Oswaal NTA CUET (UG) Question Bank Chapterwise & Topicwise Economics For 2024 Exam Oswaal Books

Political Research: Methods and Practical Skills, the market leading textbook in political research methods, is essential reading for students taking a module in research methods as part of a politics or international relations degree. Its accessible, step-by-step approach covers the entire research methods process, equipping students with the necessary skills to successfully conduct their own independent study and research. With coverage of both quantitative and qualitative methods, the book begins by guiding readers on how to come up with a research question, and leads the reader right through to writing up a final report. The book also includes chapters on theory, methodology, and the philosophy of social science, which are fully revised for the third edition to include up-to-date 'real world' examples, such as Gerber and Green's survey on political attitudes or Wantchekon's study on clientelism in Benin. These sections help students to understand essential debates around research methods, as well as sharing practical guidance. The easy to understand language and straightforward approach of *Political Research: Methods and Practical Skills* help students get to grips with particularly complex topics relating to epistemological, ontological and mythological research, and quantitative questions such as 'what is data?'. The third edition reflects key areas of development in the field, such as the increased importance of ethics, and changes in digital research. The book is also enhanced with a range of engaging learning features including chapter summaries, end-of-chapter conclusions and questions, and a guide to further reading, created to reinforce students' understanding of research methods and further explore specific approaches to research.

Census '80 Product Primers Cambridge University Press
With people living longer than ever and the baby boomer generation reaching retirement age, some people worry that we will run short of workers and taxpayers. Media reports and political discourse about our ageing population often adopt a tone of panic. But is this panic justified? This discussion paper untangles the facts from the myths, so that Australians can look afresh at the population ageing issue. This paper addresses key questions, including: Will an ageing population blow government budgets? Will ageing cause a shortage of workers? Is high immigration and more population growth the answer? A thorough analysis of the evidence finds that each of these concerns is unfounded. Far from being an economic calamity, our demographic maturity offers many advantages for improving social and environmental outcomes.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports

starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.
