**Public Health for an Aging Society** JHU Press

Understanding Health 3e provides students with an introduction to health promotion, the determinants of health, and the other frameworks of health.

*Community Health and Wellness* Mosby

Addressing the continuous need for new growth sectors in post-industrial cities, this book considers the economic significance of wellness from a development policy perspective. The author goes beyond personal health discourse to conceptualise wellness as an emerging industry, presenting empirical cases of community, attraction, and export-orientated strategies around the world. Combining holistic health, urban governance and economic development, this book will provide valuable reading for those studying policy, tourism and the wellness sector as well as business entrepreneurs within this evolving industry.

*Contexts of Nursing* Elsevier Health Sciences

An understanding of the social environment is still critical to the text but in this edition the settings such as school, workplace and cities are integrated throughout. The socio-ecological determinants of health are considered at the forefront, with a greater emphasis on the implications of globalisation and health.

*Contexts of Nursing* Elsevier Australia

How did seven low- and middle-income countries, inspired by the landmark Alma-Ata Declaration, dramatically improve citizen health by focusing on primary health care? The Alma-Ata Declaration of 1978 marked a potential turning point in global health, signaling a commitment to primary health care that could have improved the safety of air, food, water, roads, homes, and workplaces in all 180 countries that signed it. Unfortunately, progress in many countries stalled in the 1980s. The declaration was, however, embraced by a number of countries, where its implementation led to substantial improvement in citizen health. Achieving Health for All reveals how, inspired by Alma-Ata, the governments of seven countries executed comprehensive primary health care systems, deploying new cadres of community-based health workers to bring relevant services to ordinary households. Drawing on a set of narrative case studies from Bangladesh, Indonesia, Ethiopia, Nepal, Ghana, Sri Lanka, and Vietnam, the book explains how a primary health care focus succeeded in improving population health. The book also conclusively demonstrates that comprehensive, multisector, community-controlled, and population-level primary health care is a viable strategy that, against the odds, has led to sustainable, scalable good health at lower cost. Bringing together a group of experts to analyze the forty-year legacy of the Alma-Ata Declaration, Achieving Health for All is a fascinating look at the work needed to transform nations from places that make people sick to places where they stay healthy. An inspiring array of lessons learned along the way shows how readers can make policies that support the health of all people. Contributors: Onaopemipo Abiodun, Vinya Ariyaratne, John Koku Awoonor-Williams, Kedar Prasad Baral, Ayaga A. Bawah, Pedro Más Bermejo, Fred N. **Achieving Health for All** Sterling Publishing Company, Inc.

Towards a Sociology of Nursing offers fresh insights from recent research into the nursing profession. Nurses represent an important part of the professionally trained female workforce and, being a middle-class profession, changes in nursing reflect changes of many working women worldwide. Scholarship addressing these changes, however, often consists of narratives of nurses talking about themselves, which can be enriched by a sociological background that foregrounds hypotheses. In this book, Ricardo A. Ayala problematises the realities which inform, affect and shape nursing, offering new perspectives on the consequences of those social realities for the nursing profession and society more broadly. He draws on extensive field research with nurses in the workplace, spending time with them, interviewing key actors and reading and analysing documents critically through a distinctive sociological lens.

*Understanding Health* W.B. Saunders Company

Intended primarily for use in New Zealand and Australia, this text focuses on health promotion, rather than treating illness. It provides a number of models for community health nursing practice and demonstrates how each would guide practice.

**Tabbner's Nursing Care - E-Book** U.S. Navy Seabee Museum

The 5th Australian edition Kozier & Erb's Fundamentals of Nursing continues to setting the foundation for nursing excellence amid ongoing changes to the regulation of nursing. This edition written for Australia and NZ students.

**Introduction to Community Based Nursing** Springer Science & Business Media

"This volume offers a comprehensive review of all the current knowledge on maternal role attainment since Reva Rubin's seminal work. Drawing from research in nursing, maternal-child health, psychology, sociology, and social work, the book examines the psychological transition to motherhood from a contemporary, multidisciplinary perspective." "Special circumstances such as preterm birth and single parenthood are discussed, as well as the effects of maternal employment and maternal age (such as teens and older mothers). This volume should be of value for use in courses in maternity nursing, women's studies, community and social psychology, and social work, as well as for health professionals providing care for the woman during pregnancy and early motherhood."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved **Community Health Nursing** Springer Nature

This introduction to community based nursing roles and concepts focuses on nursing care of the individual in a community setting. The text is divided into four units that cover the knowledge base for concepts and the application of concepts. Basic concepts are presented in the first unit, with discussion of practice settings, levels of prevention, health promotion, the family and cultural considerations. Three basic skills of the community based nursing - communicating, educating and managing - are examined in the second unit. The third unit explains the application of skills and concepts to continuity of care, discharge planning, community resources and referrals and home health practice. The fourth unit prepares the reader for what's ahead, with a look into future trends in community based nursing.

[The New Zealand Official Year-book](#) Lippincott Williams & Wilkins

This book adopts an interdisciplinary approach with a wide scope of perspectives on primary healthcare, describing related principles, care models, practices and social contexts. It combines aspects of development, research and education applied in primary health care, providing practitioners and scholars with a comprehensive overview of the current knowledge and delivery models of healthcare in community settings. It covers the practical, philosophical and scholarly issues pertinent to the delivery, financing, planning, ethics, health politics, professional and technological development, resources, and monitoring in primary health care. Contributors are from a diverse range of academic and professional backgrounds, bringing together collective expertise in mainstream medicine, nursing, allied health, Chinese medicine, health economics, administration, law, public policy, housing management, information technology and mass communications. As such, the book does not follow the common clinical practice or service-based approach found in most texts on primary care. The contents will serve as a useful reference work for policymakers, researchers, community health practitioners, health executives and higher education students.

*Primary Care Revisited* OUP Australia & New Zealand

A trusted person-centred resource to start you on the path to professional success Fundamentals of Nursing and Midwifery is a popular foundational

nursing text specifically developed for Australian and New Zealand students. This comprehensive resource provides a detailed overview of key information with person-centred care highlighted throughout to focus on the individualistic, interactive and holistic nature of nursing and midwifery practice. It uses accessible language that introduces students to the 'why' as well as the 'how' of nursing and midwifery. It focuses not only on a person's physical healthcare needs, but also on the intellectual, emotional, sociocultural and spiritual aspects of care. In this way, students learn to be holistic health care professionals while acquiring the foundational knowledge, procedures and skills required for successful nursing or midwifery practice.

**Mental Health Nursing 7e** Elsevier Health Sciences

Written specifically for Australian and New Zealand enrolled nurse students, this long awaited new edition reflects the changes and challenges in contemporary enrolled nurse practice as well as the additions and modifications that are occurring in nursing curricula. Tabbner's Nursing Care: Theory and Practice 5th edition has been written, reviewed and edited by the people who educate the enrolled nurse and continues to provide enrolled nurse students with the most comprehensive resource available.

*The India Office List* Elsevier Health Sciences

The second edition of Emergency and Trauma Care for Nurses and Paramedics provides the most up-to-date and comprehensive coverage of clinical procedures and issues encountered in contemporary emergency care in Australia and New Zealand. Written by leading academics and clinicians, this fully revised and updated edition follows the patient's journey from pre-hospital retrieval to definitive care. With a strong focus on multidisciplinary care, this evidence-based emergency and trauma resource will appeal to pre-hospital care providers, rural, remote and urban emergency nurses and allied health professionals, as well as disaster management and interfacility transport staff. Essential concepts are covered in a logical order, commencing with: An introduction to emergency professions and professional issues Clinical and health systems Patient presentations ordered by body system as well as toxicology, envenomation, ocular, environmental emergencies and unique population groups Major trauma assessment and management and end-of-life care information and considerations. Emergency and Trauma Care for Nurses and Paramedics 2e continues to be the pre-eminent resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary care from retrieval through to rehabilitation. A cultural safety approach is included throughout - addressing cultural diversity, beliefs and values and focusing on Aboriginal and Torres Strait Islander health and Māori health Essentials outline the main points addressed in each chapter Practice tips throughout assist with communication skills, procedures and assessment Case studies are supported by questions and answers to encourage active learning New online resources available on Evolve, including over 30 new case studies with paramedic-specific questions. Highlighted skills - cross references to the Clinical Skills chapter throughout text Over 30 new case studies Patient journey from pre-hospital and emergency-specific case studies Critical thinking questions at the end of chapters Chapter 35 Obstetric emergencies now includes 'Supporting a normal birth'.

**An Introduction to Community and Primary Health Care** Lippincott Williams & Wilkins

The newest edition of best-selling Chronic Illness continues to focus on the various aspects of chronic illness that influence both patients and their families. Topics include the sociological, psychological, ethical, organizational, and financial factors, as well as individual and system outcomes. This book is designed to teach students about the whole client or patient versus the physical status of the client with chronic illness. The study questions at the end of each chapter and the case studies help the students apply the information to real life. Evidence-based practice references are included in almost every chapter.
