For successful innovation in business the responsible managers need a consistent view of the individual processes as well as an assessment of key projects in all phases of the development. Generating new ideas, fast examination of its feasibility requires skilled methods for evaluation of these ideas, plans and especially costs and revenues. Business models, calculation methods and some assessments of certain options are presented by the authors. The ability to identify risks and appropriate responses to misperceptions are

important milestones in the innovation process. From analysis of problems to the introduction of market-ready solutions, legal requirements, business demands and risk management systems are discussed. Concepts promoting uniform, binding rules for ratings in the innovation process are treated. The identification of target pricing, target costing and litigation, the evaluation of the solution to calculate risk aspects as tasks in financial management and innovation controlling are part of the content. The authors demonstrate that any innovation in different industries requires a strategic and financial project management. Monetary assessment of the individual processes, a detailed patent portfolio

and accounts management for innovation processes are of enormous importance. The book is completed by applications of the Berlin Balanced Scorecard Concept with practical examples from the innovation projects in pharmaceutical and technical business. [The Spirit of the Hive](#) Oldenbourg

A little effort goes a long way-that's what Sachiko, Honda-san, and Gunji-sensei learn as they struggle to work together to make life easier for the Special Education children. With the help of gadgets and the support of more people in their environment than meets the eye, Hikaru and Miyu become able to communicate better with the world around them.

But when Hikaru's teen idol classmate sends some mothers into a flashbulb frenzy that causes Hikaru to panic, other parents begin to question his presence alongside "normal" students in the classroom. Hikaru's first school trip also ends in disaster, when he gets separated from the group, and Sachiko begins to worry that Hikaru is losing his hard-fought place in society.

The book presents some of the most relevant results from academia in the area of Artificial Intelligence for games. It emphasizes well theoretically supported work supported by developed prototypes, which should lead into integration of academic AI techniques into current electronic entertainment games. The book elaborates on the main results produced in Academia within the last 10 years regarding all aspects of Artificial Intelligence for games, including pathfinding, decision making, and learning. A general theme of the book is the coverage of techniques for facilitating the

construction of flexible not prescribed AI for agents in games. Regarding pathfinding, the book includes new techniques for implementing real-time search methods that improve the results obtained through AI, as well as techniques for learning pathfinding behavior by observing actual players. Regarding decision making, the book describes new techniques for authoring tools that facilitate the construction by game designers (typically nonprogrammers) of behavior controlling software, by reusing patterns or actual cases of past behavior. Additionally, the book will cover a number of approaches proposed for extending the essentially pre-scripted nature of current commercial videogames AI into a more interactive form of narrative, where the story emerges from the interaction with the player. Some of those approaches rely on a layered architecture for the character AI, including beliefs, intentions and emotions, taking ideas from research on agent systems. The book also includes chapters on techniques for

automatically or semiautomatically learning complex behavior from recorded traces of human or automatic players using different combinations of reinforcement learning, case-based reasoning, neural networks and genetic algorithms.

In the last two hundred years, the field of ergonomics has become a multidisciplinary science, incorporating elements of anatomy, physiology, psychology and engineering, all with the goal of making products and systems fit the people who use them.

Ergonomics in Product Design is an invaluable resource for designers looking to stay at the forefront of ergonomic design, starting with a breakdown of human body points and percentiles, moving into an overview of principles and culminating in a curated selection of cutting-edge ergonomically designed products. Chairs and computer peripherals might be the first things to come to mind, and both are certainly covered here, along with much more: a thermometer,

shampoo dispenser, bar of soap, bottle opener, fire extinguisher, dishes and tableware, wheelchairs, crutches, safety masks and more - all re-imagined based on the latest in ergonomic science.

A consideration of one of the Bible's most powerful stories from a leading Israeli writer In this fascinating reexamination of the story of Samson, David Grossman goes beyond the surface of the familiar tale to look into what the life of this extraordinary man must have been like. What it felt like to have been "chosen" to release his people from the yoke of the Philistines, and yet alienated from them by his very otherness; what moved him to his acts of wild vandalism and his self-destructive passions; why he chose to keep some things secret, but not the most significant secret of all. We are left with the troubling knowledge that Samson bore too heavy a burden even for a man of his supernatural strength to bear alone. "There are few other Bible stories with so much drama and action, narrative fireworks

and raw emotion, as we find in the tale of Samson: the battle with the lion; the three hundred burning foxes; the women he bedded and the one woman that he loved; his betrayal by all the women in his life, from his mother to Delilah; and, in the end, his murderous suicide, when he brought the house down on himself and three thousand Philistines. Yet beyond the wild impulsiveness, the chaos, the din, we can make out a life story that is, at bottom, the tortured journey of a single, lonely and turbulent soul who never found, anywhere, a true home in the world, whose very body was a harsh place of exile. For me, this discovery, this recognition, is the point at which the myth - for all its grand images, its larger-than-life adventures - slips silently into the day-to-day existence of each of us, into our most private moments, our buried secrets." -from David Grossman's introduction to Lion's Honey  
*Bühnentechnische Rundschau* Springer Science & Business Media  
Modern Theatres 1950-2020 is an investigation of theatres, concert halls and opera houses in Asia, Europe,

the Middle East and North and South America. The book explores in detail 30 of the most significant theatres, concert halls, opera houses and dance spaces that opened between 1950 and 2010. Each theatre is reviewed and assessed by experts in theatre buildings, such as architects, acousticians, consultants and theatre practitioners, and illustrated with full-colour photographs and comparative plans and sections. A further 20 theatres that opened from 2009 to 2020 are concisely reviewed and illustrated. An excellent resource for students of theatre planning, theatre architecture and architectural design, *Modern Theatres 1950 - 2020* discusses the role of performing arts buildings in cities, explores their public and performances spaces and examines the acoustics and technologies needed in a great building. This beautifully illustrated book is also a must-read for architects, theater designers, theatre historians, and theatre practitioners.

Routledge  
Over the 15 years since

the country's last National Human Development Report (NHDR) was published Ethiopia has undergone significant economic and social changes and has recorded some of the highest growth rates in the world-over 10 per cent in some years. However, Ethiopia's Human Development Index (HDI) and its relative ranking have not moved appreciably during the past decade. Even though Ethiopia is one of the 10 countries globally that has attained the largest absolute gains in its HDI over the last several years, it still ranks 173rd out of 186 countries in the latest UNDP Human Development Report. It is this development challenge that underlines the fact that the preparation of the NHDR is so opportune now and why the focus of the report on inclusive growth for sustainable human development is so apposite. In 1998, when the last NHDR was written, the development challenges facing the country were considerably different.

A fully updated second edition of the excellent Digital Audio Signal

Processing Well established in the consumer electronics industry, Digital Audio Signal Processing (DASP) techniques are used in audio CD, computer music and multi-media components. In addition, the applications afforded by this versatile technology now range from real-time signal processing to room simulation. Digital Audio Signal Processing, Second Edition covers the latest signal processing algorithms for audio processing. Every chapter has been completely revised with an easy to understand introduction into the basics and exercises have been included for self testing. Additional Matlab files and Java Applets have been provided on an accompanying website, which support the book by easy to access application examples. Key features include: A thoroughly updated and revised second edition of the popular Digital Audio Signal Processing, a comprehensive coverage of the topic as whole Provides basic principles and fundamentals for Quantization, Filters, Dynamic Range Control, Room Simulation, Sampling Rate

Conversion, and Audio Coding Includes detailed accounts of studio technology, digital transmission systems, storage media and audio components for home entertainment Contains precise algorithm description and applications Provides a full account of the techniques of DASP showing their theoretical foundations and practical solutions Includes updated computer-based exercises, an accompanying website, and features Web-based Interactive JAVA-Applets for audio processing This essential guide to digital audio signal processing will serve as an invaluable reference to audio engineering professionals, R&D engineers, researchers in consumer electronics industries and academia, and Hardware and Software developers in IT companies. Advanced students studying multi-media courses will also find this guide of interest. Deutsche Nationalbibliografie John Wiley & Sons Das Lehrbuch stellt die gesamte Bandbreite des Veranstaltungsmanagements mit seinen unterschiedlichen Teilmärkten dar und

beschreibt die jeweiligen Wertschöpfungsprozesse nach einheitlichen Kriterien. Die speziellen Anforderungen und Akteure des Managements von Kulturveranstaltungen, Fernsehproduktionen, Messen und Ausstellungen, Sportveranstaltungen, Konzerten und Volksfesten bis hin zu Fanmeilen und Festivals werden in übersichtlicher Form vorgestellt. Die Autoren gehen dabei auch detailliert auf Besonderheiten wie Genehmigungsverfahren, Sicherheitsplanung sowie Informations- und Nachhaltigkeitsmanagement ein. Eingängige Definitionen und Merksätze sowie zahlreiche Kontrollfragen und Aufgaben sichern den Lernerfolg, zudem beinhaltet jedes Kapitel ein ausführliches Verzeichnis mit weiterführender Literatur.

Die Muster-Versammlungsstättenverordnung (MVStättVO) legt dem Betreiber verstärkt ganz bestimmte Pflichten auf. Der Beuth-Praxis-Band setzt sich detailliert mit der organisatorischen Umsetzung der MVStättVO auseinander.

Die Autorin erläutert verständlich die wesentlichen Bau- und Betriebsvorschriften, geht auf die Betreiberpflichten ein und benennt die Unterschiede der VStättVO in den einzelnen Bundesländern. Es werden ausführlich die Verantwortlichkeiten der verschiedenen beteiligten Personengruppen erläutert.

Modern Theatres 1950-2020 John Wiley & Sons

John Cage's Concert for Piano and Orchestra is one of the seminal works of the second half of the twentieth century, and the centerpiece of the middle period of Cage's output. It is a culmination of Cage's work up to that point, incorporating notation techniques he had spent the past decade developing - techniques which remain radical to this day. But despite Cage's vitality to the musical development of the twentieth century, and the Concert's centrality to his career, the work is still rarely performed and even more rarely examined in detail. In this volume, Martin Iddon and Philip Thomas provide a rich and critical examination of this enormously significant piece, tracing its many

contexts and influences - particularly Schoenberg, jazz, and Cage's own compositional practice - through a wide and previously untapped range of archival sources. Iddon and Thomas explain the Concert through a reading of its many histories, especially in performance - from the legendary performer disobedience and audience disorder of its 1958 New York premiere to a no less disastrous European premiere later the same year. They also highlight the importance of the piano soloist who premiered the piece, David Tudor, and its use alongside choreographer Merce Cunningham's *Antic Meet*. A careful examination of an apparently bewildering piece, the book explores the critical response to the Concert's performances, re-interrogates the mythology surrounding it, and finally turns to the music itself, in all its component parts, to see what it truly asks of performers and listeners.

This book offers an essential manual for project managers, project

management offices (PMO's), trainers and consultants, addressing the psychological side of project management. Written by leading scholars in organizational psychology and by top experts in project management, it covers all major psychological topics that are key to project success. The book features dedicated chapters on leadership and teamwork, including virtual and intercultural cooperation, commitment and motivation of project teams. It adds a psychological perspective to personnel management, decision-making, information and knowledge management and communication in project work. Power, influencing tactics and other aspects of stakeholder management are covered, as well as project coaching, innovation and creativity, self-management and the management of conflicts, risks and crises.

How can 40,000 bees working in the dark, by instinct alone, construct a honey comb?  
Synthesizing decades of experiments, *The Spirit of the Hive* presents the

genetic and physiological mechanisms underlying the division of labor in honey bee colonies and explains how it is an inevitable product of group living, evolving over millions of years.

### **Virtues of Openness**

DCV

The movement toward greater openness represents a change of philosophy, ethos, and government and a set of interrelated and complex changes that transform markets altering the modes of production and consumption, ushering in a new era based on the values of openness: an ethic of sharing and peer-to-peer collaboration enabled through new architectures of participation. These changes indicate a broader shift from the underlying industrial mode of production—a “productionist” metaphysics—to a postindustrial mode of consumption as use, reuse, and modification where new logics of social media structure different patterns of cultural consumption and symbolic analysis becomes a habitual and daily creative activity. The economics of openness constructs a new language of “presuming”

and “produsage” in order to capture the open participation, collective co-creativity, communal evaluation, and commons-based production of social and public goods.

Information is the vital element in the “new” politics and economy that links space, knowledge, and capital in networked practices and freedom is the essential ingredient in this equation if these network practices are to develop or transform themselves into 'knowledge cultures'. The *Virtues of Openness* investigates the social processes and policies that foster openness as an overriding educational value evidenced in the growth of open source, open access, and open education and their convergences that characterize global knowledge communities. The book argues that openness seems also to suggest political transparency and the norms of open inquiry, indeed, even democracy itself as both the basis of the logic of inquiry and the dissemination of its results. The *Virtues of Openness* examines the complex history of the concept of the open society before beginning a systematic investigation

of openness in relation to the book, the "open text" and the written word.

These changes are discussed in relation to the development of new open spaces of scholarship with their impact upon open journal systems, open peer review, open science, and the open global digital economy.

### **Mechanik in der Veranstaltungstechnik**

John Wiley & Sons

"In business, imitation gets a bad rap: some business leaders see imitators as 'me too' players forced to copy because they have nothing original to offer. In Copycats, Oded Shenkar challenges this viewpoint. He reveals how imitation - the exact or broad-brushed copying of an innovation - is as critical to prosperity as innovation, especially when the two are used together."--Inside jacket.

### **Topics in Artificial**

**Intelligence** Routledge  
Everyone is a VIP, in their own way - what counts is the personality. Based on this idea, the illustrator Miri Lee presents around 60 varieties of VIPs, simply by replacing the word "Important" with other adjectives beginning with the letter "I" and illustrating them with sharp wit. The result is a contemporary and humorous collection of various VIPs, from "Very Ignorant" to "Very Insane" and "Very Intelligent". Miri Lee, born in 1986 in South Korea, is an illustrator and communications designer. She studied at the Kaywon School of Art & Design, then studied communication design at Constance University. The book was put together as part of a project series by design students at Constance University for the "Year of Justice" 2015 in Constance.

*After Sound* Springer  
After Sound considers contemporary art practices that reconceive

music beyond the limitation of sound. This book is called After Sound because music and sound are, in Barrett's account, different entities. While musicology and sound art theory alike typically equate music with pure instrumental sound, or absolute music, Barrett posits music as an expanded field of artistic practice encompassing a range of different media and symbolic relationships. The works discussed in After Sound thus use performance, text scores, musical automata, video, social practice, and installation while they articulate a novel aesthetic space for a radically engaged musical practice. Coining the term "critical music," this book examines a diverse collection of art projects which intervene into specific political and philosophical conflicts by exploring music's unique historical forms. Through a series of intimate studies of artworks surveyed from the visual and performing arts of the past ten years-Pussy Riot, Ultra-red, Hong-Kai Wang, Peter Ablinger, Pauline Boudry and Renate Lorenz, and others-After Sound offers a significant revision to the way we think about music. The

book as a whole offers a way out of one of the most vexing deadlocks of contemporary cultural criticism: the choice between a sound art effectively divorced from the formal-historical coordinates of musical practice and the hermetic music that dominates new music circles today.

**Bühnentechnik** Harvard Business Press

Wer eine Veranstaltung durchführt, trägt für die Sicherheit und den reibungslosen Ablauf dieser Veranstaltung die Verantwortung, und das nicht nur in menschlicher Hinsicht, sondern auch in juristischer. Doch worin genau besteht eigentlich diese Verantwortung? Die Gesetzestexte geben auf diese Frage nur höchst ungenügend Antwort: Bis auf die

Anwesenheitspflicht des Veranstalters sind keine Aufgaben und Rollen definiert. Auch die berufsgenossenschaftlichen Vorschriften schließen diese Lücke nicht. Der Beuth Verlag hat daher einen dringend benötigten Leitfaden für die Veranstaltungsleitung erarbeitet. Hier liegt in

der 1. Auflage das Manual vor, mit dem die Verantwortlichen ihre Veranstaltungen systematisch planen, aufbauen und durchführen können. Das Buch führt ein in die Grundlagen und die allgemeinen Anforderungen, sowohl für den Normalbetrieb als auch für den Krisenfall. Es erläutert die Rollen und Aufgabenverteilung der beiden Bereiche Technische Leitung/Veranstaltungsleitung und thematisiert Aspekte wie die Betriebssicherheit und den Arbeitsschutz. Des Weiteren untersucht es die Besonderheiten, die sich aus verschiedenen Veranstaltungsformen ergeben, wie beispielsweise Theater und Opernhäuser, die Technische Leitung bei Messen, bei Events und bei Festinstallationen. Dieser Beuth Band ermöglicht eine klare Zuweisung von Verantwortlichkeiten und Tätigkeitsfeldern und hilft, Veranstaltungen effizienter und sicherer zu machen.
