Travel Resources Scarecrow Press  
Caves for the Uninitiated is the story of a group of young people, who after exploring a cave for the first time, become fascinated with the world of caves and caving. Inspired and awed by the beauty and splendor of this mysterious underground realm, this group of young fledgling cavers goes on to spend several days with a pair of veteran caving experts. The seasoned experts share their own knowledge of caves; cave conservation and caving as a sport with the young people. At the end of this brief period of instruction, several of the boys and girls decide to take up caving themselves. While it is delivered as a charming work of fiction, Caves for the Uninitiated also contains valuable, real-world information about caves and cave sciences. It was based upon the actual experiences of Author Brian D. Kharpran Daly, who has been exploring caves in his native Meghalaya for over 20 years, and knows this underground world intimately. Brian D. Kharpran Daly was born in Shillong, the capitol of Meghalaya, a small Indian state. A former economic investigator and CEO of the Shillong Co-operative Urban Bank Ltd., he retired in 2012. As a founding member of the Meghalaya Adventurers' Association, he has been exploring caves since 1992. In 2002 he was awarded the prestigious Tenzing Norgay National Adventure Award by the Government of India for his work in discovering and documenting the caves of Meghalaya.

The Hydraulic System of Uxul Greenwood Presents cross-referenced essays on basic topics related to planetology and Earth from space; each essay includes an annotated bibliography.

*Southern Tibet* Greenwood

The 236 entries in this book comprise an A-Z overview of water's manifold roles in human society and the natural world throughout history. Topics include boats

and ships, dams, groundwater, hydrology, ice, the Johnstown Flood, Scripps Institute of Oceanography, sea monsters, surface tension, and water wheels, and much more. Scientific and technical issues are explored, including the physical and chemical properties of water, steam, and ice; the uses to which water and steam are put; and the purification, transfer, and uses of water by communities. The hydrologic cycle is explained, with attention to the properties and distribution of ice masses, and the properties of oceans and rivers. Philosophical, mystical, metaphorical, and symbolic roles of water in literature, mythology, religion, the visual arts, and music are considered, as are individuals and organizations responsible for contributing to our understanding of water. Each entry concludes with a list of further readings. Attention is also paid to the philosophical, mystical, metaphorical, and symbolic role that water has played for humans in literature, mythology, religion, the visual arts, and music. Finally, a number of individuals and organizations that now make and have made important contributions to our understanding of water and its role in human life and in the natural world are included.

*The Little Book of the London Underground* University of Hawaii Press

The Survey makes accessible the core knowledge of the sciences to curious readers with no special preparation. Within the 377 articles here, 141 cover the major subfields of physical geology, 26 treat areas of economic geology, from essential minerals and other earth resources to the variety of ways man harnesses geothermal, wind, ocean, solar, and nuclear power. Thirty articles examine a range of issues in geochemistry. Geophysics is given full coverage in 35 articles. The planet's history, as well as its impact on the development of life and various early life forms, is explored in 22 articles on fossils, ice ages, dinosaurs, mass extinctions, and evolution. Water is examined in all its forms and sources in 27 articles. There are 36 articles on the solar system, eight on major mountain ranges, soils are done in eight, the atmosphere in

18. Averaging seven pages, articles begin with ready-reference matter and a list of principal terms. A summary section forms the major part of each article, providing a description of either the phenomenon or the methodology. "Context," the concluding section of each essay, presents the conclusions, applications, and implications derived from investigation of the topic. Finally, an annotated, selected bibliography directs the reader to sources that are accessible to the nonspecialist. Cross-references lists articles that offer additional information on the same or a related topic.

Princeton University Press

The only world atlas updated annually, Oxford's Atlas of the World is the most authoritative atlas on the market. Full of crisp, clear cartography of urban areas and natural landscapes around the globe, the Atlas contains maps of cities and regions at carefully selected scales that give a striking view of the Earth's surface. It opens with a detailed survey of world statistics, a six-page feature examining human migration, and an immersive collection of satellite images of Earth, including stunning new photographs specially sourced and processed for this atlas. The volume continues with a Gazetteer of Nations that has been comprehensively updated to include recent economic and political changes. The extensive thematic World Geography section is beautifully illustrated with charts, maps, and graphs on diverse topics of geographic significance, such as climate change, biodiversity, oceans and seas, population and cities, conflict and cooperation, energy and minerals, tourism and travel, global health, wealth, and standards of living. The hundreds of city and world maps that form the body of the Atlas have been thoroughly updated for this 28th edition. Providing the finest global coverage available, the Atlas of the World offers a diverse collection of information and cartography of unrivaled accuracy and clarity, presented in an uncommonly beautiful volume.

**Bibliography and Index of Geology**

State University of New York Press

Cette bibliographie commentée touche tous les domaines du savoir humain, soit de l'Art à la Zoologie; elle signale les ouvrages les plus importants soit des bibliographies, des index, des encyclopédies, des dictionnaires, des guides, des revues etc dont le support d'information est soit du papier, soit un cd-rom, soit une base de données en ligne directe, soit un microforme ect. L'objectif du guide Walford est de devenir la source d'information sur tout type de référence, nonobstant le support technique.

Encyclopedia of Water St Martins Press Provides maps and descriptions of major caves around the world and identifies the extent of cave regions

*The American Cartographer* Bloomsbury Publishing USA

It reviews the published literature, and supplements it with an abundance of information from o

**In Ohio's Backyard** Oxford University Press, USA

Downstate New York Rock Walks is both a hiking guidebook and a history book, calling attention to some of downstate New York's most spectacular and historic rocks: balanced rocks, perched rocks, rock shelters, talus caves, glacial potholes, split rocks, rock profiles, historic rocks, and massive, larger-than-life boulders. Many large glacial erratics have a history going back thousands of years to when they were moved to their present location by advancing glaciers. Many served as points of navigational reference at a time when the landscape was featureless and heavily forested, and still others were ceremonial sites for Native Americans. Rock shelters and talus caves have also been used for thousands of years by Native Americans and Europeans seeking refuge from the elements. It is important that these amazing natural wonders of stone be remembered and recorded before they are lost to collective memory or destroyed by the encroachment of civilization. Providing precise GPS location information along with length and degree of difficulty for each hike, Downstate New York Rock Walks will appeal to casual hikers, serious

rock explorers, historians, geologists, and anyone wishing to explore some of nature's greatest wonders within the reach of the lower Hudson River valley.

**The New Atlas & Commercial Gazetteer of the Straits Settlement & Federated Malay States** Bowker-Saur

Eight volume geographic encyclopedia of the world, continents and countries of each continent. Includes maps, bibliography, charts, graphs, and photographs.

**Walford's Guide to Reference Material: Science and technology**

Presents cross-referenced essays on basic topics related to planetology and Earth from space; each essay includes an annotated bibliography.

Science and Technology Annual Reference Review, 1989

Did You Know? In 1884 the Circle Line opened and was described in The Times as 'a form of mild torture which no person would undergo if he could conveniently help it.' According to one psychologist, Tube commuters can experience greater levels of stress than a police officer facing a rioting mob or even a fighter pilot going into a dogfight. Underground trains have only twice been used to transport deceased people in coffins: William Gladstone and Dr Barnardo. Some of the most bizarre items handed in to lost property include 250lb of sultanas, a 14ft canoe, a child's garden slide, a harpoon gun, a pith helmet, an artificial leg, someone's brother's ashes and a sealed box containing three dead bats. WITH well over a billion passengers a year, more than 250 miles of track, literally hundreds of different stations and a history stretching back at least 160 years, the world's oldest underground railway might seem familiar, but how well do you actually know it? This book offers a feast of Tube-based trivia for travellers and lovers of London alike.

**Earth Science: The earth's surface and history**

Written for the traveler who needs information beyond what is provided in a general guidebook, *Travel Resources: An Annotated Guide* introduces the reader to comprehensive and specialized travel literature and resources. In this book, author Stephen Walker offers practical and accessible direction for anyone seeking detailed and valuable information on travel, while also instructing readers in ways to find information that may not be included in this guide.
