Frank Horvat (*1928 in Abbazia, today Opatija, Croatia), a pioneering fashion photographer and one of the first professional photographers to use Photoshop, can meanwhile look back at around seventy years of activity and a dazzling career. The grand seigneur now allows us very personal insight into his private life: the autobiography in pictures reveals personal moments from all phases of his life. We encounter the great themes of humankind, such as birth and death, are witness to his ability to play, and to handle animals, we see his family, his friends. They are everyday images like anyone could have assembled in an album. However, there is one slight difference: a master was clearly at work here early on, the quality of the photographs speaks for itself. In the appendix, Horvat comments, in most cases at length, on each of the chronologically ordered pictures.

Political Emotions explores the contributions that the study of discourses, rhetoric, and framing of emotion make to understanding the public sphere, civil society and the political realm. Tackling critiques on the opposition of the public and private spheres, chapters in this volume examine why some sentiments are valued in public communication while others are judged irrelevant, and consider how sentiments mobilize political trajectories. Emerging from the work of the Public Feelings research group at the University of Texas-Austin, and cohering in a New Agendas in Communication symposium, this volume brings together the work of young scholars from various areas of study, including sociology, gender studies, anthropology, art, and new media. The essays in this collection formulate new ways of thinking about the relations among the emotional, the cultural, and the political. Contributors recraft familiar ways of doing critical work, and bring forward new

analyses of emotions in politics. Their work expands understanding of the role of emotion in the political realm, and will be influential in political communication, political science, sociology, and visual and cultural studies.

Mobile communication has an increasing impact on people's lives and society. Ubiquitous media influence the way users relate to their surroundings, and data services like text and pictures lead to a culture shaped by thumbs. Representing several years of research into the social and cultural effects of mobile phone use, this volume assembles fascinating approaches and new insights of leading scientists and practitioners. It contains the results of a first international survey on the social consequences of mobile phones and provides a comprehensive inventory of today's issues and an outlook in mobile media, society, and their future study. Peter Glotz is Emeritus Professor of Media and Society, University of St. Gallen, Switzerland. Stefan Bertschi is a researcher at the University of St. Gallen, Switzerland.

 A milestone anthology of fifty-three voices on the burgeoning scholarly movement—fat studies We have all seen the segments on television news shows: A fat person walking on the sidewalk, her face out of frame so she can't be identified, as some disconcerting findings about the "obesity epidemic" stalking the nation are read by a disembodied voice. And we have seen the movies—their obvious lack of large leading actors silently speaking volumes. From the government, health industry, diet industry, news media, and popular culture we hear that we should all be focused on our weight. But is this national obsession with weight and thinness good for us? Or is it just another form of prejudice—one with especially dire consequences for many already disenfranchised groups? For decades a growing cadre of scholars has been examining the role of body weight in society, critiquing the underlying assumptions, prejudices, and effects of how people perceive and relate to fatness. This burgeoning movement, known as fat studies, includes scholars from every field, as well as activists, artists, and intellectuals. The Fat Studies Reader is a milestone achievement, bringing together fifty-three diverse voices to explore a wide range of topics related to body weight. From the historical construction of fatness to public health policy, from job discrimination to social class disparities, from chick-lit to airline seats, this collection covers it all. Edited by two leaders in the field, The Fat Studies Reader is an invaluable resource that provides a historical overview of fat studies, an in-depth examination of the movement's fundamental concerns, and an up-to-date look at its innovative research.

Eventing, or Horse Trials as it is also known, is the ultimate equestrian test. Its foundations started in the Cavalry schools of Europe at the turn of the nineteenth and twentieth centuries. Initially it was only open to male officers, but soon developed into an Olympic sport where men and women compete on equal terms. The format has evolved over the years, but the sport tests the skills of Dressage (effectively basic training), Cross Country, over a course of solid obstacles and hazards such as ditches and lakes, and Jumping, over knock down, colored poles. The top competitions are three day long events and include such well known sporting spectacles as Badminton and Burghley, where crowds can reach up to 120,000. Many of the venues, especially in Great Britain, are in beautiful stately parks. The Little Book of Eventing reveals the history, introduces the reader to some of the great stars - both human and equine - over the years, the charismatic trainers and some of the best known venues. It also shows what goes on behind the scenes and offers tips on how to take part at novice level or become involved on the organization side.

This chronological study traces the evolution of graphic form, from Antiquity through the Middle Ages and up through the age of technology. Each period is explained in detail, from Classical craftsmanship to the changes brought on by the Industrial Revolution and the modern-day potential of the digital world. As computers now play an integral role in academic and professional environments, virtually everyone makes font choices on a regular basis, rendering typography more relevant than ever before. This thorough, scholarly, and visually-appealing volume combines the history of the letter form--from the invention of printing to the relationship between graphics and totalitarian regimes--with intricate analysis of graphic design and typography, all supported by 850 images with extensive notes and a bibliography. This is an indispensable handbook for understanding our daily visual environment, and essential reading for all graphic arts professionals.

Art of Pernille Ørum Newnes

When Karl Lagerfeld was appointed to the helm of the then-sleepy fashion house Chanel in 1983, he set out to radically reinvent its image--not only through bold collections, but also by shooting the house's campaigns himself. Lagerfeld's photographs breathed life into the brand. Now, his campaigns span the house's collections--luxurious haute couture, ready-to-wear, cruise, accessories--and have established Lagerfeld as a sought-after fashion photographer. Organized chronologically, Chanel: The Karl Lagerfeld Campaigns includes a carefully curated selection of photographs that

showcase hundreds of spectacular clothes worn by the top fashion models and personalities of each era. Women including Christy Turlington, Linda Evangelista, and Kate Moss are photographed in glamorous locations such as Coco Chanel's Paris apartment, the French Riviera, and Rodeo Drive. Filled with more than 600 photographs, plus an essay by fashion writer Patrick Mauriès, the book offers an unrivaled overview of the house of Chanel as seen through the eyes--and lens--of Karl Lagerfeld himself.

"One of those rare biographical novels that bring a whole world to life in a way that lingers in memory." —Jay Parini, author of *Borges and Me* This absorbing, sensitive novel portrays a famed author in a moment of crisis: an aging Hugo von Hofmannsthal returns to a summer resort outside of Salzburg that he visited as a child. But in the spa town where he once thrilled to the joys of youth, he now feels unproductive and uninspired, adrift in the modern world born after World War One. Over ten days in 1924 in a ramshackle inn that has been renamed the Grand Hotel, Hofmannsthal fruitlessly attempts to complete a play he's long been wrestling with. The writer is plagued by feelings of loneliness and failure that echo in a buzz of inner monologues, imaginary conversations

and nostalgic memories of relationships with glittering cultural figures. *Palace of Flies* conjures up an individual state of distress and disruption at a time of fundamental societal transformation that speaks eloquently to our own age.

"The course on transmedia art at the University of Applied Arts in Vienna focuses on transdisciplinary approaches to the development and production of art. It highlights space- and time-based artistic concepts that are generated in critical discourse with theoretical and practical methods, and seizes on communication, performance, and procedural aspects. The publication provides an overview of the wide range of media productions that have been created over the last two decades under the direction of the internationally renowned artist, Brigitte Kowanz.
