'This exercise is about more than our desire to read and understand Wretched (as if it were about some abstract world, and not our own); it's about more than our need to understand (the failures of) the anti-colonial struggles on the African continent. This exercise is also about us, and about some of the things that We need to understand and to change in ourselves and our world.'-James Yaki Sayles One of those who eagerly picked up Fanon in the 60s, who carried out armed expropriations and violence against white settlers, Sayles reveals how, behind the image of Fanon as race thinker, there is an underlying reality of antiracist communist thought.

This book offers a fresh, multi-disciplinary, and international examination of a phenomenon that has altered the landscape of migration in the United States and is now taking root in Canada and throughout Europe: 'crimmigration law.' Crimmigration law consists of the letter and practice of laws and policies at the intersection of criminal law and immigration law. Crimmigration scholars study the creation of laws and policies, their enforcement, as well as the institutional dynamics that create crimmigration law and are created by it. Many have written about the use of crimmigration law to exert social control over groups marginalized by ethnic bias, class, or citizenship status. This book's contents include: Crimmigration, Securitization, and the Criminal Law of the Crimmigrant \* A Reflection on Crimmigration in the Netherlands \* Entering the Risk Society: A Contested Terrain for Immigration Enforcement \* The Changing Landscape of the Criminalization of Migration in Europe \* Disappearing Rights: How States Are Eroding Membership in American Society \* The Impact of Immigration Enforcement Outsourcing on Ice Priorities \* The Spirit of Crimmigration \* Crime and Immigration: The Discourses of Fear as a Theoretical Approach of Critical Evaluation \* Recorded Crime Committed by Migrant Groups and Native Dutch in the Netherlands \* The Foreign-Born in the Canadian Federal Correctional Population \* The Impact of Safety on Levels of Ethnocentrism \* The

This book surveys the growth and development of Islam in Malaysia from the eleventh to the twenty-first century, investigating how Islam has shaped the social lives, languages, cultures and politics of both Muslims and non-Muslims in one of the most populous Muslim regions in the world. Khairudin Aljunied shows how Muslims in Malaysia built upon the legacy of their pre-Islamic past while benefiting from Islamic ideas, values, and networks to found flourishing states and societies that have played an influential role in a globalizing world. He examines the movement of ideas, peoples, goods, technologies, arts, and cultures across into and out of Malaysia over the centuries.

Interactions between Muslims and the local Malay population began as early as the eighth century, sustained by trade and the agency of Sufi as well as Arab, Indian, Persian, and Chinese scholars and missionaries. Aljunied looks at how Malay states and societies survived under colonial regimes that heightened racial and religious divisions, and how Muslims responded through violence as well as reformist movements. Although there have been tensions and skirmishes between Muslims and non-Muslims in Malaysia, they have learned in the main to co-exist harmoniously, creating a society comprising of a variety of distinct populations. This is the first book to provide a seamless account of the millennium-old venture of Islam in Malaysia.

Paint your own lowrider just the way you like it! Impalas, Cadillacs and Rivas. In the Lowrider Coloring Book, you will color the classic and most popular Lowrider models. Lowrider culture reaches back to 1930s Los Angeles, where it became popular for style-conscious Latino-Americans to load their cars with sandbags to bring it closer to the road. Style was everything, and when lowered cars were banned in California in the 1950s, it became necessary to find a way to raise and lower the car simply to avoid fines. The solution was to use hydraulics from old fighter planes left over from World War II. The rapper Kid Frost showcased lowriding in the early 90s hit Lowrider, and since then, the cars are closely associated with hip hop culture. Today, lowriding is bigger than ever with thousands of enthusiasts in most parts of the world. All strive to outdo each other with the most elegant varnish, interior, hydraulics, chrome and rims. The custom cars you'll be coloring in the Lowrider Coloring book were converted by some of the best and most legendary enthusiasts. What color is

This volume looks at applications of artificial intelligence (AI), machine learning (ML), and deep learning (DL) in drug design. The chapters in this book describe how AI/ML/DL approaches can be applied to accelerate and revolutionize traditional drug design approaches such as: structure- and ligand-based, augmented and multi-objective de novo drug design, SAR and big data analysis, prediction of binding/activity, ADMET, pharmacokinetics and drug-target residence time, precision medicine and selection of favorable chemical synthetic routes. How broadly are these approaches applied and where do they maximally impact productivity today and potentially in the near future. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary software and tools, step-by-step, readily reproducible modeling protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and unique, Artificial Intelligence in Drug Design is a valuable resource for structural and molecular biologists, computational and medicinal chemists, pharmacologists and drug designers.

After thirty years of autocratic rule under "Life President" Kamuzu Banda, Malawians experienced a transition to multi-party democracy in 1994. A new constitution and several democratic institutions promised a new dawn in a country ravaged by poverty and injustice. This book presents original research on the economic, social, political and cultural consequences of the new era. A new generation of scholars, most of them from Malawi, cover virtually every issue causing debate in the New Malawi: poverty and hunger, the plight of civil servants, the role of the judiciary, political intolerance and hate speech, popular music as a form of protest, clergy activism, voluntary associations and ethnic revival, responses to the HIV/AIDS pandemic, and controversies over women's rights. Both chameleon-like leaders and the donors of Malawi's foreign aid come under critical scrutiny for supporting superficial democratization. The book ends with a rare public statement on the New Malawi by Jack Mapanje, Malawi's internationally acclaimed writer.

To assess the social processes of globalization that are changing the way in which we co-inhabit the world today, this book invites the reader to essay the diversity of worldviews, with the diversity of ways to sustainably co-inhabit the planet. With a biocultural perspective that highlights planetary ecological and cultural heterogeneity, this book examines three interrelated themes: (1) biocultural

homogenization, a global, but little perceived, driver of biological and cultural diversity loss that frequently entail social and environmental injustices; (2) biocultural ethics that considers -ontologically and axiologically- the complex interrelationships between habits, habitats, and co-inhabitants that shape their identity and well-being; (3) biocultural conservation that seeks social and ecological well-being through the conservation of biological and cultural diversity and their interrelationships.

Presenting an unprecedented, integrated view of migration in North America, this interdisciplinary collection of essays illuminates the movements of people within and between Canada, the Caribbean, Mexico, and the United States over the past two centuries. Several essays discuss recent migrations from Central America as well. In the introduction, Dirk Hoerder provides a sweeping historical overview of North American societies in the Atlantic world. He also develops and advocates what he and Nora Faires call "transcultural societal studies," an interdisciplinary approach to migration studies that combines migration research across disciplines and at the local, regional, national, and transnational levels. The contributors examine the movements of diverse populations across North America in relation to changing cultural, political, and economic patterns. They describe the ways that people have fashioned cross-border lives, as well as the effects of shifting labor markets in facilitating or hindering cross-border movement, the place of formal and informal politics in migration processes and migrants' lives, and the creation and transformation of borderlands economies, societies, and cultures. This collection offers rich new perspectives on migration in North America and on the broader study of migration history. Contributors. Jaime R. Aguila. "Established during World War II to advise the President on the strategic direction of the Armed Forces of the United States, the Joint Chiefs of Staff (JCS) continued in existence after the war and, as military advisers and planners, have played a significant role in the development of national policy. Knowledge of JCS relations with the President, the Secretary of Defense, and the National Security Council is essential to an understanding of the current work of the Chairman and the Joint Staff. A history of their activities, both in war and peacetime, also provides important insights into the military history of the United States. For these reasons, the Joint Chiefs of Staff directed that an official history of their activities be kept for the record. Its value for instructional purposes, for the orientation of officers newly assigned to the JCS organization, and as a source of information for staff studies is self-apparent... Adopting a broad view, it surveys the JCS role and contributions from the early days of World War II through the end of the Cold War. Written from a combination of primary and secondary sources, it is a fresh work of scholarship, looking at the problems of this era and their military implications. The main prism is that of the Joint Chiefs of Staff, but in laying out the JCS perspective, it deals also with the wider impact of key decisions and the ensuing policies."--P. vii.

American air power is a dominant force in today's world. Its ascendancy, evolving in the half century since the end of World War II, became evident during the first Gulf War. Although a great deal has been written about military operations in Desert Shield and Desert Storm, this deeply researched volume by Dr. Diane Putney probes the little-known story of how the Gulf War air campaign plan came to fruition. Based on archival documentation and interviews with USAF planners, this work takes the reader into the planning cells where the difficult work of building an air campaign plan was accomplished on an around-the-clock basis. The tension among air planners is palpable as Dr. Putney traces the incremental progress and friction along the way. The author places the complexities of the planning process within the context of coalition objectives. All the major players are here: President George H. W. Bush, General H. Norman Schwarzkopf, General Colin Powell, General Chuck Horner, and Secretary of Defense Richard Cheney. The air planning process generated much debate and friction, but resulted in great success - a 43-day conflict with minimum casualties. Dr. Putney's rendering of this behind-the-scenes evolution of the planning process, in its complexity and even suspense, provides a fascinating window into how wars are planned and fought today and what might be the implications for the future.
