What If a Dinosaur: There's a Diplodocus at the Door! Tundra Books

What would it have been like to be a dinosaur baby long, long ago? Every boy and girl dreams of seeing a dinosaur?but what about BEING one? Maybe a baby with Tyrannosaurus Rex as a mom? Or a gentler giant who preferred munching leaves? With lots of fascinating facts and striking illustrations that recreate a lost world millions of years old, Isabella Brooklyn and Haude Levesque guide young readers into the prehistoric era to find out. Because scientists never had the

chance to study a live dinosaur in its natural environment, they can't know for sure what kind of parents dinosaurs were, or exactly how they raised their young. But by following the clues they dig up, and using the latest in medical technology, paleontologists can make educated guesses, and offer an exciting glimpse into what it might have been like to be a dinosaur child. Kids will meet dinosaurs of every type, from theropods and sauropodomorphs with their grasping, asymmetrical fingers to "good mother" Maiasaurus and Psittacosaurus babies who had "nannies"--adults that raised all the children in the group. There's also a hint of what the future of dinosaur studies will be, thanks to technology unimaginable only a

few years ago.

Dinosaur Club: The Compsognathus Chase
QEB Publishing

"What would the world be like if the dinosaurs hadn't gone extinct? As this very funny book shows, for one thing, L.A. would be even weirder than it is now." -- Dave Barry Vincent Rubio, a Los Angeles private investigator, is down on his luck: He's out of work. His car's been repossessed. His partner has died under mysterious circumstances. And his tail just won't stay put. Vincent is a dinosaur--a Velociraptor, to be precise. It seems the dinosaurs faked their extinction 65 million years ago and still roam the earth, disguised in convincing latex costumes that help them blend perfectly into human

society. A heightened sense of smell allows the dinos to detect one another-- Vincent's got an odor like a tasty Cuban cigar. When Vincent is called to investigate a two-bit case of arson at a hip dino nightclub, he discovers something much more sinister, which lures him back to New York City--the scene of his partner's death and a dangerous nexus of dinosaur and human intermingling. Will Vincent solve the mystery of his partner's death? Will a gorgeous blond chanteuse discover his true identity, jeopardizing both their lives? Will Vincent be able to conquer his dangerous addiction to basil, or will he wind up in Herba-holics Anonymous? Will he find true love, or resort to crumpled issues of Stegolicious? Somewhere between Jurassic Park and L.A. Confidential lies Eric Garcia's Anonymous Rex, one of the smartest, wittiest, and most entertaining debuts this side of the Ice Age.

Where Did the Dinosaurs Go? Dorling Kindersley Ltd

Travel back in time on a prehistoric journey to the world of the dinosaurs! Dive into an exciting Jurassic world and travel back in time with the Dinosaur Club. These

character-driven dinosaur books explore different dinosaur species through a thrilling adventure story. Jurassic from Triassic, and carnivores from herbivores. With details on dinosaur habitats, dinosaurs of the sea and sky, prehistoric beasts, and who would win in a battle, you will be able to answer any question on how the world was 250 million years ago. This ultimate ebook contains facts and stats about more than 150 different species of dinosaurs and prehistoric creatures. Each animal profile includes vital statistics of their size, weight, where they lived, and unique facts. There is even a size chart on some pages comparing them to humans, so you will be able to see how you shape up to these Triassic titans. If you love dinosaurs and prehistoric creatures, are fascinated by their history and biology, and want to know everything about them, then this handbook is the perfect companion.

Dinosaur Coloring Book Createspace Independent Publishing Platform
THE FIFTH IN A SPECTACULAR NEW SERIES OF TIME TRAVEL ADVENTURES EVOLVING FROM THE WORK OF RAY BRADBURY, AUTHOR OF THE MARTIAN CHRONICLES YOU NAME THE ANIMAL. WE TAKE YOU THERE. The sign said it all, but the hunters soon became the hunted. Their safari took

them to the age of dinosaurs, but the hunt went terribly wrong, sending ripples of change throughout the timestream. Aaron Cofield and his friends find themselves in ancient Egypt--but an Egypt changed from the one they knew. The Sphinx now bears the head of Klaido, a savage dinosaur warrior. And the Pharaoh about to be entombed within the Sphinx has decreed that all his belongings be buried with him--including the last fragment of the time-crossing roadway in this world! Aaron faces a race against time to retrieve the roadway, and stay ahead of the savage dinosaur empire, if there is to be any hope of restoring the timestream.

The Dino Files #1: A Mysterious Egg
Charlesbridge

Reveals how paleontologists established that some dinosaurs had feathers, explains how the author gathers information before building feathered dinosaur models, and supplies step-by-step model-building instructions.

I Wish There Were Dinosaurs QEB Publishing

Are you ready for the best adventure ever? When Tom and Jamie hear a report that a scientist has proof of human

existence in dinosaur times there are only two possible explanations - either someone else has been into their secret dinosaur world, or they must have left something behind on their travels. Either way, the boys know they have to get back to the Jurassic and find out what's happened. But once in the Jurassic, disaster strikes when a pair of pterosaurs swoop down from the sky and grab Tom in their claws! As they carry him off over the treetops, Jamie and Wanna race after him - but it's no good, Tom is soon out of sight and they wonder if they'll ever see their friend again. With a pack of megalosaurs on the prowl, a prehistoric storm on the horizon, an enormous landslide, and a mystery to solve - this is a breathtaking, double length adventure that readers will never forget.

A Guide to Dinosaurs Their Past and Future Macmillan Children's Books

This is exactly what happens when a little boy accompanies his mum on a busy shopping trip. Just when the little boy thinks he's going to die of boredom, something very unusual happens... shops everywhere are giving away a very special treat with every purchase ~ a free dinosaur! It's a dream come true... except, what exactly do you do with these Jurassic treats? And how do you convince mum to let you keep them?

If You Were Raised by a Dinosaur
Scholastic Inc.

If you could have any dinosaur body part, which would you choose? What if you woke up one morning and you had sprouted a dinosaur body part overnight? What If You Had T. rex Teeth? -- the next imaginative book in the What If You Had series -- explores what would happen if you looked in the mirror and saw that you

had become part dino! From a Velociraptor's sharp sickle-tipped toes to a T. rex's giant curved teeth, and from the body armor of an Ankylosaurus to the long neck of a Brachiosaurus -- discover what it would be like if you had one of these wild dinosaur parts! Readers will also learn what makes a dinosaur a dinosaur and why they aren't still around today.

If I Had a Dinosaur Simon and Schuster
A collection of jokes, knock-knocks, and riddles about dinosaurs.

There's a Stegosaurus on the Stairs
Sterling Publishing Company, Inc.

Imagines what might happen if dinosaurs came to town and introduces various types of dinosaur and their characteristics. *Dinosaurs Can't Roar* Teacher Created Materials

Links and Budge are two dinosaurs studying the stars in school. They begin to wonder if there are dinosaurs like them on other planets. Their instructor, Madam Thor, tells them that there were once dinosaurs on a planet called Earth. Together they hypothesize why the dinosaurs no longer exist on that planet. With creative illustrations and large font, children will be engaged as they learn

what happened to the dinosaurs that once roamed Earth. Told from a unique perspective, this story is sure to be a classroom favorite.

Ray Bradbury Presents Dinosaur Empire
Turtleback Books

A Guide to Dinosaurs Their Past and Future is the perfect book for those who want to learn more about the history of the dinosaurs and the science behind the hit Jurassic Park Films. Since seeing my first film about dinosaurs as a child I have wondered about these amazing creatures. This had lead me to read many of the available books on the subject, but while doing so I found that there was a hole in library of books about the dinosaur. Most of them were either historical guides or written for children. I had a series of questions that had not been answered in any single book before. Questions like: How did the dinosaurs really die off? Was there more than one theory on their extinction? What dinosaurs were harmless and which would be most dangerous to humans if we existed side by side? In most of the films like Jurassic Park people found it impossible to hunt and kill these creatures, but with our weapons and

technology how would we really fare if the dinosaur actually had to deal with well armed human beings? Was the science used in these movies based upon reality or was it really just science fiction? If we can clone the family pet then how close are we to bring back the age of the dinosaur? I have tried to answer these question with this book. I have tried to answer them in a simple and easy to understand way.

Dinosaur Jokes Running Press Book Publishers - (Running Press)

"Bubbles over with the joy of scientific discovery as he shares his natural enthusiasm for the blend of sleuthing and imagination."—Publishers Weekly, starred review
What if we woke up one morning all of the dinosaur bones in the world were gone? How would we know these iconic animals had a 165-million year history on earth, and had adapted to all land-based environments from pole to pole? What clues would be left to discern not only their presence, but also to learn about their sex lives, raising of young, social lives, combat, and who ate who? What would it take for us to know how fast dinosaurs moved, whether they lived underground, climbed trees, or went for a

swim? Welcome to the world of ichnology, the study of traces and trace fossils – such as tracks, trails, burrows, nests, toothmarks, and other vestiges of behavior – and how through these remarkable clues, we can explore and intuit the rich and complicated lives of dinosaurs. With a unique, detective-like approach, interpreting the forensic clues of these long-extinct animals that leave a much richer legacy than bones, Martin brings the wild world of the Mesozoic to life for the 21st century reader.

Dinosaur Cove: Lost in the Jurassic Villard
Life in the dinosaur world was full of dangerous creatures, all looking for a meal. Predators lurked everywhere and often did not wait for eggs to hatch before chowing them down. As if on pure instinct, dinosaurs protect their eggs in hopes that at least some would hatch and grow to become healthy adults. Chances of survival was always low. Through study and research of dinosaur fossils, inferences and suggestions have been made that maybe dinosaurs actually had a Heart(s). However, there is still so much we do not know about dinosaurs and their mysterious world. Fossil studies, allow us

to learn more about them and the kind of lives they had but only to a certain extent. Many of the studies focus on things such as shapes, colours and texture of their skin or even how they communicate and so on based on whatever they could get out of a dinosaur fossil. However, to the dinosaur enthusiast, there are still many unanswered questions. Hence many feel that dinosaurs are an interesting topic because much is still left to our imagination. The Heart is not just a piece of muscle. If dinosaurs had Hearts, Kiri maybe the first of its kind. Kiri is a gentle and loving *Dracorex* (a kind of *Pachycephalosaur*) that lived during the dinosaur age. The dinosaur age were dangerous times and life doesn't get any easier for plant-eaters/herbivores like Kiri. However, being the first to have a Heart, he doesn't know what it is and what it is for. He knows that there is something living inside him, beating constantly at his chest. His life is a voyage of learning and understanding that piece of muscle and discovering its bigger purpose. So as he goes on this journey, he begins to learn to listen to his Heart, interacting with his mind and learns more about himself. He

learns that listening to his Heart would make the difference between him and the other dinosaurs. This could have been the start of an evolution, a big change for their continued existence and survival. Or it may simply be God's experiment. Kiri looked different from the others in his family. In fact, he looked more like a meat-eater born into a family of plant-eaters. This made him a misfit in the herd of plant-eating dinosaurs. They often misunderstood his gentle and loving nature. The other dinosaurs in the herd saw him as a strange looking dinosaur that could be a threat to the herd. His grandfather, old and full of wisdom, was the only one that saw beyond that. He believed that Kiri's birth was part of a bigger shift in the world they lived in. It was a time when landscapes were changing and dinosaurs were reaching their "end of the road". Feeling lonely without any friends in the beginning, Kiri often wondered why he looked so different and wished that he wasn't. As he grew, Kiri and the world around him began to understand and accept each other. He eventually made new wonderful friends and realized that being different wasn't so

bad after all. But that was not all there is in his life's journey. There was always that something else, something that didn't quite add up ... and it had to do with the reason he was gifted with a Heart. This curiosity was constantly in his mind and inspired him to face and explore new adventures. Together with the help of his buddies and the never-stopping beating inside his chest, Kiri lived his life's journey experiencing and learning some of life's valuable virtues that would one day bring him closer to his true calling. When even at an age of darkness where natural instincts ruled, there can be hope and love if there was Heart. In this age, where there is constant news of turmoil and chaos from all parts of the world, it maybe beneficial to go within our Hearts and examine what's going on inside. Most of the time, that should lead us straight to the root of our problems. For the sake of our future generation, it is worth reminding our children and ourselves why we have Hearts. Within Kiri's story and adventures are themes involving friendship, accepting our differences, respect, sharing, self-believe, courage, honesty and so on, are simply virtues worth instilling among all,

young and old.

If Dinosaurs Were Alive Today Simon and Schuster

Introduces the size, diet, and physical characteristics of the Diplodocus by placing the dinosaur in whimsical modern-day scenarios.

There's a Dinosaur in My Room Tundra Books

Imagine if dinosaurs were alive today...

How would they cope? Join Stegosaurus as she plays in the park, goes to a party, and tries bowling. Along the way, discover just how big, spiky, and colorful she really was! There's a Stegosaurus on the Stairs gives

young readers a simple introduction to four dinosaur species: Tyrannosaurus Rex, Diplodocus, Stegosaurus, and Triceratops. By imagining dinosaurs in modern-day scenarios, readers learn about their size, diet, and other features. For example, a Stegosaurus weighed as much as three cars -- so just imagine how it would play on a seesaw! The engaging question-and-answer format keeps young readers entertained and helps them understand and retain dinosaur facts.

If Dinosaurs Lived in My Town Scholastic Inc.

Imagine there's a real Jurassic Park right around the block--wouldn't that be super?

These dinosaur activities, projects, and other fun things to do are the next best thing. Journey back to ancient times with a prehistoric quiz that sets the facts straight on whether dinos could fly, if the largest dinosaurs dragged their tails on the ground, and what the complete skeleton of a T-Rex looks like. Identify different dinosaurs by their silhouettes. Flip through history with stick figure animations you make yourself. Learn about fossils and where to find them. The art's great, too: you'll see pictures of a fossilized tooth (actual size), an enlargement of an iguana, the image of an iguanodon, and more.
