory made a big impact on International Political Economy when it was first formulated in the early 1980s. Although subsequently criticised, the recent demise of the Soviet system's historic attempt to delink from global capitalism has provided a perhaps unanticipated confirmation of the profundity of its insights. Now with this new book, Wallerstein and a team of colleagues from the Fernand Braudel Center for the Study of Economies, Historical Systems and Civilizations take world-system theory a major step forward. *Nuclear Energy and the Fossil Fuels* Routledge

In this revised and updated 1993 edition the authors synthesize recent research to provide a comprehensive survey of Mesoamerica.

Odaer likes to think of different ways to mix species of animals and plants in his experiments. One day he combines flowers with birds to create a butterfly.

**Ancient Mesoamerica** Palgrave Macmillan

The aim of this book is to assemble a series of chapters, written by experts in their fields, covering the basics of color - and then some more. In this way, readers are supplied with almost anything they want to know about color outside their own area of expertise. Thus, the color measurement expert, as well as the general reader, can find here information on the perception, causes, and uses of color. For the artist there are details on the causes, measurement, perception, and reproduction of color. Within each chapter, authors were requested to indicate directions of future efforts, where applicable. One might reasonably expect that all would have been learned about color in the more than three hundred years since Newton established the fundamentals of color science. This is not true because: • the measurement of color still has unresolved complexities (Chapter

2) • many of the fine details of color vision remain unknown (Chapter 3) • every few decades a new movement in art discovers original ways to use new pigments, and dyes continue to be discovered (Chapter 5) • the philosophical approach to color has not yet crystallized (Chapter 7) • new pigments and dyes continue to be discovered (Chapters 10 and 11) • the study of the biological and therapeutic effects of color is still in its infancy (Chapter 2). Color continues to develop towards maturity and the editor believes that there is much common ground between the sciences and the arts and that color is a major connecting bridge. *The Police and the People* Cambridge University Press  
From the frock coats of Gainsborough's portraits to the city workers' two-piece suits, the structure of men's clothing after 1800 seemed to favor uniformity over variety. But a closer look reveals that the language of this uniformity is actually subtly varied in its details--in the cut, proportion and material. Though individually these different elements are almost imperceptible, each makes a vital contribution to the intangible notion of style. This book juxtaposes paintings and photographs of celebrities and lesser-known figures dating back almost two centuries, whose different silhouettes, when placed alongside one another, encapsulate a shared idea of modern elegance and concern with style. Illustrated

**Born Just Right** A. Asppan S.L.

Vital Voices: 100 Women Using Their Power to Empower celebrates 100 global female leaders who are redefining power. Candid and compelling, each leader shares personal stories, insights and ideas, showing us that women lead differently and that this difference is sorely needed in our world today. While each woman is path-breaking in her own right, it's together that these 100 voices illustrate the transformative power of women's leadership across cultures, industries and generations. A celebration of women's suffrage and gender equality through the use of visual and anecdotal story-telling as told through the eyes of 100 global women leaders who are redefining power, and using their power to strengthen female relationships across the globe. Some of the women featured in the book include Serena Williams, Hillary Clinton, Christine Legarde, Greta Thunberg, and Samar Minall Ah Khan.
