Sarup & Sons "The Chinese Communist welfare state was established with the goal of eradicating income inequality. But paradoxically, it actually widened the income gap, undermining one of the most important objectives of Mao Zedong's revolution. Nara Dillon traces the origins of the Chinese welfare state from the 1940s through the 1960s, when such

inequalities emerged and were institutionalized, to uncover the reasons why the state failed to achieve this goal. Using newly available archival sources, Dillon focuses on the contradictory role played by labor in the development of the Chinese welfare state. At first, the mobilization of labor helped found a welfare state, but soon labor's privileges turned into obstacles to the expansion

of welfare to cover more of the poor. Under the tight economic constraints of the time, small, temporary differences evolved into large, entrenched inequalities. Placing these developments in the context of the globalization of the welfare state, Dillon focuses on the mismatch between welfare policies originally designed for European economies and the very

different conditions found in revolutionary China. Because most developing countries faced similar constraints, the Chinese case provides insight into the development of narrow, unequal welfare states across much of the developing world in the postwar period."

A major
emerging
demographic

issue of the twenty-first century is the ageing of populations as an inevitable consequence of the demographic transition experienced by most countries.

While all countries are experiencing growing proportions of the elderly, developing countries are currently ageing faster than developed countries. Population Ageing in India creates a holistic research base by looking at

the demographics of the ageing population and reviewing existing studies. It delves deep into the socioeconomic layers of elderly health, work participation and contribution to income generation, national policy in practice and policy initiatives to ensure elderly wellbeing in other Asian countries. The shift of age composition to an older age structure has important implications

for individuals, society as well as the country. Therefore, there is a need to promote harmony between development and demographic change by increasing the economic and social sources of support for the elderly.

the critical changes in India's economy and society amidst the unprecedented pandemic outbreak of COVID-19, which has been devastating by breaking all prior records of illness and fatality. The present crisis is shown to be more than an acute health hazard as it carries with it other threats associated with the economy, society, culture, psychology, and politics. The dynamic

driving forces that have a significant bearing on life, space, and time are explored, providing a basis on which social scientists can understand the prevailing equations and project the unforeseen future to contribute to a policymaking mechanism. The Indian scenario presented here takes into account how the COVID-19-induced lockdown of transport services, closing of

factories, and restrictions on mobilization have caused the economy to face a recession, affecting mostly the unorganized sector. Travel restrictions and quarantines affecting hundreds of millions of people have left Indian factories short of labour, causing havoc in the production system. Semi-skilled jobholders have lost their employment, and the country has witnessed the

plight of large pools of migrant labourers returning on foot to their homelands hundreds of miles away with their families and belongings. Contributors to this volume are drawn from diverse disciplines, displaying the solidarity of academic knowledge in a physically divided world. This common platform is provided to the practitioners of relevant academic disciplines under the

umbrella of regional sciences – a forum for the exchange of ideas that may be effective in the sustainable management of the crisis and a way forward after it is mitigated. Thought-provoking discussions regarding different facets of the crisis are relevant not only to the current times but also to being prepared for the unforeseen post-COVID economic and

societal order. India's Healthcare Industry Rowman & Littlefield At a mere four hours' notice, at 8.00 p.m., on March 24th 2020, the Indian Prime Minister Modi announced a lockdown to contain the spread of virus in order to jumpstart an already-crumbling healthcare system for one of the most devastating pandemics soon to envelop India. People stormed out to panic-buy

ration stocks; India's migrant working classes started walking back to the villages, left hungry and desolate without homes, work and wages - a scene not very short of an apocalypse. Over two summers, India woke up to similar headlines: a shortage of hospital beds, oxygen, medicines; a languishing economy; cases rising and falling; governments greenlighting Hindu

religious, superspreader that compounded the second wave; misled unlocking schools, business and the social sphere, and reversed lockdowns when cases went up; underreporting of cases and deaths; lakhs dead to the virus and crores of people infected, and still counting. While the pandemic continues to rage on, notwithstanding its ebbs and flows, its real impact on

society may start to be visible only much later. Over a year of tracking how the pandemic ravaged India's society, economy, politics and culture, nine of finest India's writers try and make sense of this difficult reality. The Dark Hour is a publisher's anthology of specially commissioned long-form essays that unpack two dreadful summers of the pandemic that wreaked havoc on the

many Indias within India. and philanthropic organizations, government, and international organizations joined in the struggle to reduce fertility. Three decades later this movement has seen changes beyond anyone's most optimistic dreams, and global demographic stabilization is expected in this century. The Global Family Planning Revolution preserves the remarkable record of this

success. Its editors and authors offer more than a historical record. They discuss important lessons for current and future initiatives of the international community. Some programs succeeded while others initially failed, and the analyses provide valuable guidance for emerging health-related policy objectives and responses to global challenges.

<p><u>Year 2021-22)</u> Springer Nature Much about India's economy and aid flows has changed in the last two decades. India's growth rate has quickenened since economic liberalisation, the poverty head count has fallen and the volume and composition of its aid have changed as new issues of climate change and the environment have emerged.. Yet Does Aid Work</p>	<p>in India?, first published in 1990, remains of great interest as a study of aid effectiveness in India's pre- liberalisation era. It identifies those sectors where aid- funded interventions succeeded, and where they failed. It explains how India avoided problems of aid dependence, and managed the political tensions that are associated with aid policy dialogue. More generally, it contains a useful</p>	<p>commentary on and criticism of donors' aid evaluation procedures at that time and it highlights donor efforts in the difficult area of institution building. Despite the passage of time, many of the insights from India's earlier experience remain highly relevant to key issues of development assistance today. <i>Radical Inequalities</i> Atlantic Publishers & Dist The Himachal</p>

Current Affairs. *The India Handbook* Cambridge University Press Social Sector Development and Inclusive Growth in India examines whether growth strategies based on the human development approach render growth inclusive. This comprehensive study considers all components of the social sector in aggregate and also covers both the financial and

physical aspects. [The Dark Hour - India Under Lockdowns](#) Academic Foundation This book offers an in-depth analysis of how governments in vulnerable regions respond to climate migrations. The author argues that, despite the newness of the discipline, responding to hydro-meteorological disasters at the sub-state level is fairly old and institutionalised. Using the example of

India, and the State of Assam, the author demonstrates how existing rights-based frameworks are used as norms for governing climate migrations. However, these normative frameworks become futile when the sub-state simultaneously contests the status of climate migrants as legitimate citizens. Instead, the responsibility is replaced with pity-making and

the state becomes an empathetic spectator - who understands the misfortune but refuses to be held accountable for either the development or protection of those worst affected by climate change. Those who migrate due to climate change often find themselves stripped of their lands (because of erosion) and their political belonging to the society. The volume will be useful for those

studying climate migrations and disaster responses to better understand how communities which are most affected by climatic disasters may not even have a right to have rights against the State they found themselves in. Ritumbra Manuvie is a Senior Researcher and Lecturer of Law at the University of Groningen, The Netherlands. The author studied migration,

citizenship, and belonging in Assam during her doctoral work at the University of Edinburgh. She is currently part of the ELSA - North Netherlands lab which aims to study Ethical, Legal, and Socio-political factors that influence the usage of AI in the health sector. *101 Speed Tests for IBPS & SBI Bank PO Exam 4th Edition* Taxmann Publications Private Limited

This book provides a comprehensive overview of Corporate Social Responsibility (CSR) in Indian corporations following the 2013 legal mandate on corporate spending of profits for CSR. Bringing together authors hailing from diverse walks of life, the book pursues a 'hands-on' approach, with real-world case studies and examples that help the reader feel the dynamic pulse of India immediately after the ratification of the CSR mandate in the Companies Act, 2013. The Act is expected to affect over 16,300 companies with an estimated flow of approximately 200 billion Indian rupees into the economy every year, thus shaking the foundations of business and society and impacting the country at multiple stakeholder levels. As a result, India is likely to become the birthplace of social, economic, and environmental transformation through financial investments in CSR! In order to insightfully reflect on this transition, this book has been divided into three parts. The first part presents the CSR mandate and its implications, while the second focuses on its implementation and the third part provides a view on the way forward.

The book helps to reveal the various layers of CSR in an emerging economy like India and is expected to spark debate, discussion and research among policy-makers, consultants, academics, practitioners and other stakeholders the world over, which will further

expand its contribution to CSR literature and open up new vistas in CSR research. "This is indeed a first of its kind book and marks a watershed in the journey of CSR. It is an extremely important contribution to the body of knowledge in the area of CSR and Corporate

Governance in emerging economies that is driven by a completely different set of challenges, opportunities and requirements from that of developed economies." Dr. Bhaskar Chatterjee, Director General & CEO, Indian Institute of Corporate Affairs
