This collection of essays explores the intersections between theater as text, theater as performance, and theater as pedagogy. The theory of performance and the practice of theater as it can be done, taught, and conceptualized in academia bring together these three different paths, in a volume that can be equally useful to theater practitioners, to teachers of dramatic texts, and to students, scholars, and teachers of theater seen both as literature and as practice.

Musical Theater in Schools: Purpose, Process, and Performance is a comprehensive resource for general classroom teachers, music and drama educators. The book is the first of its kind to provide strategies for including musical theater across the K-12 curriculum, inviting teachers and arts specialists to utilize musical theater as an interdisciplinary art form within their own classrooms, or as collaborative projects throughout the school community. Typically relegated to after-school activities, musical theater can have a strong place both as an avenue for performance, creativity, and self-expression, or as a pathway for student learning about academic subjects. Drawing upon musical theater terminology, the book is organized into three distinct acts. The first section gives an overview of how this popular art form developed and how its stories reflect our culture and community, with descriptions of musical theater as a profession for adults, and for children. This section also discusses musical theater's compromised position within the arts, often relegated to theater departments even though repertoire and songs are available to music teachers, and argues for musicals as a form of interdisciplinary education. The second section outlines ways of integrating musical theater into the curriculum with considerations for the National Core Arts Standards. The third section provides suggestions for auditions, casting, rehearsing, and presenting a complete production, with a specific focus on student-centered performances. Based on the author's own experiences as a professional musical theater performer, coupled with teaching and research in classroom settings, the book reasons that you do not have to be a Broadway star to teach or perform musical theater. This unique and innovative book supports educators through the process of bringing musical theater into the biggest and most important performance space - the classroom stage.

William Esper, one of the leading acting teachers of our time, explains and extends Sanford Meisner's legendary technique, offering a clear, concrete, step-by-step approach to becoming a truly creative actor. Esper worked closely with Meisner for seventeen years and has spent decades

developing his famous program for actor's training. The result is a rigorous system of exercises that builds a solid foundation of acting skills from the ground up, and that is flexible enough to be applied to any challenge an actor faces, from soap operas to Shakespeare. Co-writer Damon DiMarco, a former student of Esper's, spent over a year observing his mentor teaching first-year acting students. In this book he recreates that experience for us, allowing us to see how the progression of exercises works in practice. The Actor's Art and Craft vividly demonstrates that good training does not constrain actors' instincts—it frees them to create characters with truthful and compelling inner lives.

By the author of *The Last Temptation of Rick Pitino*. Why would the multimillionaire producer of *Cats*, *The Phantom of the Opera*, and *Miss Saigon* take his limo from Manhattan to the struggling former steel town of Levittown, Pennsylvania, to see a high school production of *Les Misérables*? To see the show performed by the astoundingly successful theater company at Harry S Truman High School, run by its legendary director, Lou Volpe. Broadway turns to Truman High when trying out controversial shows such as *Rent* and *Spring Awakening* before they move on to high school theater programs across the nation. Volpe's students from this blue-collar town go on to become Emmy-winning producers, entertainment executives, newscasters, and community-theater founders. Michael Sokolove, a Levittown native and former student of Volpe's, chronicles the drama director's last school years and follows a group of student actors as they work through riveting dramas both on and off the stage. What is a veteran teacher, and how do veteran teachers contribute to schools and education? This international volume contributes to our understanding of veteran teachers with new conceptual studies and empirical research from different countries around the world. It explores what we mean by a 'veteran teacher'; the factors that encourage teachers to remain in the profession; the characteristics of a successful veteran teacher; and the values with which veteran teachers associate themselves. Rather than supporting stereotypes about teachers at different stages in their professional lives, this book both scrutinises prevalent stereotypes and explores the great variety of veteranship in teaching, in different cultures and different subject matter domains. Teacher retention is an increasingly difficult issue and there are severe problems of high staff turnover and attrition in many countries - so recognition of the qualities of more experienced teachers is timely, as well as valuing the potential contributions of veteran teachers in schools. The book also addresses broader issues about teachers' lives and identities, the vulnerability of different groups of teachers to the effects of change and reform, and the various forms of teacher knowledge and teacher development. This book was previously published as a Special Issue of *Teachers and Teaching*.

This book includes strategies for integrating drama in the classroom through the use of creating characters, giving meaning to activities through answering the questions: who, what, when, where, and why about any person and situation under discussion (5 W's), using storyboards, incorporating music, writing radio scripts, and using literature and movies as prompts for improvised enactments. Students will learn how to create characters and apply those creations to different content-area activities, situations, and subject matter. This useful resource describes more than thirty-five scenarios of teachers and students in early elementary grades through graduate school working together to craft drama events that draw out participants' creative energies, interpretations of curricular topics, and investigations of social, political, and personal concerns. In all of these lesson plans, students collectively explore topics, concepts, themes, or tensions that surface as they navigate their way through the conditions and experiences that unfold in a scene, skit, improvisation, or in interrelated episodes. Drama techniques include role play, scripting, dialogue, audience participation, improvisation, and the strategic use of interaction, space, movement, and gesture.

This book introduces readers to the world of children's theater by highlighting one specific model, The Oyster River Players, a small children's theater company in New Hampshire. By exploring the history and dynamics of their own theater company, authors Kelly and Walter Eggers apply broader implications, expanding their focus to include children's theaters of other kinds and in different

cultural settings. Throughout the book, the Eggers show how children's theater succeeds in helping young people learn in ways that would be otherwise inaccessible. Through forays into philosophy and history, as well as personal testimonies, the authors present a coherent argument for the need for children's theaters in nearly every community.

This book explores the concept and vocabulary of postdramatic theatre from a pedagogical perspective. It identifies some of the major anxieties and paradoxes generated by teaching

postdramatic theatre through practice, with reference to the aesthetic, cultural and institutional pressures that shape teaching practices. It also presents a series of case studies that identify the pedagogical fault lines that expose the power-relations inherent in teaching (with a focus on the higher education sector as opposed to actor training institutions). It uses auto-ethnography, performance analysis and critical theory to assist university teachers involved in directing theatre productions to deepen their understanding of the concept of postdramatic theatre.
