NEW YORK TIMES BESTSELLER • The definitive cookbook on French cuisine for American readers:

"What a cookbook should be: packed with sumptuous recipes, detailed instructions, and precise line drawings. Some of the instructions look daunting, but as Child herself says in the introduction, 'If you can read, you can cook.'" —Entertainment Weekly "I only wish that I had written it myself." —James Beard Featuring 524 delicious recipes and over 100 instructive illustrations to guide readers every step of the way, *Mastering the Art of French Cooking* offers something for everyone, from seasoned experts to beginners who love good food and long to reproduce the savory delights of French cuisine. Julia Child, Simone Beck, and Louisette Bertholle break down the classic foods of France into a logical sequence of themes and variations rather than presenting an endless and diffuse catalogue of dishes—from historic Gallic masterpieces to the seemingly artless perfection of a dish of spring-green peas. Throughout, the focus is on key recipes that form the backbone of French cookery and lend themselves to an infinite number of elaborations—bound to increase anyone's culinary repertoire. "Julia has slowly but surely altered our way of thinking about food. She has taken the fear out of the term 'haute cuisine.' She has increased gastronomic awareness a thousandfold by stressing the importance of good foundation and technique, and she has elevated our consciousness to the refined pleasures of dining." —Thomas Keller, *The French Laundry*

*** 'Are you aging fabulously? Here's how.' Anna Murphy, *The Times* 'A lovely book celebrating female beauty over 40.' *Top Sante* 'You become what you see. What you see determines what you believe - and the most powerful way of inspiring people is with images. My goal with *AndBloom* is to motivate women to embrace life without fear. To provide examples of women between the age of 40 and, currently, 100, so that any woman can open this book and see themselves recognized.' Denise Boomkens launched the *AndBloom* project on Instagram in 2018, to create a 'happy place for women over 40' - a community where women can be themselves and where aging is celebrated instead of feared. In this, her first book, she shares her own experiences of aging and brings together portraits and interviews with more than 100 extraordinary 'ordinary' women to create both a gloriously illustrated celebration of female beauty over 40 and an empowering handbook to aging happily.

Oskar Schlemmer (1888 - 1943) was one of the most versatile all - rounders of the last century and as unusual as a painter as he was as a sculptor, draughtsman, graphic artist, stage designer, wall designer, creator of epochal dance projects and author. His vision was the "new" man living in functional architecture, thinking clearly and acting clearly in the modern age which would never again sink into the chaos of war. The catalogue accompanying the first comprehensive Schlemmer retrospective for almost forty years presents over 250 high - quality works, in particular the seven original costumes of the Triadisches Ballett (Triadic Ballet) together with rare documents of the time. The connection between the all - encompassing attempts at reform of the Bauhaus are discussed as well as Schlemmer's vain attempts to reconcile his "unpolitical" art with the Nazi dictatorship's ideas of state - controlled art. The focus will be directed towards Schlemmer's lofty ethical demands, which always regarded man, typified as a "Kunstfigur" (artist ic figure) as the "measure of all things".

A FINALIST FOR THE PEN/WEST TRANSLATION AWARD The 100th Anniversary Edition of a global classic, containing beautiful translations along with the original German text. While visiting Russia in his twenties, Rainer Maria Rilke, one of the twentieth century's greatest poets, was moved by a spirituality he encountered there. Inspired, Rilke returned to Germany and put down on paper what he felt were spontaneously received prayers. Rilke's *Book of Hours* is the invigorating vision of spiritual practice for the secular world, and a work that seems remarkably prescient today, one hundred years after it was written. Rilke's *Book of Hours* shares with the reader a new kind of intimacy with God, or the divine—a reciprocal relationship between the divine and the ordinary in which God needs us as much as we need God. Rilke influenced generations of writers with his *Letters to a Young Poet*, and now Rilke's *Book of Hours* tells us that our role in the world is to love it and thereby love God into being. These fresh translations rendered by Joanna Macy, a mystic and spiritual teacher, and Anita Barrows, a skilled poet, capture Rilke's spirit as no one has done before. *Godwi Oder Das Steinerne Bild Der Mutter* Harper Collins

Advances in instrumentation and applied instrumental analysis methods have allowed scientists concerned with food and beverage quality, labeling, compliance, and safety to meet ever increasing analytical demands. Texts dealing with instrumental analysis alone are usually organized by the techniques without regard to applications. The biannual review issue of *Analytical Chemistry* under the topic of Food Analysis is organized by the analyte such as N and protein, carbohydrate, inorganics, enzymes, flavor and odor, color, lipids, and vitamins. Under 'flavor and odor' the subdivisions are not along the lines of the analyte but the matrix (e.g. wine, meat, dairy, fruit) in which the analyte is being determined. In "Instrumentation in Food and Beverage Analysis" the reader is referred to a list of 72 entries entitled "Instrumentation and Instrumental Techniques" among which molecular spectroscopy, chromatographic and other sophisticated separations in addition to hyphenated techniques such as GS-Mass spectrometry. A few of the entries appear under a chapter named for the technique. Most of the analytical techniques used for determination, separations and sample work prior to determination are treated in the context of an analytical method for a specific analyte in a particular food or beverage matrix with which the author has a professional familiarity, dedication, and authority. Since, in food analysis in particular, it is usually the food matrix that presents the research analytical chemist involved with method development the greatest challenge.

In its most prestigious exhibition to date, the Fondation Beyeler has devoted itself to the early paintings and sculptures of Pablo Picasso (1881-1973) that date from his so-called Blue and Pink periods to early Cubism. The paintings from this stage of his career, all produced between 1901 and 1907, are milestones on the road Picasso took to becoming the most famous artist of the twentieth century. They can be counted among modernism's most beautiful and most emotional works, and

are also some of the most precious works of art ever to exist. This comprehensive exhibition and its companion catalogue feature around eighty masterpieces, most of which are only rarely loaned out by famous museums and private collections around the world. In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.
