Raw statistics for encounters between New York City police officers and pedestrians suggest large racial disparities--89 percent of 2006 stops involved nonwhites. The New York City Police Department asked RAND to help it understand this and identify recommendations for addressing potential problems. RAND researchers

analyzed 2006 pedestrian-police encounters, finding small racial differences in rates of frisk, search, use of force, and arrest.

The Psychology of Police Deadly Force Encounters: Science, Practice, and Police is a fascinating look into the reality of police work. The author integrates noted theories into a “street-wise” understanding of being a police officer. The focus of this book is on the use of deadly force by officers—a topic of considerable importance. The author discusses the psychosocial aspects of deadly force use, stemming from the individual officer, the situation, organizational influences, and the police culture. Expanding further into social issues, the controversial topic of race and use of deadly force is discussed. This depiction looks at both sides—that

of racial victimization and that of the police—which helps to provide a rather unique perspective on this important issue. Of interest, the author breaks down the different dimensions of cognition as a factor in decision making among police, including the perception of the situation, the action taken depending on that perception, and the role of present and past memory. This will make for a useful training topic to alert officers to the cognitive processes that go into deadly force use—processes that they have the control to change to make a better decision. Next, the book delves into the biological factors that may be involved in police decision making—again where deadly force is involved. The various negative psychological impacts that a deadly

force situation may bring about are identified and explained. This book will be useful as a tool for both law enforcement practitioners and researchers to better understand the intricacies of deadly force by the police. For researchers, the book has a multitude of references available for further exploration. It will prove to be a useful guide and reference volume for police managers and supervisors, mental health clinicians, investigators, attorneys, judges, law enforcement educators and trainers, rank and file police officers, including expert witnesses.

GMAT Roadmap: Expert Advice Through Test Day Passbooks

"At a time when we must adapt to the changing character of conflict, this is a

serious book on a serious issue that can give us the edge we need." —General James Mattis, USMC, Ret. "Left of Bang offers a crisp lesson in survival in which Van Horne and Riley affirm a compelling truth: It's better to detect sinister intentions early than respond to violent actions late. Left of Bang helps readers avoid the bang." —Gavin de Becker, bestselling author of *The Gift of Fear* "Rare is the book that is immediately practical and interesting. Left of Bang accomplishes this from start to finish. There is something here for everyone in the people business and we are all in the people business." —Joe Navarro, bestselling author of *What Every BODY is Saying*. "Left of Bang is a highly important and innovative book that offers a substantial contribution to

answering the challenge of Fourth Generation war (4GW)." —William S. Lind, author of Maneuver Warfare Handbook "Like Sun Tzu's The Art of War, Left of Bang isn't just for the military. It's a must read for anyone who has ever had a gut feeling that something's not quite right...be it walking down the street, sitting in a corporate boardroom, or even entering an empty home." --Steven Pressfield, bestselling author of The Lion's Gate, The Warrior Ethos and Gates of Fire "An amazing book! Applying the lessons learned during the longest war in American history, and building on seminal works like The Gift of Fear and On Combat, this book provides a framework of knowledge that will bring military, law enforcement, and individual

citizens to new levels of survival mindset and performance in life-and-death situations. Left of Bang is an instant classic." --Lt. Colonel Dave Grossman, U.S. Army Ret., author of On Combat and On Killing -- You walk into a restaurant and get an immediate sense that you should leave. -- You are about to step onto an elevator with a stranger and something stops you. -- You interview a potential new employee who has the resume to do the job, but something tells you not to offer a position. These scenarios all represent LEFT OF BANG, the moments before something bad happens. But how many times have you talked yourself out of leaving the restaurant, getting off the elevator, or getting over your silly "gut" feeling about someone? Is there a way to not

just listen to your inner protector more, but to actually increase your sensitivity to threats before they happen?

Legendary Marine General James Mattis asked the same question and issued a directive to operationalize the Marine Corps' Combat Hunter program. A comprehensive and no-nonsense approach to heightening each and every one of our gifts of fear, LEFT OF BANG is the result.

CLEP Official Study Guide Simon and

Although laws governing moving-traffic
 violations are fairly uniform throughout
 the United States, the effective levels of
 enforcement of these laws vary
 dramatically from city to city. Basing this
 study on statistics from nearly seven
 hundred police departments, census
 data, personal interviews, on-the-spot
 observation, and detailed case studies of

four Massachusetts cities--Lynn, Waltham, Malden, and Cambridge--Mr. Gardiner identifies and discusses the factors that determine police decisionmaking in relation to traffic violations. After a brief description of the role of various state and local agencies in settling traffic-enforcement policy, the author analyzes in depth the traffic activities of the four Massachusetts cities. He examines in particular the extent of public pressure in seeking modification of enforcement standards, intradepartmental practices, or "norms," and the role of traffic enforcement in the total spectrum of police activities. Following the case studies, the author discusses the variations among the traffic policies of municipal police departments, and questions the "public

pressure" interpretation of police policies. Mr. Gardiner finds that, although citizens and city officials frequently seek to influence individual decisions, they seldom know how strict or lenient their department's general policies are, and seldom care. In addition, the author finds no significant connection between the severity of ticketing policies and such factors as income, race, or education, but does find some correlation with the geographical stability of a city's population. Finally, the author concludes that the chief source of departmental traffic policy is an internally established set of norms concerning the importance of traffic work and the frequency with which officers should write tickets. Evidence from cities that change their traffic

policies indicates that individual preferences on the part of chiefs or ranking officers are the primary source of these norms. This book is an important contribution to the growing area in social sciences that deals with law enforcement and, more broadly, local political systems.
