### **Small Arms Control in Africa** Vintage

In *Out of Africa*, author Isak Dinesen takes a wistful and nostalgic look back on her years living in Africa on a Kenyan coffee plantation. Recalling the lives of friends and neighbours—both African and European—Dinesen provides a first-hand perspective of colonial Africa. Through her obvious love of both the landscape and her time in

Africa, Dinesen's meditative writing style deeply reflects the themes of loss as her plantation fails and she returns to Europe. HarperTorch brings great works of non-fiction and the dramatic arts to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. [Hide and Seek](#) Bebooks This book, based on field research in the West African country of The Gambia, explores how domestic gun control is shaped by international efforts and how local actors interact with international organizations or opt not to do so. The book also shows how the question of

who can have what kind of gun under what circumstances is an intrinsic question to modern societies across the world, but it is seldom one that is addressed in sub-Saharan Africa except in cases of post-conflict countries. Small arms control and gun control are often treated as separate efforts, with the former the domain of international actors such as the United Nations and the latter being of concern to the domestic politics of countries such as the United States. By focusing on a country that has never seen the outbreak of a civil war, the book is able to disentangle the complex roots of gun control in Africa, its origins in colonial era legislation, its reverberations across social life, and how it

shapes contemporary understandings of groups ranging for security guards to hunters.

The Forest People is an astonishingly intimate and life-enhancing account of a hunter-gatherer tribe living in harmony with nature -- and an all-time classic of anthropology. For three years, Colin

Turnbull lived with an isolated group of Pygmies deep in the forest of the African Congo, experiencing their daily life first-hand. He attended their hunting parties and initiation ceremonies, witnessed their music and their rituals, observed their quarrels and love affairs. He documented them as an anthropologist but was accepted among them as a friend. A ground-breaking work in its time, The Forest People made him one of the most famous intellectuals of the 1960s and 1970s. It remains a transporting account of an earthly paradise and of a legendary and fascinating people. With a new foreword by Horatio Clare.

The Shadow World

Smithsonian Books (DC)

In many contemporary nations, particularly in Africa, Asia, and Latin America, the armed forces play a major role in governing. Historical, economic, and sociological factors have contributed to the political prominence of the military in developing countries. Nevertheless, in the

1980s several states in Latin America restored civilian rule followi

**Second Report** Harper Collins

In its last decades, the apartheid regime was confronted with an existential threat. While internal resistance to the last whites-only government grew, mandatory international sanctions prohibited sales of strategic goods and arms to South Africa. To counter this, a global covert network of nearly fifty countries was built. In complete secrecy, allies in corporations, banks, governments and intelligence agencies across the world helped illegally supply guns and move cash in one of history's biggest money laundering schemes. Whistleblowers were assassinated and ordinary people suffered. Weaving together archival material, interviews and newly declassified

documents, Apartheid Guns and Money exposes some of the darkest secrets of apartheid's economic crimes, their murderous consequences, and those who profited: heads of state, arms dealers, aristocrats, bankers, spies, journalists and secret lobbyists.

These revelations, and the difficult questions they pose, will both allow and force the new South Africa to confront its past.

Coat of Arms - Africa Good Press

This handbook provides critical analyses of the theory and practices of small arms proliferation and its impact on conflicts and organized violence in Africa. It examines the terrains, institutions, factors and actors that drive armed conflict and arms proliferation, and further explores the nature, scope, and dynamics of conflicts across the continent, as well as the extent to which these conflicts are exacerbated by the proliferation of small arms. The volume features rich analyses by contributors who are acquainted with, and widely experienced in, the formal and informal structures of arms proliferation and control, and their repercussions

on violence, instability and insecurity across Africa. The chapters dissect the challenges of small arms and light weapons in Africa with a view to understanding roots causes and drivers, and generating a fresh body of analyses that adds value to the existing conversation on conflict management and peacebuilding in Africa. With contributions from scholars, development practitioners, defence and security professionals and civil society activists, the handbook seeks to serve as a reference for students, researchers, and policy makers on small arms proliferation, control and regulation; defence and security practitioners; and those involved in countering violence and managing conflicts in Africa.

*Modern African Wars (2)*  
Palgrave Macmillan

Hitler first considered an invasion of Great Britain in autumn 1940, then scheduled Operation Barbarossa, the conquest of the European part of the Soviet Union, for May 1941. Anxious to emulate Hitler's successes, the Italian dictator Mussolini embarked upon unnecessary military adventures in North Africa and the Balkans, which

forced Hitler's intervention, diverting and depleting precious German resources, and a six-week postponement of Barbarossa. In this second of four volumes [Men-at-Arms 311, 316, 326 & 330] on the German Army of the Second World War, Nigel Thomas examines the uniforms and insignia of the forces involved in North Africa and the Balkans. Men-at-Arms 311, 316, 326, 330 and 336 are also available in a single volume special edition titled 'German Army in World War II'. *Arms for Africa* Osprey Publishing

Colin Turnbull made a name for himself with *The Forest People*, his acclaimed study of African Pygmies. His second book, however, *The Mountain People*, ignited a swirl of controversy within anthropology and tainted Turnbull's reputation as a respected anthropologist. In this scrupulously researched biography, Roy Richard Grinker charts the rise and fall of this colorful and controversial man—from his Scottish family and British education to travels in Africa and his great love affair with Joe Towles. Grinker, noted for his own work on the Pygmies, herein gives

readers a fascinating account of Turnbull's life and work. Originally published by St. Martin's Press

*The Shadow World* is the harrowing behind-the-scenes tale of the global arms trade, revealing the deadly collusion that all too often exists among senior politicians, weapons manufacturers, felonious arms dealers, and the military—a situation that compromises our security and undermines our democracy. Pulling back the curtain on this secretive world, Andrew Feinstein reveals the corruption and the cover-ups behind a range of weapons deals, from the largest in history—between the British and Saudi governments—to the guns-for-diamonds deals in Africa and the imminent \$60 billion U.S. weapons contract with Saudi Arabia. He exposes in forensic detail both the formal government-to-government trade in arms and the shadow world of illicit weapons dealing,

and lays bare the shockingly frequent links between the two. Drawing on his experience as a member of the African National Congress who resigned when the ANC refused to launch a corruption investigation into a major South African arms deal, Feinstein illuminates the impact this network has not only on conflicts around the world but also on the democratic institutions of the United States and the United Kingdom. Based on pathbreaking reporting and unprecedented access to top-secret information and major players in this clandestine realm, *The Shadow World* places us in the midst of the arms trade's dramatic wheeling and dealing—from corporate boardrooms to seedy out-of-the-way hotels—and reveals the profound danger and enormous financial cost this network represents to all of us.

[U.S. Policy Toward Africa](#)  
Basic Books

The thesis explores African small arms control practices and how these have emerged and changed over time. The thesis traces the origin of small arms control practices in Africa by using a historical narrative methodology. It

then categorizes and interprets the findings using a critical theory, historical-relationalism, and identifies five different small arms control practices embedded in different historical periods: the pre-colonial, the imperial, the colonial, the decolonial and the neoliberal governance system. These systems are described, compared and situated in their historical contexts. The neoliberal governance system is specifically explored through an in-depth case study of the Nairobi Protocol. The Nairobi Protocol is an intergovernmental convention adopted by states in East and Central Africa to address proliferation of small arms and light weapons. Based on the institutional design and implementation record of the Nairobi Protocol, as well as evidence of simultaneous ongoing militarism in member states, the author draws conclusions about neoliberal governance as small arms control practice. She finds that neoliberal governance of small arms is associated with technical-, administrative- and legal reforms, aimed at protecting state and

market interests, by, for example, enhancing controls of weapon flows not sanctioned by the state, while enabling state sanctioned proliferation." [Ammunition controls, the att, and Africa](#) Random House

There is no consensus on whether ammunition should be included in the scope of the international Arms Trade Treaty (ATT). Most states support its inclusion and point towards the negative impact of irresponsible and poorly controlled transfers of ammunition. The insecurity and tremendous human suffering associated with such transfers in the context of armed violence in Africa are a case in point. A few states, however, oppose the inclusion of ammunition in the ATT and argue that controlling international ammunition transfers would be unfeasible and highly cost-intensive. This report discusses the challenges of ammunition controls in Africa against the background of the international discussions on the ATT. It demonstrates that concerns regarding ammunition-inclusion in the ATT are unfounded. It also argues that complementary action will

be required by African stakeholders and their international partners to strengthen ammunition controls in the region. Holger Anders is a consultant on arms control with several years of work experience in sub-Saharan Africa, including as expert monitoring the implementation of a UN arms embargo. He holds post-graduate degrees in peace studies and international relations and has published and presented widely at global and regional levels in Europe and Africa on the scope for action to combat illicit trafficking of arms and ammunition.

*Domestic Gun Control and International Small Arms Control in Africa* Westview Press

The South African 'Arms Deal' was never a single event. Rather it was, and still is, a series of scandals and outrages, all contributing towards a dubious momentum that takes South Africa further away from transparent democratic practice. The Devil in the Detail, written by two of South Africa's leading researchers on the subject, takes the reader on a journey of insight. Witness at close hand the breaking open of State secrets, with tales of outrageous personal enrichment. Explore how the Arms Deal emerged out of the criminal networks of both the old SADF and the ANC's security apparatus, raising questions as to whether South Africa's remarkable transition was not oiled, at key points, by criminal intent and collusion. Follow the trail of the various offset deals done after the Arms Deal - cumulatively worth just as much as - and discover that corruption continues

to impact on defence spending in South Africa. Examine the economics and witness how the Arms Deal was not only economically irrational, but virtually suicidal, almost single-handedly derailing the post-apartheid economic project. Finally, read about the rise of the 'shadow state', the politicisation of prosecutions, and the rise of the 'spooks'. The remarkable conclusion of this landmark study is that years after the deal took place, the forces that drove its decisions have only grown in strength, further blighting South Africa's prospects for a future in which all may have a share.

Concerns regarding arms transfers to sub-Saharan Africa are widespread and have motivated worldwide efforts to control arms flows. Although volumes of arms transferred to the region are low by global standards, even supplies of relatively small quantities of older weapons can have a notable impact on conflicts. This detailed report provides a tour d'horizon of recent developments in arms

transfers to both governments and rebel groups in sub-Saharan Africa. It highlights the secrecy that surrounds arms procurement decisions, which hinders assessments of whether arms are being acquired for legitimate reasons and will contribute to the peace and security of sub-Saharan Africa.

#### U.S. Policy Toward Africa

Bloomsbury Publishing

Thousands of miles apart, John Wesley Zooma and Clarence VanDyke Jackson witness horrific events in their young lives—events that ultimately shape the direction of their future.

Zooma is a full member of the Zulu tribe in Natal, South Africa, and Jackson is an African American in a small town in south-central Mississippi.

Following the traumatic events of their youths, they vow to exact revenge someday. Years later, the two become connected through Jackson's illegal arms trade business. When Jackson falls in love with a Brazilian woman, he decides it's time to leave the arms trade behind—but not before brokering one last deal with his partner, a German man named Carl Durnbacher. But Durnbacher doesn't take

well to Jackson's defection from the partnership, and he orders a hit on Jackson. In the meantime, trouble is brewing in South Africa, where Zooma is privy to the details of the impending uprising. He uses his resources to aid friend Michael Stephens, who had saved his life during a work accident, escape the country with his family instead of being killed. Through a tangled web of relationships, Downfall and Freedom follows the illegal arms trade business as it becomes involved in the South African revolution.

Springer Nature

Portugal is a small country, but for many years it possessed the world's third largest empire; and its armed forces deserve to be better known than they are in the English-speaking world.

Fortunately, the British co-author was able to meet a Portuguese colleague who was not only an authority on Portuguese military history and uniforms, but who had also served in Mocambique himself. A collaborative venture

seemed the best way of providing the kind of 'hard' information about Portuguese weapons, organisation, uniforms and insignia that has been lacking until now.

#### **Out Of Africa**

Prior to the Six-Day War, Israel was a darling of the international left, vocally opposed to apartheid and devoted to building alliances with black leaders in newly independent African nations. South Africa, for its part, was controlled by a regime of Afrikaner

nationalists who had enthusiastically supported Hitler during World War II. But after Israel's occupation of Palestinian territories in 1967, the country found itself estranged from former allies and threatened anew by old enemies. As both states became international pariahs, a covert—and lucrative—military

relationship blossomed between these seemingly unlikely allies. Based on extensive archival research and exclusive interviews with former generals and high-level government officials in both countries, *The Unspoken Alliance* tells a troubling story of Cold War paranoia, moral compromises, and startling secrets.

### **Downfall and Freedom**

Using eyewitness accounts of travelers and missionaries to Africa, the oral history of Africans, and the visual evidence of the weapons themselves, Spring builds a comprehensive cultural and ethnographic survey of traditional arms and armor from several centuries ago to the present.
