Nueva lista de la avifauna Argentina

Editorial CSIC - CSIC Press

Contains scholarly evaluations of books and book chapters as well as conference papers and articles published worldwide in the field of Latin American studies. Covers social sciences and the humanities in alternate years.

Estudios sobre la biodiversidad de la región de Bahía Honda (Veraguas, Panamá)

University of Nevada Press

La publicación recoge los estudios desarrollados en la región de bahía honda. Dichos estudios intentan abordar los grupos de mayor interés. En el medio terrestre fueron objeto de investigación las plantas, algunos invertebrados, y todos los vertebrados. Pero por desgracia, hemos tenido que dejar para mejor ocasión los estudios marinos; la causa no fue otra que la carencia de las garantías mínimas de seguridad, al no disponer todavía en la zona de infraestructura adecuada para el equipo de buceo

The first major regional flora ever written in Spanish, Flora Mesoamericana is a collaborative effort of the Missouri Botanical Garden, the Instituto de Biología of the National Autonomous University of Mexico, the Natural History Museum, London, and numerous specialists worldwide. The Flora describes, for the first time, all the vascular plants growing in the southeasternmost states of Mexico, including the Yucatan Peninsula, and all the Central American republics. Covered in this volume are Alismataceae to

Cyperaceae, 326 genera and 1,891 species.

In this unusual and unique volume, Alexander Leitch provides a warm, often witty, and always informative reference book on Princeton University. The collection of approximately 400 articles, alphabetically arranged and written by some seventy faculty members and alumni in addition to the author, covers all aspects of Princeton life in the past as well as in the present. Of special interest are the biographies of eminent Princetonians, including the University's presidents, well-known trustees, distinguished deans, famous alumni, and some of Princeton's most prominent and popular professors. Other articles in the book embrace a wide range of topics: histories of academic departments, programs, and research units; descriptions of the honor system, the preceptorial method, the four-course plan, and coeducation; a historical survey of the University's acquisition of land and the development of its campus, together with articles on its principal buildings; pieces on student activities; accounts of alumni activities; articles on athletics; portraits of notable personalities; and commentaries on a host of lighter topics such as the cane spree, beer jackets, the Faculty Song, the proctors, and Veterans of Future Wars. Among the most important articles are one summarizing Woodrow Wilson's Sesquicentennial address, "Princeton in the Nation's Service," and a dozen others recording faculty and alumni achievements toward the goal encompassed by that phrase. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve

the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Guía para la identificación de las aves de Argentina y Uruguay UNAM

Does what economies export matter for development? If so, can industrial policies improve on the export basket generated by the market? This book approaches these questions from a variety of conceptual and policy viewpoints. Reviewing the theoretical arguments in favor of industrial policies, the authors first ask whether existing indicators allow policy makers to identify growth-promoting sectors with confidence. To this end, they assess, and ultimately cast doubt upon, the reliability of many popular indicators advocated by proponents of industrial policy. Second, and central to their critique, the authors document extraordinary differences in the performance of countries exporting seemingly identical products, be they natural resources or 'high-tech' goods. Further, they argue that globalization has so fragmented the production process that even talking about exported goods as opposed to tasks may be misleading. Reviewing evidence from history and from around the world, the authors conclude that policy makers should focus less on what is produced, and more on how it is produced. They analyze alternative approaches to picking winners but conclude by favoring 'horizontal-ish' policies--for instance, those that build human capital or foment innovation in existing and future products—that only incidentally favor some sectors over others.

Before the first appearance of the Atlas of the World's Languages in 1993, all the world's languages had never been accurately and completely mapped. The Atlas depicts the location of every known living language, including languages on the point of extinction. This fully revised edition of the Atlas offers: up-to-date research, some from fieldwork in early 2006 a general linguistic history of each section an overview of the genetic relations of the languages in each section statistical and sociolinguistic information a large number of new or completely updated maps further reading and a bibliography for each section a cross-referenced language index of over 6,000 languages. Presenting contributions from international scholars, covering over 6,000 languages and containing over 150 full-colour maps, the Atlas of the World's Languages is the definitive reference resource for every linguistic and reference library.

Languages are not only tools of communication, they also reflect a view of the world. Languages are vehicles of value systems and cultural expressions and are an essential component of the living heritage of humanity. Yet, many of them are in danger of disappearing. UNESCO's Atlas of the World's Languages in Danger tries to raise awareness on language endangerment. This third edition has been completely revised and expanded to include new series of maps and new points of view.

Treaty Series UNESCO

An investigation into the specifics of Basque migrations, cultural representations, diasporic politics, and ethnonationalism, using theories from sociology, political science, history, and anthropology. Distributed for the Center for Basque Studies.

Mammals of the Neotropics, Volume 2 Mammals of the Neotropics satisfies the need for a comprehensive, up-to-date survey of existing knowledge of South America's terrestrial and marine mammals. No comparable account of South American mammals has ever been published in any language, and this timely work will help encourage the research vital to conservation efforts. This second of a projected three volumes covers southern South America. The authors discuss the

historical biogeography and contemporary habitats of the region and then provide individual accounts for nearly 360 indigenous species, including information on size, appearance, ecology, behavior, and life history. Range maps, line drawings, and color plates supplement the text. To place the species accounts in a broader context, the authors consider the diversity of animals within each taxonomic group, examine the Neotropical species from a worldwide geographical perspective, and review taxonomic questions and controversies. Two final chapters deal with the community ecology of mammals and the effects humans have had on the mammalian fauna of the southern cone.
