Negotiation impacts
every aspect of our
lives, from the deals
we strike on the job, to
our relationships with
family members and
neighbors, to the
transactions we make
as customers. Yet most
people do anything
they can to avoid
negotiating—it makes
them uncomfortable,

nervous, even frightened. This plague of negotiaphobia is what Don Hutson and George Lucas are here to remedy. Hutson and Lucas tell the tale of Jay Baxter, who sells more than anyone else in his company but finds himself in trouble because his profit margins are so slim—he's giving too much away to close the deal. Enter the One Minute Negotiator, who teaches him a three-step negotiating process that not only helps him make more profit per sale but can be applied anywhere, on the job or off. The key to the process is flexibility. Most books on negotiation preach one of two gospels: thou shalt collaborate or thou shalt compete. But no two negotiations are

alike—one strategy cannot fit all. The One Minute Negotiator teaches you four viable strategies and shows how to choose the one best suited to the situation, your own inclinations, and the strategy being used by the other side. Besides the obvious benefits, conquering negotiaphobia will reduce your stress level. You'll never walk away thinking about what you should have asked for or might have gotten. Instead, with the tools Hutson and Lucas provide, you can confidently and consistently guide any negotiation to the best possible conclusion. Management Across Cultures BradyGames Philosophers have warned of the perils of a life spent without reflection, but what

constitutes reflective inquiry - and why it's necessary in our lives - can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the Handbook of Reflection and Reflective Inquiry presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention (Thoreau's "wide-awakeness"), an act of consciousness, and a

process by which people can understand themselves, their work (particularly in the form of life projects), and others. Building on this foundation, the Handbook analyzes through the work of 40 internationally oriented authors: - Definitional issues concerning reflection, what it is and is not; - Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education; - Reflection as promoted across professional educational domains, including K-12 education, teacher education, occupational therapy, and the law; - Methods of facilitating and scaffolding reflective engagement; - Current pedagogical and

research practices in reflection; - Approaches to assessing reflective inquiry. Educators across the professions as well as adult educators, counselors and psychologists, and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.

Plot summary The term gilded age, commonly given to the era, comes from the title of this book. Twain and Warner got the name from Shakespeare's King John (1595): "To gild refined gold, to paint the lily... is wasteful and ridiculous

excess." [citation needed] Gilding gold, which would be to put gold on top of gold, is excessive and wasteful, characteristics of the age Twain and Warner wrote about in their novel. Another interpretation of the title, of course, is the contrast between an ideal "Golden Age", and a less worthy "Gilded Age", as gilding is only a thin layer of gold over baser metal, so the title now takes on a pejorative meaning as to the novel's time, events and people. The novel concerns the efforts of a poor rural Tennessee family to become affluent by selling the 75,000 acres (300 km²) of unimproved land acquired by their patriarch, Silas "Si" Hawkins, in a timely

manner. After several adventures in Tennessee, the family fails to sell the land and Si Hawkins dies. The rest of the Hawkins story line focuses on their beautiful adopted daughter, Laura. In the early 1870s, she travels to Washington, D.C. to become a lobbyist. With a senator's help, she enters Society and attempts to persuade Congressmen to require the federal government to purchase the land. A parallel story written by Warner concerns two young upperclass men, Philip Sterling and Henry Brierly, who seek their fortunes in land in a novel way. They make a journey with a group intent on surveying land in Tennessee in order to acquire it for

speculation. Philip is good-natured but plodding. He is in love with Ruth Bolton, an aspiring physician and feminist. Henry is a born salesman, charming but superficial. The theme of the novel is that the lust for getting rich through land speculation pervades society, illustrated by the Hawkinses as well as Ruth's well-educated father, who nevertheless cannot resist becoming enmeshed in self-evidently dubious money-making schemes. The Hawkins sections were written by Twain; these include several humorous sketches. Examples are the steamboat race that leads to a wreck (Chapter IV) and Laura's toying with a clerk in a Washington

bookstore (Chapter XXXVI). Notable too is the comic presence throughout the book of the eternally optimistic and eternally broke Micawber-like character, Colonel Beriah Sellers. The character was named Escol Sellers in the first edition and changed to Beriah when an actual George Escol Sellers of Philadelphia objected. A real Beriah Sellers then also turned up, causing Twain to use the name Mulberry Sellers in *The American Claimant*. The Sellers character was modeled after Twain's maternal cousin, James Lampton, and the land-purchase plot parallels Twain's father's purchase of a Tennessee parcel whose prospective sale, Twain wrote in his autobiography, "kept

us hoping and hoping, during 40 years, and forsook us at last". The main action of the story takes place in Washington, D.C., and satirizes the greed and corruption of the governing class. Twain also satirizes the social pretensions of the newly rich. Laura's Washington visitors include "Mrs. Patrique Oreille (pronounced Ore-ey)", the wife of "a wealthy Frenchman from Cork". The book does not touch upon other themes now associated with the "Gilded Age", such as industrialization, monopolies, and the corruption of urban political machines. This may be because this book was written at the very beginning of the period.

A look at the current and future uses of magnesium-based products and their role in the world's environmental and technological revolution. The lightest of all structural metals, having one-fourth the density of steel and two-thirds that of aluminum, magnesium has already been adopted as an alternative construction material in applications as far ranging as automotive and sports equipment, electronics, and space technology. In a world concerned with minimizing the environmental impact of products, the choice of light-weight, energy-saving, and high-performance materials, like magnesium, would seem a small,

significant step towards improving life on this planet. Magnesium, Magnesium Alloys, and Magnesium Composites introduces the science and current applications of this important metal, shedding light on the magnesium-based composites developed over the last fifteen years. Chapters include in-depth discussion of: The characteristics of pure magnesium—including atomic properties and crystal structure as well as physical, electrical, and mechanical properties. Magnesium alloys—and the effects of the alloying elements, such as aluminum, lithium, copper, nickel, and silicon. The properties of magnesium-based composites—and

the effects of different types (metallic, ceramic, interconnected, and intermetallic) of reinforcements of varying length (from micronscale to nanometric length) Corrosion aspects of magnesium-based materials Magnesium-based products in medicine, sports equipment, and the automotive, aerospace, and electronics industries Bringing together, for the first time, the science, properties, and technologies relating to the current and future uses of magnesium, this important reference also offers readers a glimpse of a not-too-distant world in which environmental safety and sound engineering are a reality.

Management practices and processes frequently differ across national and regional boundaries. What may be acceptable managerial behaviour in one culture may be counterproductive or even unacceptable in another. As managers increasingly find themselves working across cultures, the need to understand these differences has become increasingly important. This book examines why these differences exist and how global managers can develop strategies and tactics to deal with them. The text draws on recent research in anthropology, psychology, and management, to explain the cultural

and psychological underpinnings that shape managerial attitudes and behaviours, whilst introducing a learning model to guide in the intellectual and practical development of managers seeking enhanced global expertise. It offers user-friendly conceptual models to guide understanding and exploration of topics and summarizes and integrates the lessons learned in each chapter in applications-oriented 'Manager's Notebooks'. A companion website featuring comprehensive chapter-by-chapter PPT slides is available at www.cambridge.org/management_across_cultures.

This is a deliberately provocative book. It critiques current student behaviour management practices, seeks to explain the flawed assumptions that justify those practices, and proposes how things could be better for children in our schools if different practices were adopted. It is one of the few books to offer alternative ways of addressing the issues associated with student behaviour at school, and exposes the field to serious and

sustained critique from both a research perspective and a children's rights ideological stance. The authors address the following questions: What ideas dominate current thinking on student behaviour at school? What are the policy drivers for current practices? What is wrong with common behaviour approaches? What key ideologies justify these approaches? How can we present ethical alternatives to current approaches? How can a human rights perspective contribute to the development of alternative approaches? In exploring these questions and some ethical alternatives to the status quo, the authors suggest practical ways to

'answer back' to calls for more authoritarian responses to student behaviour within our schools. In doing so, the authors advocate for reforms on behalf of children, and in their interests.
