Octavia E. Butler's works of science fiction invite readers to consider the structures of power in society and to ask what it means to be human. Butler addresses social justice issues such as poverty, racism, and violence against women and connects the history of slavery in the United States with speculation on a biologically altered future world. The first section of this volume, "Materials," lists secondary sources and interviews with Butler and suggests texts that instructors might pair with her works. Essays in the second section, "Approaches," situate Butler in science fiction, modernism, and Afrofuturism and provide interdisciplinary approaches from political science, philosophy, art, and digital humanities. The contributors present strategies for teaching Butler in literature courses as well as courses designed for adult learners, preservice teachers, and students at historically black colleges and universities.

This book assembles ten scholarly examinations of the politics of representation in the groundbreaking animated children's television series *Steven Universe*. These analyses address a range of representational sites and subjects, including queerness, race, fandom, colonialism, and the environment, and provide an accessible foundation for further scholarship. The introduction contextualizes *Steven Universe* in the children's science-fiction and anime traditions and discusses the series' crucial mechanic of fusion. Subsequent chapters probe the fandom's expressions of queer identity, approach the series' queer force through the political potential of the animated body, consider the unequal privilege of different female characters, and trace the influence of anime director Kunihiro Ikuhara. Further chapters argue that *Ronaldo* allows satire of multiple media forms, focus on *Onion* as a surrealist trickster, and contemplate cross-species hybridity and consent. The final chapters concentrate on background art in connection with ecological and geological narratives, adopt a decolonial perspective on the *Gems*' legacy, and interrogate how

the tension between personal and cultural narratives constantly recreates memory.

Chapter four examines success strategies. The next five chapters look at five approaches to undergraduate research: basic/applied, course-based, community-based, interdisciplinary, and partnership research. Chapters ten, eleven and twelve discuss ways to assess and evaluate undergraduate research experiences, inclusive pedagogy, and ways to advance undergraduate research. Today there are 942 public community colleges in the United States, providing affordable access to 6.8 million students who enrolled for credit in one of the public two-year institutions in the United States. The future of humanity is urban, and the nature of urban space enables, and necessitates, sharing -- of resources, goods and services, experiences. Yet traditional forms of sharing have been undermined in modern cities by social fragmentation and commercialization of the public realm. In *Sharing Cities*, Duncan McLaren and Julian Agyeman argue that the intersection of cities' highly networked physical space with new digital technologies and new mediated forms of sharing offers cities the opportunity to connect smart technology to justice, solidarity, and sustainability. McLaren and Agyeman explore the opportunities and risks for sustainability, solidarity, and justice in the changing nature of sharing. McLaren and Agyeman propose a new "sharing paradigm," which goes beyond the faddish "sharing economy" --

seen in such ventures as Uber and TaskRabbit -- to envision models of sharing that are not always commercial but also communal, encouraging trust and collaboration. Detailed case studies of San Francisco, Seoul, Copenhagen, Medellín, Amsterdam, and Bengaluru (formerly Bangalore) contextualize the authors' discussions of collaborative consumption and production; the shared public realm, both physical and virtual; the design of sharing to enhance equity and justice; and the prospects for scaling up the sharing paradigm through city governance. They show how sharing could shift values and norms, enable civic engagement and political activism, and rebuild a shared urban commons. Their case for sharing and solidarity offers a powerful alternative for urban futures to conventional "race-to-the-bottom" narratives of competition, enclosure, and division.

To reclaim the public university is to focus our energies on teaching all our students well, educating them for a new, increasingly complicated age. To deliver on this promise, we must interrogate the general education we provide for our students, for that is the vast, unrecognized ground we stand on. It is what students and faculty do most in common. If we can get educating our students right, generally and liberally, then we will have laid a claim to what the public university needs to be.
