How many hate or bias incidents occurred on your campus this past year? Did any students opt out of filing formal charges? How many completed a formal resolution process, and what happened? Would you have liked to have other conflict resolution options? "This publication is endorsed by ASCA as a collaborative, collegial new lens through which to consider how social justice practices and student conduct administration can come together to inform best practices in conduct and conflict management on college and university campuses."- Tamara J. King, J.D., 2009 President, Association for Student Conduct Administration Social justice theory provides the lens for expanding our conception of student conduct administration, and the foundation for considering systemic changes in practice - changes that are vital to address the concerns and issues raised by an increasingly diverse student

population. Using this lens, this book casts new light on existing principles and current practices; makes issues of power, privilege and oppression manifest; and offers a vision for expanding resolution practices to empower today's students to resolve their own conflicts. Complementing the Model Student Disciplinary Code, this book opens up a whole new range of approaches and models that readers can adapt to their institutional circumstances. Starting from the principle that systems and models are vehicles through which to act on our values, and by focusing on such core values as the commitment to student development, freedom of expression, diversity, accessibility, individual rights and shared responsibilities in a community of learners, the contributors reveal the utility and contemporary relevance of a number of underutilized resolution practices. Part I provides a framework for transforming student conduct administration using conflict resolution methods and social and restorative justice practices. Part II devotes a chapter to explaining each of the seven "Spectrum Model Pathways" to

conflict resolution that form the core of this book: Dialogue, Conflict Coaching, Facilitated Dialogue, Mediation, Restorative Justice Practices, Shuttle Diplomacy, and traditional formal student conduct processes informed by social justice theory. Part III provides practical application tools for the ideas presented in this text, including discussion of change management and assessment, and concludes with an overview of programs from across the country using inclusive conflict resolution methods in student conduct work. This is a book for anyone concerned about issues of access and justice for all students - regardless of race, sexual orientation, belief, or ability - and seeking to develop and implement restorative and safe practices for their campus community.

In discussing a management topic, scholars, educators, practitioners, and the media often toss out the name of a theorist (Taylor, Simon, Weber) or make a sideways reference to a particular theory (bureaucracy, total quality management, groupthink) and move on, as if assuming their audience possesses the necessary background to appreciate and integrate the reference. This is often far from the case. Individuals are frequently forced to seek out a hodgepodge of sources varying in quality and presentation to provide an overview of a particular idea. This work is designed to serve as a core reference for anyone interested in the essentials of contemporary management theory. Drawing together a team of international scholars, it examines the global landscape of the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses to thoughtfully apply them. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Features and Benefits: Two volumes containing over

280 signed entries provide users with the most authoritative and thorough reference resources available on management theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Management Theory allows readers to easily chart directions and trends in thought and theory from early times to the present. An appendix with Central Management Insights allows readers to easily understand, compare, and apply major theoretical messages of the field. **Reframing Campus Conflict** Berrett-Koehler Publishers

In this new book, Frederick Chavalit Tsao and Chris Laszlo argue that current approaches to leadership fail to produce

positive outcomes for either businesses or the communities they serve.

Employee disengagement and customer fickleness remain high, resulting in a lack of creativity and collaboration at all levels of entrepreneurial activity.

Investor demand for Environmental, Social, and Governance (ESG) continues to be poorly integrated into profit strategies. Drawing on extensive research, this book shows how changing a person's consciousness is the most powerful lever for unlocking his or her leadership potential to create wealth and serve humankind. A wide range of practices of connectedness provide the keys. The journey to higher consciousness changes people at a deep intuitive level, combining embodied experience with analytic-cognitive skill development. Tsao and Laszlo show how leaders who pursue this journey are more likely to flourish with significant benefits to both business and society. These include greater creativity and collaboration along with an increased capability to inspire people and produce lasting change. Readers will come away with a deep understanding of quantum leadership and the day-to-day practices that can help them achieve greater effectiveness and wellbeing at work.

Do people see you as the kind of leader you want to be? Are your strongest leadership qualities getting in the way of your greatness? After decades of advising and inspiring some of the most eminent chief executives in the world, Lolly Daskal has uncovered a startling pattern: within each leader are powerful abilities that are also hidden impediments to greatness. She's witnessed many highly driven, overachieving leaders rise to prominence fueled by well-honed skill sets, only to falter when the shadow sides of the same skills emerge. Now Daskal reveals her proven system, which leaders at any level can apply to dramatically improve their results. It begins with identifying your distinctive leadership archetype and recognizing its shadow: ■ The Rebel, driven by confidence, becomes the Imposter, plagued by self-doubt. ■ The Explorer, fueled by intuition, becomes the Exploiter, master of manipulation. ■ The Truth Teller, who embraces candor, becomes the Deceiver, who creates suspicion. ■ The Hero, embodying courage, becomes the Bystander, an outright coward. ■ The Inventor, brimming with integrity, becomes the Destroyer, who is morally corrupt. ■ The Navigator, trusts and is trusted, becomes the Fixer, endlessly arrogant. ■ The Knight, for whom loyalty is

everything, becomes the Mercenary, who is perpetually self-serving. Using psychology, philosophy, and her own experience, Daskal offers a breakthrough perspective on leadership. She'll take you inside some of the most cloistered boardrooms, let you in on deeply personal conversations with industry leaders, and introduce you to luminaries who've changed the world. Her insights will help you rethink everything you know to become the leader you truly want to be.
