Common Core State Standards and the Speech-Language Pathologist: Standards-Based Intervention for Special Populations is a tool for the analysis of the Common Core State Standards (CCSS) and the development of interventions to meet student-specific needs. The CCSS is an education initiative in the United States that details what K-12 students should understand in English language arts and mathematics by the end of each grade. The initiative seeks to establish consistent education standards across the United States and ensure that graduating students are prepared to enter college or the workforce. As of 2015, forty-three states had adopted the CCSS. With the implementation of the CCSS, it is critical that speech-language pathologists collaborate with educators to enable the success of students with communication disorders as well as English language learners. This text offers a practical approach for application of the CCSS with a parallel analysis of children's strengths and needs to create a template for intervention. It addresses strategies to facilitate the success of students in accessing and achieving the expectations of the general curriculum, with a focus on students with communication disorders, hearing loss, vision loss, deaf-blindness, specific learning disabilities, autism, multiple disabilities, and English language learners. Key features include: Background and implications of the CCSS Chapters written by experts in the field Tools for analysis of the language expectations of the CCSS and a framework for aligning intervention (both direct and classroom-based) with the CCSS for students at elementary and secondary levels Collaboration strategies to facilitate success in the classroom Multiple case studies Common

Core State Standards and the Speech-Language Pathologist is a must-have resource for any speech-language pathologist working with children, as well as their education and administration partners.

Get exact information on 24 common disorders and how communication can be negatively impacted. Resources abound on the nature of disorders such as Autism and Down Syndrome. However, how do we help these individuals communicate more effectively and where do we find resources to learn more? Within this book, each communication disorder is described by the definition, description, characteristics, causes, implications for treatment, and additional resources, such as support groups, books, websites and additional sources for finding out more to best support individuals who struggle communicating. Supporting individuals with communication disorders and related conditions involves a coordinated team of people that can include family, professionals, educators and other community members. Whether seeking support for adults or children with communication disorders, ensuring everyone involved is as knowledgeable as possible is key to providing support to the individual and their family. This resource serves to be a guide to do just that. Communication disorders are some of the most common disabilities in the United States, affecting both children and adults. This book came together as part of a project to create a resource for graduate students and speech-language pathologists new to the field on the wide range of communication disorders that exist. We have found that it has become a valued resource for many educators and family members of those with communication disorders as well. In this book, we provide a wealth of information about specific disorders in an easily accessible format. The collaborative efforts of our group of speech-language pathologists over the past three years have grown the project's resources into this book including, information on 24 communication disorders and related conditions. Our hope is to inform, educate and aid individuals with communication disorders, their families, and the people who work with them so they may receive impactful support and treatment. Knowledge is power! Who can benefit from using this book? Individuals seeking treatment and support for communication disorders and related conditions can use this book to become more informed about their condition and relevant resources. Parents and families supporting those with communication disorders can learn more about a specific condition and share information with those around them to become advocates for their loved ones. When caregivers have the information and education they need, they can more easily develop a positive outlook and provide better support for their family. Speech-language pathologists, educators, medical professionals, school personnel, social workers, and other professionals providing related support can find this book helpful in gaining additional knowledge, not only regarding the condition, but also the implications that communication deficits will have on the clients they serve.

The purpose of this guide is to address the knowledge areas and skills impacted by hearing loss and to describe assessment procedures to identify the adverse educational effect of hearing loss in these areas. It is not the intent of this guide to include all assessment instruments that could be used to identify the areas of strengths and needs of students with hearing loss. It has been developed to provide a framework for school teams and professionals specializing in the education of students with hearing loss to use when assessing the unique needs of children who are deaf or hard of hearing. These assessments can be used as part of the evaluation process to determine eligibility, as tools for developing specific goals and objectives, or as a measure of pre- and post-instruction performance. Expected development in the expanded core knowledge and skills is also a significant consideration when determining the impact of the hearing loss on school performance and will therefore be integrated into the assessment process described.

IEP Goal Writing for Speech-Language Pathologists: Utilizing State Standards, Second Edition familiarizes the speech-language pathologist (SLP) with specific Early Learning Standards (ELS) and Common Core State Standards (CCSS) as well as the speech-language skills necessary for students to be successful with the school curriculum. It also describes how to write defensible Individualized Education Plan (IEP) goals that are related to the ELS and CCSS. SLPs work through a set of steps to determine a student's speech-language needs. First, an SLP needs to determine what speech-language skills are necessary for mastery of specific standards. Then, the SLP determines what prerequisite skills are involved for each targeted speech-language skill. Finally, there is a determination of which Steps to Mastery need to be followed. It is through this process that an SLP and team of professionals can appropriately develop interventions and an effective IEP. The text takes an in-depth look at the following speech-language areas: vocabulary, questions, narrative skills/summarize, compare and contrast, main idea and details, critical thinking, pragmatics, syntax and morphology, and articulation and phonological processes. These areas were selected because they are the most commonly addressed skills of intervention for students aged 3 to 21 with all levels of functioning. For each listed area, the text analyzes the prerequisite skills and the corresponding Steps to Mastery. It provides a unique, step-by-step process for transforming the Steps to Mastery into defensible IEP goals. The key is to remember that the goal must be understandable, doable, measurable, and achievable. This text provides clear guidelines of quantifiable building blocks to achieve specific goals defined by the student's IEP. School-based SLPs are instrumental in helping students develop speech and language skills essential for mastery of the curriculum and standards. All SLPs working with school-aged children in public schools, private practice, or outpatient clinics will benefit from the information in this text. New to the Second Edition: * Ten Speech and Language Checklists for determining speech and language needs of an individual, 3-21 years of age, as well as measuring progress. * Material on measuring progress including five performance updates. * Goal writing case studies for four students of different ages and skill levels. * A thoroughly updated chapter on writing goals with up-to-date examples. * Revised Prerequisite Skills and Steps to Mastery to reflect the current state of research. * Expanded focus on evidence-based practice.
