Fifty Key Thinkers on the Environment IGI Global

Fifty Key Thinkers on the Environment is a unique guide to environmental thinking through the ages. Joy A. Palmer, herself an important and prolific author on environmental matters, has assembled a team of thirty-five expert contributors to summarize and analyse the thinking of fifty diverse and stimulating figures – from all over the world and from ancient times to the present day. Among those included are: Philosophers such as Rousseau, Spinoza and Heidegger Activists such as Chico Mendes Literary giants such as Virgil, Goethe and Wordsworth Major religious and spiritual figures such as the Buddha and St Francis of Assisi. Lucid, scholarly and informative, these fifty essays offer a fascinating overview of mankind's view and understanding of the physical world.

Problems of modern science and practice Oxford University Press

While there are common misconceptions regarding the definition of a public law library, it can be defined as a government mandated library which provides the public with access to legal resources. Largely, public law libraries are instituted by state or federal law. Public Law Librarianship: Objectives, Challenges, and Solutions aims to introduce firsthand knowledge on the funding, organizational structures, and governance related to the public law library. This book includes comprehensive research for current and future public law librarians to provide administrative guidance and professional sources essential for running a public law library.

Key Concepts in Social Gerontology Oxford University Press

American English File Second Edition retains the popular methodology developed by world-renowned authors Christina Latham-Koenig and Clive Oxenden: language + motivation = opportunity. With grammar, vocabulary, and pronunciation practice in every lesson, students are equipped with a solid foundation for successful speaking. Plus - an array of digital resources provides even more choice and flexibility. Students can learn in the classroom or on the move with Online Practice. language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

Project 4 Oxford University Press

Oxford English for Academic Purposes offers a specialist course covering listening, speaking and reading in key areas of academic life such as lectures, presentations and textbooks. The course is consistent with levels A2 to C1 of the Common European Frame of Reference for the teaching of foreign languages.

Job interview questions and answers for employment on Offshore Oil & Gas Rigs John Wiley & Sons

The course is consistent with levels A2 to C1 of the Common European Frame of Reference for the teaching of foreign languages.

Star Team 1 Petrogav International

The job interview is probably the most important step you will take in your job search journey.

Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 100 questions and answers for job interview and as a BONUS 230 links to video movies. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Key Thinkers in Linguistics and the Philosophy of Language Elsevier Health Sciences

Historians of the European Jewish experience have long marginalized the intellectual achievement of Jews in England, where it was assumed no seminal figures contributed to the development of modern Jewish thought. In this first comprehensive account of the emergence of Anglo-Jewish thought in the eighteenth and nineteenth centuries, David Ruderman impels a reconsideration of the formative beginnings of modern European Jewish culture. He uncovers a vibrant Jewish intellectual life in England during the Enlightenment era by examining a small but fascinating group of hitherto neglected Jewish thinkers in the process of transforming their traditional Hebraic culture into a modern English one. This lively portrait of English Jews reformulating their tradition in light of Enlightenment categories illuminates an overlooked corner in the history of Jewish culture in England and Jewish thought during the Enlightenment. Ruderman overturns the conventional view that the origins of modern Jewish consciousness are located exclusively within the German-Jewish experience, particularly Moses Mendelssohn's circle. Independent of the better-known German experience, the encounter between Jewish and English thought was incubated amid the unprecedented freedom enjoyed by Jews in England. This resulted in a less inhibited defense of Jews and Judaism. In addition to the original and prolific thinkers David Levi and Abraham Tang, Ruderman introduces Abraham and Joshua Van Oven, Mordechai Shnaber Levison, Samuel Falk, Isaac Delgado, Solomon Bennett, Hyman Hurwitz, Emanuel Mendes da Costa, Ralph Shomberg, and others. Of obvious appeal and import to students of Jewish and English history, this study depicts the challenge of defining a religious identity in the modern age.

Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954 SAGE Publications

This title is unique, as no other psychiatric/mental health nursing text has ever brought together 'opposing' or contrasting views of the same issue, and subsequently invited two separate chapters to be written in order to articulate the different perspectives in the debate. Further, no book has then followed up such a wide and thorough discussion by inviting a third party to offer commentary. Therefore, it presents the most complete, balanced arguments possible in order to inform, educate, and stimulate psychiatric/mental health nurses. key debates are presented with arguments from opposing viewpoints, followed by a third-party commentary, to give readers the necessary information to form their own view written by a range of international authors from different countries across three continents one of the first psychiatric/mental health nursing books to explore the pedagogical value of debate

Key Comprehension EPUBLIC

"Far from a dictionary, the concepts are portrayed as complex, and conflicting definitions and usages are both noted and evaluated... Each article includes a (necessarily selective) set of references, and cross-references to other concepts included in the book... Moreover, the coverage and evaluation of the concepts is right at the current leading edge in a rapidly moving field." - Victor Marshall, Department of Sociology and Institute on Aging, University of North Carolina at Chapel Hill "The concepts are very clear and very relevant, and fantastic for my group of undergraduate students... I found each concept to be succinctly and simply captured, holding enough information to satisfy initial cravings and complex enough to tempt further reading... I had originally thought that this book would provide supplementary reading as part of my 'Healthy Ageing' course, but have changed my mind to essential reading now I have had the opportunity to read the entire book." - Dr Meredith Tavener, Groningen University Social gerontology is a new and dynamic field reflecting the increasing interest in ageing across the world. This book provides a readily accessible guide to well established and contested issues, as well as new concepts emerging through cutting edge research in the discipline. The entries give concise, lucid knowledge on what constitutes the 'building blocks' of social gerontology and sets out a clear review of the core concepts, both classic and emerging, in this subject area. Each concept is explored in terms of its history, application, usefulness to theory and research, and significance in practice. They go beyond simple definitions of the concepts to look at how each issue has shaped the discipline of social gerontology today. This book is authored by social gerontologists from the UK and the USA. Together they present an interdisciplinary perspective and reflect a global approach to the presentation of key concepts in social gerontology.

Introduction to Accounting Oxford University Press

Following the much acclaimed success of the first volume of Key Topics in Conservation Biology, this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology. Written by an internationally renowned team of authors, Key Topics in Conservation Biology 2 adds to the still topical foundations laid in the first volume (published in 2007) by exploring a further 25 cutting-edge issues in modern biodiversity conservation, including controversial subjects such as setting conservation priorities, balancing the focus on species and ecosystems, and financial mechanisms to value biodiversity and pay for its conservation. Other chapters, setting the framework for conservation, address the sociology and philosophy of peoples' relation with Nature and its impact on health, and such challenging practical issues as wildlife trade and conflict between people and carnivores. As a new development, this second volume of Key Topics includes chapters on major ecosystems, such as forests, islands and both fresh and marine waters, along with case studies of the conservation of major taxa: plants, butterflies, birds and mammals. A further selection of topics consider how to safeguard the future through monitoring, reserve planning, corridors and connectivity, together with approaches to reintroduction and re-wilding, along with managing wildlife disease. A final chapter, by the editors, synthesises thinking on the relationship between biodiversity conservation and human development. Each topic is explored by a team of top international experts, assembled to bring their own cross-cutting knowledge to a penetrating synthesis of the issues from both theoretical and practical perspectives. The interdisciplinary nature of biodiversity conservation is reflected throughout the book. Each essay examines the fundamental principles of the topic, the methodologies involved and, crucially, the human dimension. In this way, Key Topics in Conservation Biology 2, like its sister volume, Key Topics in Conservation Biology, embraces issues from cutting-edge ecological science to policy, environmental economics, governance, ethics, and the practical issues of implementation. Key Topics in Conservation Biology 2 will, like its sister volume, be a valuable resource in universities and colleges, government departments, and conservation agencies. It is aimed particularly at senior undergraduate and graduate students in conservation biology and wildlife management and wider ecological and environmental subjects, and those taking Masters degrees in any field relevant to conservation and the environment. Conservation practitioners, policy-makers, and the wider general public eager to understand more about important environmental issues will also find this book invaluable.

'The Book of Answers' analyzes all the ways that we confirm questions in our everyday social lives. When do we answer with Yeah rather than He is, for instance; or when do we use more complicated forms of confirming? Relying on a large corpus of naturally occurring recordings of spontaneous social interaction, Tanya Stivers analyzes what each unique way of responding allows us to do.
