Mathematics, which seems to be the most difficult subject for children from the beginning to end of their

classes but this subject is not that much of difficult how much it seems. This is the most important subject in real life. Maths is used everywhere from buying the small grocery item to taking the loans or doing the calculations for business. Maths is like playing with digits and creating some different digits. In this book, we added some easy ways to do the bigger calculations in mind and within a minute. We did some questions of multiplication without really using the tables but just by adding or subtracting the digits. These methods can easily be used in day to day life for doing the bigger calculations within a minute. Even the younger children can easily do these methods in their mind which creates hunger for learning for more concepts as well. Hope this book will help to make the calculations easier.

These simple math secrets and tricks will forever change how you look at the world of numbers. Secrets of Mental Math will have you thinking like a math genius in no time. Get ready to amaze your friends—and

yourself—with incredible calculations you never thought you could master, as renowned “mathemagician” Arthur Benjamin shares his techniques for lightning-quick calculations and amazing number tricks. This book will teach you to do math in your head faster than you ever thought possible, dramatically improve your memory for numbers, and—maybe for the first time—make mathematics fun. Yes, even you can learn to do seemingly complex equations in your head; all you need to learn are a few tricks. You'll be able to quickly multiply and divide triple digits, compute with fractions, and determine squares, cubes, and roots without blinking an eye. No matter what your age or current math ability, Secrets of Mental Math will allow you to perform fantastic feats of the mind effortlessly. This is the math they never taught you in school.

A STRATEGIC BOOK THAT GIVES YOU A SURE SHOT COMPETITIVE EDGE §  
Competitive exams test the conceptual knowledge of students along with

time management skills. However, several students generally do not get the expected rank/score despite knowing all the concepts. § It is an irony that students spend several precious hours and parents spend huge money running from one coaching institute to another, but nobody guides them on time management right from the beginning, and when students attend crash courses (about 1-2 months before competitive exam), they hardly have any time to master these skills. § The author of this book strongly believes that with proper and timely strategic guidance on time management, every student can achieve well in Competitive Exams. § This book has the strength to cover the entire syllabus in 10 days. For fast track coverage of the entire course/ online coaching, students can contact the author at [monicabhandari.books@gmail.com](mailto:monicabhandari.books@gmail.com). § This book encompasses 10 chapters. Each chapter starts with a quick review of the important concepts followed by shortcuts, tips & tricks. The strategic manner in which topics are inter-linked in this book will help in building

a strong conceptual clarity among the students. For illustration, questions from previous years papers of JEE and NEET with accurate & shortest possible solutions are provided along with each topic. The questions are based on the author's interactions with students who had appeared in the aforementioned competitive exams in the past years. Solving the carefully handpicked questions given in this book, students will find themselves at ease with the Chemistry paper in any Competitive as well as Board examination. This book will enable the students with advanced abilities to attempt maximum number of questions accurately within the stipulated time. § Remember! Practice is the key to success. So, practice more and more questions on each and every topic from a good question bank. § And here's the last but not the least and the most important tip - revise all your incorrectly attempted questions repeatedly and bookmark important questions so that you gain perfection in attempting questions having similar concept or trick. IT'S NOT ALWAYS ABOUT STUDYING HARD,

BUT STUDYING SMART!!

This book details the battle one must fight to be an independent thinker, showing how an honest reassessment of what it means to be a professional in today's corporate society can be remarkably liberating. Poignant examples from the world of work reveal the workplace as a battleground for the very identity of the individual. Schmidt contends that professional work is inherently political--that the unstated duty of professionals is to maintain strict "ideological discipline." Career dissatisfaction evolves as workers lose control over the political component of their creative work. After reading this insightful book, no one who works for a living will ever think the same way about their job. Jeff Schmidt lives in Washington, D.C., where he is an editor for *Physics Today*.

For the mathematics enthusiast of any age or level of sophistication, this stimulating treasury of unusual math problems offers unlimited opportunity for mind-

biggling recreation. Carles W. Trigg, Dean Emeritus and Professor Emeritus at Los Angeles City College and one of the country's best-known problemists, has compiled nearly 300 mathematical

brainteasers from the field of arithmetic, algebra, plane and solid geometry, trigonometry, number theory, and such general recreational mathematics and dissections, cryptarithms and magic squares. The object of each problem is to find the quickest, most elegant solution - they are often unorthodox and there is usually an element of surprise in each. Ranging from the simple to complex, problems are both original with the author and the work of over 100 other qualified mathematicians. Most are rarely seen or entirely new; all challenge the reader to devise solutions more elegant than the ones provided.
