Drawing upon previously unpublished archival materials as well as historical accounts, Gere traces the history of writing groups in America, from their origins over a century ago to their recent reappearance in the works of Macrorie, Elbow, Murray, and others. From this historical perspective Gere examines the theoretical foundations of writing groups, challenging the traditional concept of writing as an individual performance. She offers instead a broader view of authorship that includes both individual and social dimensions, with implications not only for the teaching of composition but also for theories of rhetoric and literacy.

Brian Scaddan's guides to the IEE Wiring Regulations have established themselves as an industry standard. This new edition will be an essential reference for all contractors, technicians and other professionals, as well as newcomers to the industry, who need to ensure their work complies with the latest version of the Wiring Regulations. Used alongside the regulations themselves, this book is the key to safe and efficient electrical installation. The book is also a concise and popular text for the City & Guilds 2381 syllabus. The new edition is updated throughout to match the 2004 version of BS 7671:2001 (incorporating Amendments 1:2002 & 2:2004), and also features extended coverage of Special Locations (such as bathrooms, construction sites and computer / data type installations). There are common misconceptions in the application of the Wiring Regulations in these areas with regard to bonding, voltages, disconnection times and sizes of earthing conductors. Brian Scaddan clarifies the requirements, and outlines the correct procedures to follow (and those to avoid!). Problems are provided, for use as 'self-check' exercises or college assignments. Brian Scaddan is the Chief Examiner for the City & Guilds 2391 vocational award. He has 30 years' experience in

Further Education, and is now Director of Brian Scaddan Associates, Engineering Training Consultants.

Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.
