You've created a

STEAM program in your library, but how do you work literacy into the curriculum? With this collection of resource recommendations, direction for program development, and activities, you'll have

students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources, selected based on

research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem-solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students. *The Magazine of Business* Marshall Cavendish International Asia Pte Ltd  
In 1963, Daisy Zick was stabbed twenty-seven times at her home in Battle Creek, Michigan—and locals

are still talking about the unsolved case today. On a bitterly cold morning in January 1963, Daisy Zick was brutally murdered in her Battle Creek, Michigan, home. No fewer than three witnesses caught a glimpse of the killer, yet today, it remains one of the state's most sensational unsolved crimes. The act of pure savagery rocked the community, as well as the Kellogg Company where Zick worked. Here, Blaine Pardoe offers a detailed chronicle of this shocking and mysterious crime. With long-sealed police files and interviews with the surviving investigators, the true story of the investigation can finally be told. Who were the key suspects? What evidence do the

police still have on this cold case more than fifty years later? Just how close did this murder come to being solved? Is the killer still alive? These questions and more are masterfully brought to the forefront for true crime fans and armchair detectives. Lizzie and the Last Day of School Department of Education Lizzie loves school almost more than anything. First she loved Nursery school. She loved Kindergarten even more. When the time comes for Lizzie to start First Grade, she can't wait. Everyone tells her it will be a whole year of school. And Miss Gigliano, the first-grade teacher, tells her class to make this the best year of school ever. Yippee! thinks

Lizzie--a whole year of school! And what a year it is. Miss G.'s class wins the Centipede Reading Award. And they even win the Nature Study Award for their bee and butterfly garden. It's a great year! But all great things must come to an end. When the last day of school arrives, Lizzie is dismayed. How can this be? It was supposed to be a whole year! But good news soon arrives and Lizzie, along with Miss G., finds herself in a different classroom and eager to learn!

Thought leader Abate Kassa finds the U.S. government's arbitrary cost-cutting directives of austerity measures or sequestration as a perfect example of moving in the wrong direction. Their system follows rule-sense rather than value-sense. In this book, Mr. Kassa proposes reengineered value analysis/value engineering (VA/VE) as the way to deliver superior service at a minimum cost. By mastering the powerful re-engineered VA/VE problem-solving value

methodology (PISERIA) outlined in this book, any organization regardless of industry will be able to self-diagnose problems and self-discover solutions. The book is the product of Abate Kassa's dual lenses of experience and research over four decades. In the book, Mr. Kassa updates and upgrades VA/VE by integrating popular improvement methodologies, including Six Sigma, Lean Manufacturing, Total Quality Management, Kaizen, Business Process Reengineering, and Project Management, into the scientific method of the value methodology he dubbed PISERIA. By so doing, the author hopes to positively disrupt the status quo of the siloed thinking of

these fragmented methodologies. If you are engaged in the pursuit of excellence and are ready to make the leap from good to great, while generating an immediate payback, you will want to empower your people with an understanding of the reengineered VA/VE outlined in this book.

Business for Higher Awards Bloomsbury Publishing USA

How many times do we persist to force something to work that we already know won't work? Like holding views, leadership styles and culture that no longer serve our workforce and businesses? How many times do we conform to being stuck in the rut, the bare minimum, and the comfortable zone over restructuring the

organizations to make things work, stopping the production of a product that is a nice-to-have (a money bleeder) and investing in what will give sustainable returns? Sometimes to save yourself, your business, you will need to do the hard things. Most people and businesses didn't swiftly adapt to the Covid19 induced disruption. There were tears that were shed, short-term mistakes and losses made, anxiety and gut-wrenching fear experienced. However, that knowing that that was going to be the "New Normal" enabled them to do it afraid. And that's bravery. Leading at the edge of chaos, through crisis and recessions is not easy. Changing

organizational culture which at times get you face to face with your own biases and ineffective outlook, is not easy. For a person who's used to having the final say is not easy to "allow" your workforce to be entrepreneurial and let their innovative ideas catch fire. For an ever-solo entrepreneur may not be easy to start delegating and "losing control". All these necessary calls for change and transformation require you to be brave and courageous. They require brave leadership and courageous culture. In *Gain Competitive Advantage*, the author, Kgadi Mmanakana, introduces brave leadership and courageous culture as the birthplace of

competitive advantage and shares 10 practical strategies that business leaders, team leaders, managers, divisional directors and executives can use to unlock employee engagement, drive team performance and build resilience to maintain relevance in a constantly changing world.

Leading-edge organizations have discovered that fun can--and does--translate into bottom line success. By harnessing the power of fun, companies find they can better retain employees and customers, motivate teams, improve productivity, increase innovation, and create a sense of community. Leslie Yerkes details precisely how eleven successful companies--including Southwest Airlines, Pike Place Fish, Isle of Capri Casinos, EmployEase, and Prudential--have integrated fun into the normal course of business. This new

edition provides updates on how these same companies have grown, prospered, and continued to thrive--in spite of national tragedies, natural disaster, growing competition, and changing economic conditions--in part because of the culture they have created through what Yerkes calls "The Fun/Work Fusion." Yerkes illustrates eleven principles--from capitalizing on the spontaneous to hiring good people and getting out of their way--that will inspire you to inject a sense of playfulness and joy into your workplace. Full of real-life examples, strategies, ideas, resources, tools, tips, and techniques, Fun Works will help any company in any

industry become a place where people love to work.

It's the new normal.

Now all of your employees are Twittering away and friending clients on Facebook. Not to mention customers--who feel obligated to update your Wikipedia entry with product complaints. In this new world, dealing with empowered employees and customers -- Insurgents -- is only going to get more challenging.

Employees are using

this technology in the workplace and customers are using it in the marketplace, and neither obey the rules you set up. This chaos is your future as a manager. You could try to shut it down and shut it off. Or you can harness it and reap the business benefits. According to Josh Bernoff and Ted Schadler of Forrester Research (the organization that brought you Groundswell), your defense against insurgents is to enable them. At its heart, this is a book about how to scale the management of insurgency, both the innovation of insurgent employees and the energy of insurgent customers. The key is a process Forrester calls E Triple S, for the four elements of managing

insurgents effectively: empowering, selecting, scaling, and socializing. While it's based in current trends, the core concept of Managing Insurgents -- that the next management and innovation challenge is harnessing individuals empowered by mobile, social, and connected technology -- is a new idea. In the wake of Groundswell, dozens of social-technology-for-business books cropped up. And there are plenty of books on improving your customer service. But there's no serious business book about management, marketing, and innovation in the throes of this trend. When Insurgency hits, it will be perceived not just as a sequel to Groundswell but as the

start of a new management philosophy. Make Their Day! SAGE The Ivey Casebook Series is a co-publishing partnership between SAGE Publications and the Richard Ivey School of Business at The University of Western Ontario. Due to their popularity in more than 60 countries, approximately 200 new cases are added to the Ivey School of Business library each year. Each of the casebooks comes equipped with instructor's resources on CD-ROM. These affordable collections will not only help students connect to real-world situations, but will benefit corporations seeking continued education in the field as well. Cases in Gender & Diversity

in Organizations is a compilation of real-life business cases illustrating the unique opportunities and challenges for managers of the new, more demographically diverse workplace. The Casebook provides a thorough overview of the issues and challenges facing organizations as more women enter the workplace, as parents struggle to create more balance between their work and family lives, and as members of different ethnic groups interact more frequently in work organizations around the world. Cases in Gender & Diversity in Organizations offers students the opportunity to develop strategies to make effective decisions regarding a wide array

of workplace diversity issues. The Casebook offers contemporary managers a clear sense of the relevance and importance of diversity. The instructor's resources on CD-ROM (available upon request) includes detailed 6-10 page casenotes for each case, preparation questions for students to review before class, discussion questions, and suggested further readings. For and Against: A Discussion on the Award Scheme provides a critical review of the Duke of Edinburgh's Award for Young People. The awarding scheme is divided into two, a scheme for Boys and a scheme for Girls. The awards are given in bronze, silver, and gold. This book covers the means of determining the recipient of the award; the benefits that is given by the awarding system; the origin and development of the

award giving body; the member clubs and organization involve in the awarding scheme; the activities organized by the committee; and fields of study that is under the coverage of the awarding scheme. This text also considers the design for living of the participants as well as a study of the possible improvements that could be made to the awarding system. The awarding system aims to provide an encouragement for youth to participate in physical exercises. The final chapter describes the opinions of panel member that is critical to the determination of winners. The book can provide useful information to the general reader.

Goal 4 of the National Education Goals envisions that teachers will have access to programs for the continued improvement of their professional skills. This book examines what federal agencies are

doing to enhance teacher preparation, presents information on career-long development, and offers program descriptions and contact names. The first section of the book introduces the subjects of professional development and federal assistance and describes formula and discretionary grant programs. The second section, which comprises most of the book, provides information on programs administered by the U.S.

Departments of Education, Agriculture, Commerce, Defense, Energy, Health and Human Services, the Interior, Justice, Transportation, and Veterans Affairs, and by independent agencies

(Environmental Protection Agency, NASA, National Endowment for the Arts, National Endowment for the Humanities, National Science Foundation, and the Smithsonian Institution). Nine appendices list additional sources of assistance; Appendix 10 provides a report of the Goal 4 Resource Group. (SM)

Disruptive Technologies outlines the steps businesses can take to engage with emerging technologies today in order to serve the consumer of tomorrow. This book offers the knowledge and tools to engage confidently with emerging technologies for better business. This highly practical book offers organizations a distinct response to emerging technologies including Blockchain (Bitcoin), artificial intelligence, graphene and nanotechnology (among others) and other external factors (such as the sharing economy, mobile penetration, millennial workforce, ageing populations) that impact on their

business, client service and product model.  
Disruptive Technologies provides a clear roadmap to assess, respond to and problem-solve: what are the upcoming changes in technology, roughly when to respond, and what's the best response? By using a quick-to-master evaluation and decision-making framework - structured around the key dimensions of Technology, Behaviour and Data (TBD). Emerging technologies guru Paul Armstrong offers a clear guide to the key disruptive technologies and a toolbox of frameworks, checklists, and activities to evaluate their possibilities.  
Disruptive Technologies enables forecasting of potential

scenarios, implementation of plans, alternative strategies and the ability to handle change more effectively within an organization. The essential tool for all professionals who need to get to grips with emerging technologies fast and strategically. *Fun Works* CRC Press

Year after year, music teachers face the same challenges running an effective school music program: to motivate students to grow as musicians, and simply keep them in the program. *Pathways* is a book that addresses such challenges. Musician and teacher Joseph Alsobrook explains how to meet the needs of music students while simultaneously enjoying a rewarding

career as a music educator. This book is divided into five major sections, each full of hands-on suggestions, and each targeting an "essential gift" that all students need to receive. These gifts are the pathways that lead to musical and personal enrichment for students and teachers alike.
