To suggest that there are aliens is mind blowing but to also suggest, that that becomes an avenue to deny the existence of the one God—Consciousness—might be considered as an utter nonsense. There is Cosmic Consciousness always. There are many gods but there is one Consciousness. Whether you can differentiate the very many gods and the only ONE Consciousness is what differentiates you and sets you apart from a follower—a religionist, an atheist or a theist of a different kind. Whether or not you believe/understand Consciousness, your afterlife is guaranteed because you are the creation/evolution of Consciousness. You are simply here to experience creation in a yin and yang—a duality. Meanwhile, do you recall that biblical Moses asked "God" for an identification? Consciousness does not work like a God and a prophet. Consciousness lets you do your thing after all, you are experiencing the creations of Consciousness. Moses could no longer identify which God that was given the messages because they were doing a doublespeak. There were simply too many Gods. What follows is a cautious search for answers. The answers seem to create more confusions. Should the word God be redefined? The Old Testament simply did not propagate the concept of monotheism even though we are taught to accept and profess it was/is so. In fact, Egypt has the record at a practice for monotheism through Akhenaten. Though religious people today would have dismissed Akhenaten as a worshipper of the Sun, they failed to acknowledge that the Sun God representation is an allegory. The sun, moon, the sea, snakes, etc., are just symbols depicting a God. There must be tension here and it is obvious if you think about it. Polytheism is simply and without qualification the belief in more than one God. Thus, on the most common way of understanding polytheism, Christian belief will not be monotheism, but clearly polytheism. Read it all here.

This book puts forth the idea that rather than there being a "God, or a Balance in the Universe" "God is the Balance in the Universe." It also puts forth the idea that Jesus Christ was basically conceived by 300 Roman Catholic Bishops at the Nicene Council in 325 A.D. The Bible is indeed not the Word of God, neither was it influenced by God. It consists of Fables, parables, myths, folktales, and allegories taken from other mythical-religious doctrines. The Bible consists of too many inconsistencies, disparities, irregularities, and unrealistic stories to have any basis in reality.

Does it feel like God has stopped listening to your prayers? Do you approach prayer with confidence or with confusion? Perhaps you have given up organized prayer entirely, resorting to monotonous, habitual, shallow repetitions--day after day after day. This work will address these and other questions we all have about communicating with God. In these pages you will find straight talk about substantial pitfalls along the road to authentic prayer. The present treatise has two objects. It is intended, primarily and chiefly, as a repertory of the more significant facts of Shinto for the use of scientific students of religion. It also comprises an outline theory of the origin and earlier stages of the development of religion, prepared with special reference to the Shinto evidence. The subject is treated from a positive, not from a negative or agnostic standpoint, Religion being regarded as a normal function, not a disease, of humanity. This element of the work owes much to the continental scholars Réville, Goblet D'Alviella, and Pfeleiderer.

Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet--the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's *Why I Am Not a Christian* and Sam Harris's recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

All The God We Cannot See: Why There is God Outskirts Press

A call to action to address people's psychological and social motives for a belief in God, rather than debate the existence of God With every argument for theism long since discredited, the result is that atheism has become little more than the noises reasonable people make in the presence of unjustified religious beliefs. Thus, engaging in interminable debate with religious believers about the existence of God has become exactly the wrong way for nonbelievers to try to deal with misguided—and

often dangerous—belief in a higher power. The key, author James Lindsay argues, is to stop that particular conversation. He demonstrates that whenever people say they believe in "God," they are really telling us that they have certain psychological and social needs that they do not know how to meet. Lindsay then provides more productive avenues of discussion and action. Once nonbelievers understand this simple point, and drop the very label of atheist, will they be able to change the way we all think about, talk about, and act upon the troublesome notion called "God."

Confusion No More Be Something Great LLC

Atheism is a subject that draws a lot of controversy into today's society. People are now starting to doubt the existence of God because of all the advancements in modern science and technology that explain many of life's questions. With that being said, there is still a lot of confusion out there about atheism and what its belief system actually is. The only thing that people seem to know is that it is the disbelief in God, but it actually goes much deeper than that. In fact, there are different types of atheists who don't all act the same way about their disbelief. Some of them are open to new scientific evidence that proves them wrong while others are simply determined to not believe in God no matter what. In this book you will not only learn about the general concept of atheism and its effect on the world, but you will also learn about the different types of atheists as well. Religious followers tend to think of atheists as "devil worshippers" and other nonsensical things. The reality is atheists are just people who believe is something that is not supernatural or superhuman. The religious community only holds their "devil" belief about atheists because it contradicts their own religion. But what the religious community fails to realize is that there are many different religions and faiths in the world that all have their own belief system. The actions a person commits in one religion will be offensive to some other religion in the world. Therefore, there is no way to make people of all faiths happy and satisfied. There will always be some group of people out there who gets offended by what you belief and what you do. So if you want to be an atheist then no one should feel afraid to be open about it. Atheism won't even take much time out of your day because there are no churches or group organizations to go to worship atheist beliefs. Another reason this book was written was because atheists travel a very lonely road. Sure there are some forums on the internet where you can chat with other atheists, but in your

regular life there is nowhere you can go to meet up with other atheists. After all, how many atheists do you know in your regular life? You could probably count the number on one hand.

Fortunately, anyone can celebrate being an atheist by simply waking up in the morning and asking themselves what is real to them and what is not. If they are still convinced that God is not real then they will be satisfied with that belief and go about their day. This book on Atheism is not meant to ridicule or put down anyone else's faith. Instead, it was written to actually help people of all faiths to better understand atheism and the viewpoints of atheists around the world. The world is very diverse as it pertains to people's religious beliefs. Many of the wars taking place around the world are formed from the basis of these beliefs. Hopefully, this book will show people of all religions that there is another belief system out there that does not indoctrinate or persecute anyone. Contents: -Preface -My experience with god - What is atheism -Types of atheism -Atheist philosophies -Why god is evil -Morality vs. religion -Do you need religion to be nice - Atheist criticisms of religion -Proof that there is no god -Religious people are less intelligent than atheists -Nonsense from the bible -Reasons for being an atheist! Why choose atheism -Atheism in the USA -Conclusion

The belief that modern Israel fulfills biblical prophecy is a theological aberration. Traditional postmillennialists, amillennialists, and premillennialists have never believed that national or geographical Israel is relevant this side of the rapture.

[A Dictionary of the Bible](#) Cambridge University Press

Have you ever had a thought that there maybe life in other planets? Don't forget that our earth is only 4.7 billion years and much younger than this universe that is inching towards 14 billion years. Do you think that there may be another universe? Do you believe in aliens? What about spaceships and UFO? Perhaps, the UFOs and aliens have been visiting our planet and we don't know about it. Perhaps, some of us knows about the aliens and UFOs but are keeping it to ourselves because we don't want to be laughed at. It could be naïve on our part to think that we are the only life in the universe. Reports of UFO sightings occur from time to time though some sightings science cannot explain. No book has explained more about aliens and UFOs than the holy books. The holy books explained spaceships. The Prophet Ezekiel also told us about these airships. Did you miss the biblical mentions of the spaceships too? The Gods/aliens were not hiding themselves from our forefathers who likened these aliens to God and Satan, good and bad angels, and in some instances as monsters. The book of Enoch explained it all. The book even told us the names of the aliens and explained his flight in the spaceships. Prophet Enoch was not the only one who took a spin in the spaceships. A spaceships was described in a holy book to fly around the earth in one minute. All the above were science and technology. Not Faith. If the aliens moved by means of spaceships/airships,would that make them omnipresent or omniscience? Science and technology- yes but omnipresence--quality of being everywhere at the same instant--is not one of their characteristics. We as humans assigned those characteristics to the "Gods." Some people know that the Earth is 4.6 billion years by evidence through science. Some, also believe the earth is 6000 years by faith. One of the reasons for this work is to help channel some Bible readers and readers of books of other religious doctrines in the direction of logic and reason. The truth is that most readers have no idea how and what to believe, so they believe by faith. These ancient texts were produced by royal scribes and religious leaders in powerful economic and political positions and settings.They wrote to advocate and make legitimate, political or religious ideas and reforms so as to yield

desired doctrines and ideologies. There is several illogical thinking when it comes to religion. We know according to religious books that: This/These God(s) created everything. Evil is a subset of everything. Therefore, God created evil. When it becomes impossible to logically explain any given event, the bible believers resort to various methods to explain away illogical texts. Can religious dogma and its inherent confusion survive in the face of science and logic or is it doomed to the surfacing

evidence revealing the workings of nature set in time by the Almighty Universal Creator who is sometimes referred to as Consciousness? Reading through the Bible and critically analyzing and connecting the dots, you too could come to have better understandings for the Bible's seemingly shocking inconsistencies and contradictions. These, among others, helped shape the viewpoint expressed in this book.
