Postmetaphysical Thinking II Schiffer Publishing

'There is no alternative to postmetaphysical thinking': this statement, made by Jürgen Habermas in 1988, has lost none of its relevance. Postmetaphysical thinking is, in the first place, the historical answer to the crisis of metaphysics following Hegel, when the central metaphysical figures of thought began to totter under the pressure exerted by social developments and by developments within science. As a result, philosophy's epistemological privilege was shaken to its core, its basic concepts were de-transcendentalized, and the primacy of theory over practice was opened to question. For good reasons, philosophy 'lost its extraordinary status', but as a result it also courted new problems. In *Postmetaphysical Thinking II*, the sequel to the 1988 volume that bears the same title (English translation, Polity 1992), Habermas addresses some of these problems. The first section of the book deals with the shift in perspective from metaphysical worldviews to the lifeworld, the unarticulated meanings and assumptions that accompany everyday thought and action in the mode of 'background knowledge'. Habermas analyses the lifeworld as a 'space of reasons' – even where language is not (yet) involved, such as, for example, in gestural communication and rituals. In the second section, the uneasy relationship between religion and postmetaphysical thinking takes centre stage. Habermas picks up where he left off in 1988, when he made the far-sighted observation that 'philosophy, even in its

postmetaphysical form, will be able neither to replace nor to repress religion', and explores philosophy's new-found interest in religion, among other topics. The final section includes essays on the role of religion in the political context of a post-secular, liberal society. This volume will be of great interest to students and scholars in philosophy, religion and the social sciences and humanities generally.

This is because England's biggest county is also England's most epic and most historically exciting. It has everything: unimaginably beautiful countryside, derelict castles, cliff-hugging coastlines, brutally bleak moors, quirkily quaint villages, wondrously winding waterways and industrial monsters of cities. Many of the most interesting episodes in English history have happened here: the Wars of the Roses, the English Civil War, the birth of the industrial revolution, the rise of the Labour movement. But when people think of Yorkshire they also think of the unusual and the unsung: Bettys delightful tea rooms, cricket at Scarborough, the windswept steps of Whitby Abbey, the steam railway of the Railway Children, Mother Shipton's Cave, and

racing at Doncaster and York. Yorkshire has also given birth to some of the greatest and most talented figures in English history: Brian Clough, Harold Wilson, John Wycliffe, William Wilberforce, the Brontë Sisters, David Hockney and Barbara Hepworth.

Extended Rationality provides a novel account of the structure of epistemic justification. Its central claim builds upon Wittgenstein's idea that epistemic justifications hinge on some basic assumptions and that epistemic rationality extends to these very hinges. It exploits these ideas to address problems such as

scepticism and relativism.

'Memoirs of such richness are rare . . . a joy' JAMES NAUGHTIE 'A remarkable personal journey, by one of the great political correspondents of our world - eloquent, enlightening, exhilarating' PHILIPPE SANDS A trailblazer for women in journalism, Hella Pick arrived in Britain in 1939 as a child refugee from Austria. Over nearly four decades she covered the volatile global scene, first in West Africa, followed by America and long periods in Europe. In her thirty-five years with the Guardian she reported on the end of Empire in West Africa, the assassination of President Kennedy, Martin Luther King's march from Selma to Montgomery, the Vietnam peace negotiation in Paris, the 1968 student revolt in France, the birth of the Solidarity movement in Poland, and the closing stages of the Cold War. A request for coffee on board a Soviet ship anchored in Malta led to a chat with Mikhail Gorbachev. A request for an interview with Willy Brandt led to a personal friendship that enabled her to come to terms with Germany's Nazi past. Her book is also a clarion call for preserving professionalism in journalism at a time when social media muddy the waters between fact and fiction, and between reporting and commentary. *INVISIBLE WALLS* tells the dramatic story of how a Kindertransport survivor won the trust and sometimes the

friendship of world leaders, and with them a wide range of remarkable men and women. It speaks frankly of personal heartache and of a struggle over her Jewish identity. It is also the intensely touching story of how, despite a gift for friendship and international recognised achievements as a woman journalist, a continuing sense of personal insecurity has confronted her with a series of invisible walls.

"Hegel and scepticism" remains an intriguing topic directly concerning the logical and methodological core of Hegel's system. A series of contributions is unfolding around a keynote paper by Klaus Vieweg, which tries to understand and restate the limits and the content of the relationship between Hegel's philosophy and scepticism. Various Hegel readers with different concerns are dealing with Hegel's strategy in a large range of theoretical areas. *40 Ideas for Positive Thinking* Routledge

World-leading anthropologists and philosophers pursue the perplexing question fundamental to both disciplines: What is it to think of ourselves as human? A common theme is the open-ended and context-dependent nature of our notion of the human, one upshot of which is that perplexities over that notion can only be dealt with in a piecemeal fashion, and in relation to concrete real-

life circumstances. Philosophical anthropology, understood as the exploration of such perplexities, will thus be both recognizably philosophical in character and inextricably bound up with anthropological fieldwork. The volume is put together accordingly: Precisely by mixing ostensibly philosophical papers with papers that engage in close anthropological study of concrete issues, it is meant to reflect the vital tie between these two aspects of the overall philosophical-anthropological enterprise. The collection will be of great interest to philosophers and anthropologists alike, and essential reading for anyone interested in the interconnections between the two disciplines.
