Transitional Justice and Civil Society in the Balkans covers civil society engagements with transitional justice processes in the Balkans. The Balkans are a region marked by the post-communist

and post-conflict transitional turmoil through which its countries are going through. This volume is intended to provide a comprehensive introduction to research in transitional justice in this part of the world, mostly written by local scholars. Transitional justice is ever-growing field which responds to dilemmas over how successor regimes should deal with past human rights abuses of their authoritarian predecessors. The editors and author emphasize the relatively unexplored and under-researched role of civil society groups and social movements, such as local women's groups, the role of art and community media and other grass-roots transitional justice mechanisms and initiatives. Through specific case-studies, the unique contribution of this volume is not only that it covers a part of the world that is not adequately represented in transitional justice field, but also that the volume is the first project originally researched and written by experts and scholars from the region or in collaboration with international scholars.

**Surprising Facts about the Human Body** Springer Nature

The universal protection of human rights remains the core challenge of the United Nations if it is to achieve its mission of a world of peace, development and justice. Yet, at a time of seismic changes in the world, when shocking violations of human rights are taking place world-wide, the UN human rights system is in need of urgent modernization. This book, written by a foremost scholar-practitioner who previously exercised the functions of UN High Commissioner for Human Rights, advances a series of ideas to modernize the UN protection system. Among a dozen key proposals are that the UN human rights system should help alleviate the plight of the poorest, pay greater attention to the national protection system of each country, and establish a World Court on Human Rights that can deal with countries which grievously violate human rights. Unlike other texts that have focused on those topics, this book not only provides comprehensive analysis but, crucially, offers practical and workable solutions based on the author's significant expertise and experience. Scholars, practitioners, and students of international human rights will benefit immensely from its analysis, insights, perspectives, and proposals. It is a salutary contribution on the 75th anniversary of the UN (2020).

This book builds on the success of the First International Conference on Facts and Evidence: A Dialogue between Law and Philosophy (Shanghai, China, May 2016), which was co-hosted by the Collaborative Innovation Center of Judicial Civilization (CICJC) and East China Normal University. The Second International Conference on Facts and Evidence: A Dialogue between Law and History was jointly organized by the CICJC, the Institute of Evidence Law and Forensic Science (ELFS) at China University of Political Science and Law (CUPL), and Peking University School of

Transnational Law (STL) in Shenzhen, China, on November 16–17, 2019. Historians, legal scholars and legal practitioners share the same interest in ascertaining the “truth” in their respective professional endeavors. It is generally recognized that any historical study without truthful narration of historical events is fiction and that any judicial trial without accurate fact-finding is a miscarriage of justice. In both historical research and the judicial process, practitioners are invariably called upon, before making any arguments, to prove the underlying facts using evidence, regardless of how the concept is defined or employed in different academic or practical contexts. Thus, historians and legal professionals have respectively developed theories and methodological tools to inform and explain the process of gathering evidentiary proof. When lawyers and judges reconsider the facts of cases, “questions of law” are actually a subset of “questions of fact,” and thus, the legal interpretation process also involves questions of “historical fact.” The book brings together more than twenty leading history and legal scholars from around the world to explore a range of issues concerning the role of facts as evidence in both disciplines. As such, the book is of enduring value to historians, legal scholars and everyone interested in truth-seeking.
